Not too bad at all mate.

My favorite would have to be the Ipod Icons, along with the Puma ones.

If you want to hate then get out, all i did was pick ones that to me were USEFULL because most icon packs with thousands of icons are just filled with useless icons.

i could easily get on icon changer let it search my whole computer for icons and post over 15,000 icons, but more then 3/4 of them would be absolutely useless. Kind of like you for coming in my thread and having nothing positive to say, so please, if you want to hate dont even bother posting.
