dude good to see your still using your sig..
and nope i want to help everyone but i cant help anyone if im not sure on what to help them with..
its like giving my cat photoshop cs5 and telling him to make me a pro GFX :) ?
TROLOLOLOLOLOLOLOL

but i will only help people who pm me specifying what they REALLY want instead of being noobs
and expecting me to come up with some epic signature... then i choose something like anime and
they say I DONT LIKE ANIME!!
and it is annoying.. so now im only going to make sigs for people who be a bit more specific and pm
me.. or ill only make them for ub3r/l33t cuz i know they will be a bit more experienced with
hackforums because they have bought and upgrade and therefor they would spend more time on it
than newbies with 2 posts however IF a newbie with 2 posts can be specific and tell me what they
ACTUALLY want i will do it for them..

Happy to help,
JackedYourComputer
