Thread: [\[VB.NET\] Code Your Own Reverse Connection RAT \(All Parts\)](#)

xSilent - October 27, 2010, 7:28 pm

Part 1 (Connection Class)

<http://www.codemodtutorials.x10.mx/WebTest.html>

or

In the connection class, change it from Sub Main to Sub New. I screwed up on that part.

Part 2 (Base GUI)

<http://www.codemodtutorials.x10.mx/Part%202/Part%202.html>

or

Part 3 (Server Stuff)

<http://www.codemodtutorials.x10.mx/Part%203/Part%203%20Web.html>

or

Note

When you dim the port, set it as 7008, I forgot to do that in the vid.

Part 4 (Sending Commands)

<http://www.codemodtutorials.x10.mx/Part%204/Part%204%20web.html>

or

Part 5 (Coding the Bot)

<http://www.codemodtutorials.x10.mx/Part%205/Part%205%20Web.html>

or

Part 6 (Fixing and Testing)

<http://www.codemodtutorials.x10.mx/Part%206/Part%206%20Web.html>

or

This is the last part, your on your own for now.

Hope I helped some people. ?

If you think this tut is worth 1 minute of your time

<http://fileml.com/2G9OD>

Else

PM for

Wait, if its not worth a minute of your time then why are you downloading the source?

DaRkReD - October 27, 2010, 7:29 pm

Dat rat :D awesome tut series! might wanna remove download or prepare for unforeseen leechin

xSilent - October 27, 2010, 7:31 pm

(Oct 27, 2010 07:29 PM)DaRkReD Wrote: [\[CITE\]](#) Dat rat :D awesome tut series! might wanna remove download or prepare for unforeseen leechin

If the download:comment ratio goes off the chart, then I'm removing it.

xReaperGFX - October 27, 2010, 7:33 pm

Thanks for the Full List of all the videos.. your a awesome coder :)

Thanks for this also (:

DaRkReD - October 27, 2010, 7:36 pm

(Oct 27, 2010 07:31 PM)xSilent Wrote: [\[CITE\]](#) If the download:comment ratio goes off the chart, then I'm removing it.

Good.... Let the hate flow through you

Spoiler [\(Click to View\)](#)

Its the 1st step to the darkside

(Star wars reference, Support your idea of pulling the download if leechers leech)

Deceptive - October 27, 2010, 7:36 pm

Guess I'm going to be one of the few people to say thanks for releasing!

SLAPYA - October 27, 2010, 8:37 pm

great tutorial man...thx a lot. You should do one in C# and if you kinda did explanation as you were coding it then that would be amazing.

Deceptive - October 27, 2010, 8:53 pm

(Oct 27, 2010 08:37 PM)SLAPYA Wrote: [\[CITE\]](#) great tutorial man...thx a lot. You should do one in C# and if you kinda did explanation as you were coding it then that would be amazing. He did do one in C#. It's better than this one.

EDIT: Cool 600th post.

xSilent - October 27, 2010, 9:02 pm

(Oct 27, 2010 08:37 PM)SLAPYA Wrote: [\[CITE\]](#) great tutorial man...thx a lot. You should do one in C# and if you kinda did explanation as you were coding it then that would be amazing. Majority of coders in this section only do VB, but if your a C# coder then you can translate easily.

Tasemu - October 27, 2010, 10:56 pm

This is really interesting. Might be a good idea to password the rar and encrypt it for a little bit of skid protection.

? Lollipop ? - October 27, 2010, 11:21 pm

Thanks :O All parts + flags? Man, I love you.

mundi_86 - October 28, 2010, 12:13 am

?

Hi, BIG thx for the vid Tut.
Now i will try it in VB!

br.

Zenk - October 28, 2010, 12:41 am

Awesome, I'll definitely learn something from it.

Looking at last video =d

SIM-209986 - October 28, 2010, 1:32 am

Thank you a lot for this. I was looking for it. Now I am going to understand. Thanks <3

tang77 - October 28, 2010, 2:44 am

Awesome, coded like a pro :P good job.

