Learn to request a signature properly

Flashy. - October 27, 2010, 6:15 pm

i personally dont like your work , looks all the same, but ill request a sig as i dont really have ideas on mine soo...

Text: Flashy.

Render: clean render, such as abstract.

background: transparent; or same color as HF's color background.

additional ideas: maybe the flash symbol some were on there?.

, i cant find any good idea to put in my sig

D3r1v4t1v3 - *October 28, 2010, 9:19 am*

The text would be my username: TheNeuroticNinja. I would like the render to be of Kristen Bell, especially one of her when playing her role in Veronica Mars. Please manipulate the image and add in some other graphics to sprouse it up a bit, make it in to a skater kind of theme, possibly a punk-ish one, there are fairly similar. My favorite colour is purple: mainly dark purple, it can't be too light if you need that for anything and please make the text fairly bold and readable. Thank you so much. If you can fulfill those specifications a +3 is coming your way my friend.

Khas - *November 25, 2010, 11:31 am*

You make very good sigs :D

Render:

http://planetrenders.net/renders/displayimage.php?album=search&cat=0&pid=55168#top_display_media

Size : 420, 120(or w/e size u can do) (Pixels)

Theme : Gaming(black ops)

Text : 'Khas'

Font : Defused(if u have it)

More details(extra, U dont need to consider if you got a good idea already) : possibly blackich, gangsterish type stuff
