Thread: [Free VPS Guide \[No Shitcash\]](#)

St?alth - October 19, 2010, 11:45 am

Regardless of whether this has been posted already, I'm releasing it anyway. I acquired this guide a while back from a friend off of Sythe. It includes how to set up Runescape bots (NeXus Client). Enjoy, and feel free to spread the word (Send/post this around).

Download Link: [MediaFire](#)

Troubleshoot: For some reason it saved with the .wps file extension, to fix this just locate the file, right click, open with, and then select Microsoft Office Word, or whatever Word is named on your computer.

I suggest using [RealVNC\[/b\]](#) if you're not already; hopefully that should solve your problems.

So you log into Elastic Hosts, find the IP & password, enter them both in on the VNC and click connect...

You're using VNC viewer, right? Not VNC server, or whatever the other one is. Because when you download RealVNC it downloads 2 different VNC's.

It's telling me "Please top up your balance, which is currently negative" =(

Edit: I made a new account and am installing the OS right now.

Edit2: They charged me again while in middle of installation.

Start time	End time	Description	Value	Tax	Total
2010-10-20 23:55:35	2010-10-21 00:55:35	1 hours of burst virtual server use at rate of 0.080 from			
2010-10-20 23:55:35	until 2010-10-21 00:55:35	£-0.08	n/a	n/a	

Looks like this is not functional =(

St?alth - October 25, 2010, 4:13 am

Bumped this for you guys. :3

Knetik, it only charges you if you fiddle around with the RAM and shit, you can only have 1024MB of RAM no higher.

The phone number part is very confusing ... like who has a 13 digit phone number? I have a 3 digit area code and a 7 digit number ... wtf?

tklein42 - October 25, 2010, 9:34 pm

THIS looks interesting... Thanks for all your efforts

St?alth - October 26, 2010, 3:22 am

Oh it's UK only. So you'd need someone with a UK phone number, that's why it's 11 digits. It'd look something like this: +447948857493 (Not a real number)
