Thread: [\[NEW\]\[HOT\]\[TUT\]\[First time on HF\] MAKE ANIMATED SIGNATURES\[IN 2 minutes\]](#)

eXperienc3 - October 18, 2010, 9:48 am

hi guys.. i am D3AdLY WARRI0R....here is my first gfx tutorial on HF

i hope u will like it this tut is one of the very "rare" tutorials in my opinion....

HOW TO create animated signatures?

SO now i will show u how to create animated signatures like these

[img]http://lh6.ggpht.com/_lxxOD5m3-Hw/TAjtU7Kyx1I/AAHs/NRa1wsYDND8/s400/burner.png[/img]

THIS IS VERY SIMPLE AND EASY BUT I BELIEVE THAT U CAN NOT FIND A TUTORIAL on this very easily ..so i decided to make one for u all

FIRST OF ALL DOWNLOAD ulead gif animator from here-
Code

http://#.com/dl/75803921/b8052b3/www.warez-legend.com_Ulead.GIF.Animator.5.05.Full_dd.rar.htm
note- ?this is not uploaded by me so i can not take any guarantee of it...

it is found on net..u can also search it on google

NOW letme tell u that making signatures is pretty easy what u need is only

an animation clip....

i have included some animated ones with this tutorial

u can download them from here :)

Code http://www.ougfiles.com/dl/527695572/animated_clips.rarnote---this is uploaded by me and i take all the guarantee lol ?

now

select any 1 clip like i have selected in these pics :)

so here starts the main steps :D

Steps

firstly we will select the canvas size
by going to edit and selecting "canvas size"

now select any appropriate size :) i selected "1110 by 330" (u can go to this menu by pressing Ctrl +g)

[IMG]http://i55.[censored].com/2q3y9w9.png[/IMG]

or u can select the main object i.e the clip and select "crop canvas"(u can also go to this meny by

pressing Ctrl+R)

now select the first Frame from the bottom panel

[IMG][http://i55.\[censored\].com/2uppg5.png](http://i55.[censored].com/2uppg5.png)[/IMG]

Select Txt option from the left panel

JUST CLICK any where on the selected frame where u want ur name to be written

and u will get the text options in the right bottom of the screen

[IMG][http://i53.\[censored\].com/107rr61.png](http://i53.[censored].com/107rr61.png)[/IMG]

now its ur wish to write ur name in any way (in any font or size or colour as u want)

i will demonstrate u this :)

now my suggestion is that suppose u want to write a name..like my name is Naman

i will only write "N" firstly in some starting frames ,then "A" ,then "M" then "a" and then finally "N"

this will give u an animated signature which will look awesome

now u should already know that these all things like that "N" on the screen and all other images are called objects in any animating software
so

u can select any object and rearrange it as per ur wish

now just right click on that "N" or any letter and select "duplicate object" or just press CTRL +C and paste it in some next frames following the 1st frame

i hope u r understanding the basics i am trying to explain u

[IMG][http://i55.\[censored\].com/hrlye9.png](http://i55.[censored].com/hrlye9.png)[/IMG]

the most important thing behind gfx stuffs is ur creativity ..

so its upto u .how u want ur sig to look..

when u have copied ur first digit to some frames then u can write the next digit and u may continue upto the last digit

the best part is the "neon"

i.e a kind of background colour of the "txt"

select ur digit like "N" in my case right click =>go to txt => and then finally to Neon

[IMG][http://i54.\[censored\].com/25jv4ld.png](http://i54.[censored].com/25jv4ld.png)[/IMG]

a window will come up in the front..

here is an example of how u can put neon in ur txt

NOW here is my favourite part i.e adding banner txt

press" Ctrl + alt +B" on ur keyboard

banner txt is the moving txt which looks very cool at the end of ur signature

[IMG]http://i51.[censored].com/v7b060.png[/IMG]

write anything in ur "banner txt" wat u want

and u can select various styles from "effect menu " and u can also add neon to it like this

NOW UR SIG Is ready u can save it in different formats here....is an example on how ur sig will look

[IMG]http://i52.[censored].com/33ygdv7.gif[/IMG]

The secret behind successful sig making is practise..keep on practising....and u will become perfect in it :)

i hope u liked this thread ? it took me hours to write this

i could have explained it much nicely bt its sad that only 10 images are allowed (LOL i couldnt even use smileys :P :P)

pls leave comments it will only take few seconds :)

and if anyone is interested in seeing my creations then PM me :)I will be back with many more tutorials like this

ONE more thing = if any one wants more animated clips like those i shared here..then PM me .. i will share my thousands of clips with u :) :)

MoonWalker - October 18, 2010, 9:56 am

wow, I was searching for this from years

fucking awesome share man.. love u <3

saaurabh616 - October 19, 2010, 11:27 am

Thanks yaar really a very nice tut...coool man

Ridik - November 16, 2010, 11:52 pm

Thanks for the tut mate,btw can you please reupload the images.

Haki - November 17, 2010, 10:02 am

Please reupload the pics! :]

eXperienc3 - November 18, 2010, 2:38 am

yaa i will reupload the images whenever i will get time

as i would have to make the screenshots again :P becoz i dont have it stored