Ghostenigma - October 28, 2010, 2:50 am

Thanks for this very usefull...Nice work and quality posting

Modesty - October 28, 2010, 3:22 am

inb4 100 * "GUYS CHECK OUT MY RAT"

prepare for it xSilent. Also, I was wondering why is your buffer 0 for the message size when you are reading of the stream? Wouldn't that mean it wouldn't read anything? :s

I always have had it set to an integer on my client class :s

xSilent - October 28, 2010, 4:46 am

(Oct 28, 2010 03:22 AM)P Y R O Wrote: [\[CITE\]](#) inb4 100 * "GUYS CHECK OUT MY RAT"

I always have had it set to an integer on my client class :s
that's just to get to read line. ?

xSilent - October 28, 2010, 8:54 am

Mediafire link taken down, I didn't spend all that time just for you skids to leech.

tang77 - October 28, 2010, 9:16 am

your connection class help me alot to know how to code a decent reverse connection.

njscorpion - October 28, 2010, 11:23 am

great share buddy! but now i will keep hoping more tuts like this one bro :)

intrigued1980 - October 28, 2010, 2:49 pm

Thank you for the effort and time, this is fantastic! And you code so fast!

SIM-701256 - October 29, 2010, 1:27 am

THANKS! Very nice tutorial!
Just what i was looking for!
Thank you :D

xSilent - October 29, 2010, 3:31 am

Glad some people enjoyed the tut instead of leeching. ?

tang77 - October 29, 2010, 3:34 am

xSilent i got a problem, when i try to pass data to my main form to an another form nothing append
(client send process list -> server receive -> and i can't show the result to another form) ???

Modesty - October 29, 2010, 3:59 am

(Oct 29, 2010 03:34 AM)tang77 Wrote: [\[CITE\]](#) xSilent i got a problem, when i try to pass data to my
main form to an another form nothing append (client send process list -> server receive -> and i
can't show the result to another form) ???

U need to use delegates and invokes.

add this:

```
Code Private Delegate Sub del()  
public sub dostuff()
```

```
'do your cross forms stuff here  
end sub
```

then where you are receiving the command add:

```
Code Me.Invoke(New del(addressof dostuff))  
should work :)
```

tang77 - October 29, 2010, 4:25 am

i'll try this, thank's pyro.

Edit : It's work, delegate solve the problem thank's again ;)

HazXoD3D - October 29, 2010, 6:56 am

I have tried many TCP Connections and none of them have workedd :S

idk know why...

i think it was a year ago then i tried telnet it took days of testing testing and searching on the web to get it running smoothly allways got that the connection never established.

And now im stuck again :(

I have tried:

used 2 computer(1 with the client running, 1 with the server running on) ofcourse on the same network (127.0.0.1)

make my IP static

open port 7008 (the one i used in the client/server)

ofcourse all at the same time

And last im on win7 on all the computers (3 computers)

xSilent - October 29, 2010, 6:59 am

(Oct 29, 2010 06:56 AM)HazXoD3D Wrote: [\[CITE\]](#) I have tried many TCP Connections and none of them have workedd :S

make my IP static

open port 7008 (the one i used in the client/server)

ofcourse all at the same time

And last im on win7 on all the computers (3 computers)

127.0.0.1 is the local address for a computer, not for a network. If you testing like that use your internal address eg 192.168.1.102

H4?0R - October 29, 2010, 7:39 am

Nice tutorial man I was able to understand few things about reverse connection but I won't start coding a rat right now cuz there are still more things for me to know, after all I started coding just 6 or 7 months ago so yeah it's too early to code a rat

btw, in part5 for the file download it doesn't have to be always an "exe" if the user wanted to download a batch file it won't work, so I suggest to retrieve the file name from the url like this:

Code temp = cut(1).Substring(cut(1).LastIndexOf("/") + 1) it will return "file.ext" and you'll be able to download anything! you got it right.

anyway thanks for the contribution buddy, and I hope the other members would appreciate it ?

Uncle Pillow - October 29, 2010, 7:41 am

really nice. will check this out later :)

HazXoD3D - October 29, 2010, 7:47 am

(Oct 29, 2010 06:59 AM)xSilent Wrote: [\[CITE\]](#) 127.0.0.1 is the local address for a computer, not for a network. If you testing like that use your internal address eg 192.168.1.102
still dont work the on i will run the Tcp Client i added instead of "127.0.0.1" -> "192.168.1.34" for my usally computer then i tried run the listener at my laptop and then i started the listener and on then i started the client on my usally used computer...and no result

Entrepreneur - October 29, 2010, 7:51 am

Very detailed thanks for the tutorial.

