Life DoS V2.0 by eXero

I have made my DoS tool, and have decided to release it. It is not that powerful, but it does DoS. Please use this wisely. If you like it, and or use it please post a reply on this thread. Please do not leech my work. Post a reply if you download. Do not post this anywhere else without my permission. Read the README file before using the program. DO NOT scan anywhere but novirusthanks.org. DO NOT make a mirror download link, or make your own download link.

Looks neat! How powerful is weak though? Could it take down a home connection?

eXero - October 21, 2010, 8:20 pm

It pings at like 65k packets. Not much.

Thanks for the replies so far!

Can you give an example on what to expect from this?

I've download this, and I do like It's simplicity.

I realize It's not a powerful tool, but nonetheless, I shall checkout It's functionality.
Thank you.

Working to an extent...65k bytes you can ping that in CMD but otherwise keep up the good work, also look for shells, would make it more powerful.

I'd rather not be told things I already know.
