Thread: [Why you shouldn't scan with virustotal.com \[MUST READ\]](#)

???c? - October 23, 2010, 4:38 pm

So simply I saw a lots of threats of new crypters made by our members in wich some freaking n00bs downloaded the crypter and scanned the files on <http://www.virustotal.com/> ... and then they got flamed coz they just made the crypter detected or fully detected. So I am gonna explain it to you all why NOT to scan with <http://www.virustotal.com/>

emm I am gonna make this quick and simply so you can understand it.

If you scan everything with virustotal, your lovely server or crypter will get detected in like 100/1 time faster than normaly scanned with novirusthanks.

If you scan everything with novirusthanks, your lovely server or crypter will stay FUD for a longer time.

So to all of you wich didn't know, put ur brain back in ur head and turn it on AND USE <http://vscan.novirusthanks.org/> BTW make sure you have enabled "Do not disturbe"

THANKS

poild - October 23, 2010, 4:43 pm

It's more of like a, "No shit, Sherlock" message.. Yet people do it.

-mothered- - October 23, 2010, 4:48 pm

Nice guide, but to be honest and In my opinion, I don't trust any online virus scan engines.

Who knows what happens behind closed doors.

GoldenPhe0nix - October 23, 2010, 4:50 pm

Also you should check the 'do not distribute' checkbox before making a scan at novirusthankyou Otherwise your file will be sent to antivirus labs for analysis and it would soon be Fully Detectable.

GetScraped - October 23, 2010, 4:56 pm

We all know this, Jesus Christ.

???c? - October 23, 2010, 5:26 pm

Zoobiker - October 23, 2010, 5:57 pm

This should be stickied?

???c? - October 24, 2010, 5:23 am

DELETE THIS MESSAGE PLEASE

Diamond Supply Company - October 31, 2010, 4:34 pm

pEdObEaR_ Knows what he's talking about, taught me EVERYTHING.

:D - October 31, 2010, 4:39 pm

I think people scan the actual crypter with VT (rather than the stub). IMO, they should do this because there are more virus scanners on there.

iBRSteven - October 31, 2010, 4:45 pm

How did you determine 100/1?

Sudo - October 31, 2010, 5:04 pm

This is true. Novirusthanks is much better.

???c? - October 31, 2010, 6:57 pm

(Oct 31, 2010 04:45 PM)iBRSteven Wrote: [\[CITE\]](#) How did you determine 100/1?

I didn't but how should we put that in their heads? I mean about the scanning at vt and detecting the crypters / servers

hacc - October 31, 2010, 7:49 pm

(Oct 31, 2010 04:39 PM):D Wrote: [\[CITE\]](#) I think people scan the actual crypter with VT (rather than the stub). IMO, they should do this because there are more virus scanners on there.

I do think most people use VT for scanning programs that might be infected (which I do).

It's a better idea because the VT scanner is better, plus I like the fact that if it is infected, the asshole who backdoored it won't have it for long.

Agreed. I just use it to scan stuff to check if it's infected.

ra1d - November 16, 2010, 6:01 am

Thanks for this dude! :D didn't know that ...

flAmingw0rm - November 16, 2010, 7:31 am

You should update your guide, NoVirusThanks changed their link for the scanner.

It's <http://vscan.novirusthanks.org/> now.

atum - November 16, 2010, 7:44 am

I don't use virustotal, but thanks for the info :) (Y)

Yeppp, me being new to this ish, although whatever i do i do wrong, can do this right

imgrafiickz - November 16, 2010, 3:25 pm

thanks now i no whats a other site

null_trace18 - November 17, 2010, 2:02 am

And yet, even after this thread is read, people will cease to remember it and upload to virustotal, or this thread will never get out enough to be read by all the n00bs who don't know how to use the search function and what not. ? Why o why does this world have to be so cruel? lol

???c? - November 17, 2010, 2:59 am

Haha they will do that yeah :P Fml

?Petrovski - November 24, 2010, 8:39 pm

helpful thanks man i use scan4you.net tho

? ?? ????? - November 24, 2010, 8:53 pm

and do you turn off your installed AV auto report? i dont know other AV, but in Kaspersky u have to untick at Setting > Option > Feedback untick the "I agree to participate in Kaspersky Security Network".

