Thread: [?\[Tool\] iEnabler - Enable function disabled by an infection on your computer! \[FREE\]?](#)

0dayleet - October 24, 2010, 12:21 pm

Hello so today I'm releasing my new tool named "iEnabler".

Basically what it does is it will enable some settings that are disabled by a virus on your computer.

It can enable:Run

Task Manager

Control Panel

Folder settings

Right click

Command Prompt

Features:Process killer

File deleter

Restart, shutdown, log off etc.

Screen shot:

[img]http://img683.imageshack.us/img683/8803/ienabler1.png[/img][img]http://img835.imageshack.us/img835/1438/ienabler2.png[/img][img]http://img193.imageshack.us/img193/7763/ienabler3.png[/img][img]http://img213.imageshack.us/img213/9071/ienabler4.png[/img][img]http://img697.imageshack.us/img697/9877/ienabler5.png[/img]

Download link:

<http://www.mediafire.com/?tu6le302fwwol8>

Password of the file: by_julie_of_hackforums

WARNING:

Remember to run the program as administrator if you are using Windows 7 / Vista else the application won't be able to enable the settings.

How to:

Right click on iEnabler.exe then click on "Run as Administrator".

Very good job.
Could you post a virus scan? :)

Silver - October 24, 2010, 3:33 pm

Looks like a neat little tool, Julie! I like the little "music" feature you added. ?

How long did it take you to make this?

Edit: The only thing that seems iffy about it, is that it can kill processes that malware commonly hides under. Ex. Malware hides under svchost, you would put svchost in the box, and it would kill the legitimate process. Maybe add to kill the location of a file?

Charmz - October 24, 2010, 3:36 pm

Tested it, and its magical. Good work. :D

Odayleet - October 24, 2010, 3:39 pm

@~Charmz~: Thanks :)

No virus thanks scan added.

I worked on that program about 15 hours.

Yes! I'll add this function :)

Thanks

Spreads Like Herpes - October 25, 2010, 3:42 pm

Lol, I was at her place when she made it :D

She put alot of effort into it, deserves your downloads !

L3g1tWa5te - October 25, 2010, 5:01 pm

Great job, very useful. Coded in Visual Basic Ey?

versx - October 26, 2010, 12:37 pm

Awesome job, so it's pretty much a cure for your PC, nice release Julie

zouzous34 - October 26, 2010, 2:25 pm

really nice ! thanks Julie !! :) I download this but in my PC that's not the right click button who is desactivated but the left ?

Yes I coded the program in Visual Basic 2008 :)

Thanks!

Frankstare - October 27, 2010, 9:30 pm

Lovely program, but could you please put what this program is compatible with?

Braco Asshole - October 28, 2010, 11:20 am

Julie, not to be rude or anything but I could cook something up just like that in about 10-15 minutes tops.

L3g1tWa5te - October 29, 2010, 8:08 pm

Ok, problem. Look at screenshot :\

Access is Denied?... Julie we've got a flaw!

--**([S7N-])**-- - October 30, 2010, 1:53 am

Looks cool. Thanks for sharing! ? EDIT What is this coded in?

AsSaSs@iN - October 30, 2010, 1:54 am

Very nice good job! ?

0dayleet - October 30, 2010, 5:10 pm

@ AsSaSs@iN Thanks :)

(Oct 30, 2010 01:53 AM)--([S7N-])-- Wrote: [\[CITE\]](#) Looks cool. Thanks for sharing! ? EDIT What is this coded in?

It's coded in Visual Basic .NET

Sp1d3rm4n - February 27, 2013, 3:59 am

Old thread, sorry but I found a link to it in a much more recent post. The mf link says "Invalid or deleted file" is this still available somewhere? Thanks.
