Thread: [Free Signature Shop For UB3R/L33T -Jackedyourcomputer-](#)

2768 - October 26, 2010, 8:53 am

Hello,

Im making signatures for UB3R/L33T

Im doing this because usually people without UB3R/L33T are new and just ask for sigs and dont give detail such as:

Font

Text

Size ect.

And this means i cant use the full extent of my skill...

So here are the rules before you request for a signature:

TEXT:

Please supply what text you want in your signature.

RENDER:

If you want a render i would prefer you got it off

<http://planetrenders.net/>

THEEME:

Your decision but this must be stated because otherwise i wont know what to do with a piece of transparent checkerboard ...

Theemes can be any that you want...

Some examples are:

Gaming

Anime

Professional.

SIZE:

If You do not state a size i will pick one for you..

which will be within the hackforums size boundry.

Okay thats about it...

But if you would like to add any additional details you're free to.

Always happy to help,

JackedYourComputer ?

????

EDIT:

You asked for examples of my work... i've only done one signature so far because only one person has requested...

This is an example of my work...