DragonHunter - October 29, 2010, 7:51 am

nice tutorials but i need to say something about the networking...
why are people always using this in ther rat's if(packet == "MessageBox").. etc
its much faster to use 1 byte to handle 255 packets so u don't need to waste bytes in sending some packet
ur maybe ye woow bigdeal is just 10 wasted bytes who gives a shit, well it can make ur networking faster for sending many/large packets
and playing with some bytes is fun ;3

Reverse18 - October 29, 2010, 3:16 pm

thanks bro just finished it not to long ago

TyRATnt - October 29, 2010, 7:56 pm

This is a great rat you made but i have 1 problem with it i try to test it on my moms computer i download .NET framework 4 on it and what happens is it shows and everything but i don't get anything in the listview does anyone know how to solve this?

?wain - October 29, 2010, 7:59 pm

epic video tutorials thanks man!

versx - October 29, 2010, 11:15 pm

Excellent tutorial xSilent, I will definitely take a look at this in the future. I have bookmarked it until then :D

PlatinumHex - October 29, 2010, 11:19 pm

Thanks for "showing" me how to do it.

xSilent - October 29, 2010, 11:28 pm

I would have commented on everything, but it would have made the video an hour probably.

Its easy to understand when you see it happening.

iQosmo - October 30, 2010, 9:18 pm

TheBlackMarket - October 31, 2010, 9:02 am

Great Tutorial mate, i really like it!

Pulser - October 31, 2010, 9:12 am

Looks very nice Silent. Good luck, and I hope not too many people are leeching.

xSilent - October 31, 2010, 9:19 am

(Oct 31, 2010 09:12 AM)Mr. Predictable Wrote: [\[CITE\]](#) Looks very nice Silent. Good luck, and I hope not too many people are leeching.

[sarcasm]

Oh no, its been pure joy. ?

[/sarcasm]

Some aren't leeching though.

kbhawkman - October 31, 2010, 11:43 am

I get this problem:

[img]http://img179.imageshack.us/img179/2545/53747270.png[/img]

Anyway good tutorial. It does not explain much on what everything is doing but it is still good.

iPoison - October 31, 2010, 11:45 am

(Oct 31, 2010 11:43 AM)kbhawkman Wrote: [\[CITE\]](#) I get this problem:

[img]http://img179.imageshack.us/img179/2545/53747270.png[/img]

Anyway good tutorial. It does not explain much on what everything is doing but it is still good.

"lst" is an abbreviation for list, meaning it could be a listbox or a listview. But then next to it is: "ListViewItem" meaning it HAS to be a ListView object.

From the video(s), you could find that out easily.

kbhawkman - October 31, 2010, 12:03 pm

(Oct 31, 2010 11:45 AM)iPoison Wrote: [\[CITE\]](#) "lst" is an abbreviation for list, meaning it could be a listbox or a listview. But then next to it is: "ListViewItem" meaning it HAS to be a ListView object.

From the video(s), you could find that out easily.

I got it fixed. I had not seen to rename the listview to lstClients.

Does anyone know how I can make the console app hidden so people will not close it?

For some reason when I click listen and the server is running. It keeps adding itself to listview. Making it seem I have 325 connections from the same IP address. how do I fix this?

[img]http://img72.imageshack.us/img72/227/78473520.png[/img]

xSilent - November 2, 2010, 2:59 pm

I guess this tut is finally dead. Hope you guys learned something.

If you didn't understand something, PM me.

xartermate - November 5, 2010, 2:24 pm

could be dead but its a awesome tut!!!

will try comiple this i need it fo shure.

thankx for the tu bro.

fredde_jason - November 5, 2010, 2:59 pm

I saw some people got the problem with multiply same clients joining.

Spoiler ([Click to View](#))

[img]http://img72.imageshack.us/img72/227/78473520.png[/img]

I got a solution for this problem for you! ?

Just add an extra column for the Username/Computername.