???c? - November 25, 2010, 4:31 am

Yea untick that for sure, and disable your anti virus while mixing with servers.

msuper28 - November 25, 2010, 5:09 am

the best method is don't use any online web scanner, just download a good multi av scanner from hh or other sites and scan by your self like i do, also you won't get fake-positive av scans and your stub will remain fud for at least 1 month and longer anyway thanks for useful information :)

???c? - November 25, 2010, 5:17 am

(Nov 25, 2010 06:09 AM)msuper28 Wrote: [\[CITE\]](#) the best method is don't use any online web scanner, just download a good multi av scanner from hh or other sites and scan by your self like i do, also you won't get fake-positive av scans and your stub will remain fud for at least 1 month and longer anyway thanks for useful information :)

Acutally I've user this scanner for months and my crypter was FUD for 3 months, wich is great for a cracked crypter with an custom made stub :D

gigearo - November 25, 2010, 6:46 am

That is sayd ocer 9000 times and still some noobies scan their files w/o "do not sen disturb" box ticked.

Z?us - November 27, 2010, 11:02 pm

They still distribute, I tested it myself. My file didn't last that long once I started scanning it. I suggest you use scan4you, better yet don't scan.

???c? - November 28, 2010, 6:23 am

(Nov 28, 2010 12:02 AM)Zeus Wrote: [\[CITE\]](#) They still distribute, I tested it myself. My file didn't last that long once I started scanning it. I suggest you use scan4you, better yet don't scan.

Hmm I didn't have that problem, I've used this scanner for a long time and my stub lasted for 3 months, wich is good for a cracked crypter with a custom stub :D

hxkd - November 28, 2010, 6:27 am

novirusthanks is safe, I have done many experiments and I have even posted a thread. scan4you more than likely posted this rumour around to scare people so they use scan4you so they make money.

hxkd

troy_2007h - December 17, 2010, 11:30 am

thnx i hope all use novirusthanks when scan

Bloods - February 9, 2011, 3:05 pm

i scan on virus total if people bull shit with me... not my files only others like on yt and sht so fast to detect only do it on yt tho one day i scanned the file 0/43 next day 10/43 good game.. dont do with any file from hf tho :)

chango77747 - March 23, 2011, 1:45 pm

Nice! Thank you for the post. I hope these work

tixcane - May 30, 2011, 11:51 pm

i dont get it why virustotal detects

T-rom - May 30, 2011, 11:57 pm

Thanks for this post :]

Pedobear helps again !!

last time it was giving kids free candy...

Diamond Supply Company - June 18, 2011, 4:10 pm

needs recognition. so il bring this back

MaGiK - June 18, 2011, 7:09 pm

THANK YOU FOR EXPLAINING THIS ? Finally, If some people actually read this you won't have to be coding a knew one the day after you release another.

?us?ness - July 14, 2011, 9:03 pm

Old thread or not this is very helpful. I have it posted on my sales thread so skiddies dont use

?Ñâzg?l - July 14, 2011, 10:01 pm

I don't scan my files

because I heard rumors that novirusthanks distributes (for a price)

But its just my opinion....?

#YOLOSWAG - July 18, 2011, 10:31 am

Thanks for sharing, should be a sticky, everything would get so much easier

Mertens - July 18, 2011, 11:19 am

ohh thanks

i just scanned my keylogger with that virustotal site

i will use novirusthanks from now on

M0nster™ - July 18, 2011, 3:42 pm

I have always used novirusthanks, more people should read why NOT to scan on virustotal. Private scanners are by far the best in my opinion :)

jasperav - July 18, 2011, 4:12 pm

this isnt a guide

you just say dont upload to there BUT WHY?

because virustotal.com SENDS YOUR SERVER TO av companies

you should add that, at least, you explained something then.

trbman - July 28, 2011, 10:04 am

how long does novirusthanks usually take to scan? I uploaded a 658KB server and its taking well over 5 minutes. i imagined it would take like 30 seconds. its still not even done yet

iTzAs1anAiD4n - July 29, 2011, 9:44 pm

i said to someone that they souldnt scan on virus total cuz VT sends the results if infected to AV companies and some asshole gave me a negative rep

Circle™ - July 29, 2011, 11:04 pm

Thank you. People need to stop ruining our hard work.

B470N6 - July 29, 2011, 11:52 pm

novirusthanks scanner doesn't seem working fine with me now, it is stuck at scanning!! who has the same problem?

Ømen Xiii - July 29, 2011, 11:59 pm

Wow bro, great information here, thanks for sharing! :D

1zacster - July 30, 2011, 12:11 pm

Thank you I was unaware of this

Glitched - August 7, 2011, 3:24 pm

Hopefully noobs all read this thread.

PURE_Rare - August 7, 2011, 4:37 pm

Goog job on this thread. Hopefully the leechers will take this on board.

Salad Fingers - August 7, 2011, 10:18 pm

Thanks for this, I am sure it will help a lot of people out.
