Personally, I don't like the look of it, Maybe its because im a Windows user? I really don't know.

I'm kind of wondering why there're so many windows users in this section lol. I use windows 7, Mac OSX 10.6.4, Gentoo, and Fedora 13, with Fedora 14 alpha on a vm. But these seem to be just windows users... well I suppose if they're here to learn...