In the GotInfo sub where you receive new clients and status updates, use this code:

```
Code Case "CONNECTED"
```

```
Dim AlreadyConnected As Boolean = False
```

```
For Each item As ListViewItem In lstClients.Items
```

```
If item.SubItems(1).Text = client.IpAddress And item.SubItems(3).Text = cut(3) Then 'Checks if the  
client already is connected/in the list. Add this to your bot and it wont add the same client twice
```

```
AlreadyConnected = True
```

```
End If
```

```
If AlreadyConnected = False Then
```

```
Invoke(New AddDelegate(AddressOf AddClient), client, New String() {client.IpAddress, cut(1),  
cut(2), cut(3)})
```

```
Else
```

```
AlreadyConnected = False
```

```
End If
```

xSilent - November 6, 2010, 8:41 am

I got a solution for this problem for you! ?

Just add an extra column for the Username/Computername.

In the GotInfo sub where you receive new clients and status updates, use this code:

```
Code Case "CONNECTED"
```

```
Dim AlreadyConnected As Boolean = False
```

```
For Each item As ListViewItem In lstClients.Items
```

```
If item.SubItems(1).Text = client.IpAddress And item.SubItems(3).Text = cut(3) Then 'Checks if the  
client already is connected/in the list. Add this to your bot and it wont add the same client twice
```

```
AlreadyConnected = True
```

```
End If
```

```
If AlreadyConnected = False Then
```

```
Invoke(New AddDelegate(AddressOf AddClient), client, New String() {client.IpAddress, cut(1),  
cut(2), cut(3)})
```

```
Else
```

```
AlreadyConnected = False
```

```
End If
```

You made that more then it has to be, but its good to see someone using their brain instead of just asking me how to fix it. ?

00niels00 - November 6, 2010, 12:22 pm

(Oct 27, 2010 09:02 PM)xSilent Wrote: [\[CITE\]](#) Majority of coders in this section only do VB, but if your a C# coder then you can translate easily.I've a lot trouble to translate it to C# :S

How to convert this to c#

PHP Code

```
<?php
Sub AddClient(ByVal client As Connection, ByVal strings() As String)
    Dim l As New ListViewItem(strings)
    l.Tag = client
    online += 1
    txtOnline.Text = "Clients Online: " & online
    lstClients.Items.Add(l)
End Sub
```

Tuxx95 - November 7, 2010, 12:02 pm

how did you add the new project? that option doesnt show up when I right click

:: Login :: - November 8, 2010, 12:23 pm

thank's xSilent your a big help.

Tuxx95 - November 8, 2010, 4:22 pm

not to be all skiddy but how do you make this work with real ips and not just 127.0.0.1?

kbhawkman - November 8, 2010, 4:23 pm

(Nov 8, 2010 05:22 PM)tuxx95 Wrote: [\[CITE\]](#) not to be all skiddy but how do you make this work with real ips and not just 127.0.0.1?

Add your DNS so it connect to you. Then run it on victims. If you want an example PM me.

fredde_jason - November 9, 2010, 9:57 am

(Nov 6, 2010 08:41 AM)xSilent Wrote: [\[CITE\]](#) You made that more then it has to be, but its good to see someone using their brain instead of just asking me how to fix it. ?

Could you show me how I can improve it??

BTW, sometimes my clients crashes, even though I use the Try/On Error Resume Next statements. Got any idea for this?

xSilent - November 10, 2010, 5:31 pm

(Nov 9, 2010 10:57 AM)fredde_jason Wrote: [\[CITE\]](#) Could you show me how I can improve it??

BTW, sometimes my clients crashes, even though I use the Try/On Error Resume Next statements. Got any idea for this?

You have to modify a few things to keep it from crashing. That's where knowing how to debug comes in handy.

manulu - November 10, 2010, 10:28 pm

sorry to ask here but what is "Reverse Connection RAT" and what it can be done with this?

Pulser - November 12, 2010, 1:50 pm

(Nov 10, 2010 11:28 PM)manulu Wrote: [\[CITE\]](#) sorry to ask here but what is "Reverse Connection RAT" and what it can be done with this?

Reverse Connection:

The "bot master" or whatever you want to call him runs a client. The client listens on a specified open port. He then distributes a server that when ran, will infect the victims machine.

Client <---- Infected Machines

The client can then send out commands to his victims. UDP, RAT Commands, Whatever.

The French - November 25, 2010, 1:00 am

Awesome tut you have made , very nice

skyn_valdeur - December 15, 2010, 12:21 am

thanks man.. really nice tut.. hope to see more of this later.. though, still lots for me to learn as im just a beginner.. thanks anyway.. do tell me when u have new step by step tut on anything.. im willing to learn new stuff here..

