Thread: [Scammed by EctoPlasm](#)

power2b - October 19, 2010, 3:00 pm

Hello,

I am new here since i need to complain about a member who fully scammed me. Two days ago i messaged him if he needs any designs (since im a designer) and he said yes he needs 5 sigs for this forum.

After he told me that i started to work on his sigs. It didn't took me long and i finished the sigs and sent to him. He was really impressed about my work. The problem is this: He promised me he will pay after i finish the work. But guess? After i sent him the sigs he went offline (aka blocked me) and i didn't get paid.

His username is EctoPlasm

Profile: <https://hackforums.net/member.php?action=profile&uid=416897>

This is one of five sigs he is using at the moment:

[img]http://i52.[censored].com/11s0cok.png[/img]

I hope the forum staff will do anything about this! Since i'm really angry! The point is he blocked me he could even tell i don't have money and i would see what i could do.

Thank you for understanding me!

This is your first post in ANY section.

Unless you had him on MSN or another instant messaging program there is no way he scammed you.

You're a dumbass ass. Where's the other four signatures? Proof you made the signatures? Why do you have no posts? Why did you post this in the lounge?

Nice scam report.

Problems with this is;

1. You have no posts.
2. You have no proof you made that signature.
3. You joined today.
4. You have been online for 30 minutes.

As it says "Two days ago i messaged him if he needs any designs" You made your account today, You suck at lying.

Well there's a messenger on here isn't there? But I don't know mann, see if you can find them or if he is using them somehow. But also try and sell it as a purchasable download package. Then you'll get your money for sure, if they want to see the product first, (and if you are as honest as you claim your work, and intent to be), say simply but politely "No." . But make sure you tell them that beforehand. That way after the sale you can negotiate on fixes or returns etc. Like I said, State that in your Policy and Customer Satisfaction. Try not to trust anyone on the net unless you know them in person or can back it up by a hard copy.

MSGPlus is supposed to be MSN, and MSN uses XML if I'm not mistaken, so you can just edit them then take screenshots later, and then TV without any problems. And editing a pre-made PSD can be really easy, I could easily just dl the font you had then put my name in the same style you did, now it's mine.
