Information about it:

So here is a lot of help for you!

If you want to stop hackers from invading your network, first you've got to invade their minds.

Computers around the world are systematically being victimized by rampant hacking. This hacking is not only widespread, but is being executed so flawlessly that the attackers compromise a system, steal everything of value and completely erase their tracks within 20 minutes.

The goal of the ethical hacker is to help the organization take preemptive measures against malicious attacks by attacking the system himself; all the while staying within legal limits. This philosophy stems from the proven practice of trying to catch a thief, by thinking like a thief. As technology advances and organization depend on technology increasingly, information assets have evolved into critical components of survival.

The definition of an Ethical Hacker is very similar to a Penetration Tester. The Ethical Hacker is an individual who is usually employed with the organization and who can be trusted to undertake an attempt to penetrate networks and/or computer systems using the same methods as a Hacker. Hacking is a felony in the United States and most other countries. When it is done by request and under a contract between an Ethical Hacker and an organization, it is legal. The most important point is that an Ethical Hacker has authorization to probe the target.

The CEH Program certifies individuals in the specific network security discipline of Ethical Hacking from a vendor-neutral perspective. The Certified Ethical Hacker certification will fortify the application knowledge of security officers, auditors, security professionals, site administrators, and anyone who is concerned about the integrity of the network infrastructure. A Certified Ethical Hacker is a skilled professional who understands and knows how to look for the weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a malicious hacker.

WARNING: Students are warned against attending CEH training at unauthorized training centers. Only those who attend CEH training at EC-Council ATCs are eligible for CEH certification. Also you will be required to show proof of official CEH training attendance when you apply for EC-Council's LPT certification and Master of Security Science (MSS) degree program.

Try this for the password:

Code [www.updatesofts.com](http://www.updatesofts.com)

**50GTB** - October 31, 2010, 5:55 am

No worries there is no password he is just trying to be a noob

Your welcome guys

**Nyk0n** - October 31, 2010, 7:36 am

Sir, there was more that one person that saw there was a password, although they may have taken the easy way out and used the torrent. There was a password for that. I found it easier to use a torrent where you can rely on other downloaders and not just your own download speed when using the other method.

**ChaufferR** - October 31, 2010, 7:53 am

Wow, very good collection, I'll read that, if I have time.

**50GTB** - October 31, 2010, 8:13 am

Hey Bro I have Downloaded the First DVD. I opened all of the archives with winrar 3.80 on windows. It all loaded without any of the errors but when I tried to extract the archive then I got the following error

Quote:CEHv6LabsVol1-abu137-.part02.rar: CRC failed in the encrypted file  
CEHv6LabsVol1-abu137-.iso (wrong password ?)

I tried it with 7-zip also but got the same error like wrong password.  
And one more thing

Is it a copy or different file for the parts of archive

Quote:<http://#.com/files/353183363/CEHv6LabsVol1-abu137-.part07.rar>  
<http://#.com/files/353193028/CEHv6LabsVol1-abu137-.part07.rar>

I downloaded the first file is it mandatory to download the second file.  
Through which system you created the archive and I should use it for extracting.

Thanks in advance.

**SIM-111414** - November 28, 2010, 11:29 am

Hey bro I have overcome the problem of Corrupted archives.

The problem was occurred due to choosing wrong leecher. I choose a leecher site which I found later that it was corrupting the files. I downloaded the corrupted files again from another leecher and I am having no errors now.

The tools are awesome. Actually I was having some of the PDF from this archives already.  
???

Anyway thanks.

Keep the good work going on.