StealthCoder - December 15, 2010, 1:16 am

very nice tut ! im a good coder but not a pro. i ask some help here sometime.

and now i need help with that.

i know NOTHING about socket so i cant really fix this. i get error with this part

```
Sub Read(ByVal ar As IAsyncResult)
Dim Message As String
Try
Dim Reader As New StreamReader(client.GetStream())
Message = Reader.ReadLine()
RaiseEvent GotInfo(Me, Message)
client.GetStream().BeginRead(New Byte() {0},0,0,0 AddressOf Read, nothing)
```

Catch ex As Exception

```
End Try
End Sub
```

and the error say

Erreur 1 Argument non spécifié pour le paramètre 'callback' de 'Public Overrides Function BeginRead(buffer() As Byte, offset As Integer, size As Integer, callback As System.AsyncCallback, state As Object) As System.IAsyncResult'. C:\Users\\AppData\Local\Temporary Projects\Connection.vb 21 13

ok sorry i FAIL lol i forgot a "," loll

StealthCoder - December 15, 2010, 2:57 am

oops... error !

Method 'Public Sub UpdateStatus (client As Connection, Message As String)'does not have a signature compatible with delegate 'Delegate Sub UpdateStatusDelegate (client As Connection) '.

i checked all the code and everything seem to be ok.

any help ?

my complete code

```
Code Imports System.Net.Sockets
Imports System.Net
Imports System.Threading
```

Public Class Form1

Dim listener As TcpListener
Dim listenerThread As Thread
Dim port As Integer

Sub Listen()

listener = New TcpListener(IPAddress.Any, port)

While (True)

Dim c As New Connection(listener.AcceptTcpClient())
AddHandler c.GotInfo, AddressOf GotInfo
AddHandler c.Disconnected, AddressOf Disconnected

End While

End Sub

Sub GotInfo(ByVal client As Connection, ByVal msg As String)

Try

Dim cut() As String = msg.Split("|")

Select Case cut(0)

Case "CONNECTED"

Invoke(New AddDelegate(AddressOf AddClient), client, New String() {client.IPAddress, cut(1), cut(2)})

Case "STATUS"

' Invoke(New UpdateStatusDelegate(AddressOf UpdateStatus), client, cut(1))

Invoke(New UpdateStatusDelegate(AddressOf UpdateStatus), client, cut(1))

End Select

Catch ex As Exception

Console.WriteLine(ex.Message)

End Try

End Sub

Private Sub ListenToolStripMenuItem_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles ListenToolStripMenuItem.Click

listenerThread = New Thread(AddressOf Listen)

End Sub

Private Sub StopToolStripMenuItem_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles StopToolStripMenuItem.Click

listenerThread.Abort()

listener.Stop()

Cleanup()

End Sub

Sub Cleanup()

IstClients.Items.Clear()

End Sub

Delegate Sub AddDelegate(ByVal client As Connection, ByVal strings() As String)

Sub AddClient(ByVal client As Connection, ByVal strings() As String)

```

Dim I As New ListViewItem(strings)
I.Tag = client
IstClients.Items.Add(I)
End Sub

Delegate Sub DisconnectedDelegate(ByVal client As Connection)
Sub Disconnected(ByVal client As Connection)
For Each item As ListViewItem In IstClients.Items
If item.Text = client.IPAddress Then
item.Remove()
Exit For
End If
Next
End Sub

Delegate Sub UpdateStatusDelegate(ByVal client As Connection)
Sub UpdateStatus(ByVal client As Connection, ByVal Message As String)
For Each item As ListViewItem In IstClients.Items
If item.Text = client.IPAddress Then
item.SubItems(2).Text = Message
End If
Next
End Sub

End Class

```

Matt DeVenge - December 15, 2010, 8:03 am

Very nice and understandable tut, Silent ;)

I got one question tho.

I used to code a few rats in pure VB, as it was the first language I "mastered". - I just started Delphi and C++...

Q: How is the client handling Multi Threading?

Using Winsocks in VB doesn't support Multi, and I find it very unstable at times. (other API's available tho)

I'll take a try and run through your code, it seems to be a good base to continue from :)

StealthCoder - December 16, 2010, 10:11 pm

so no one can help me please ?

fredde_jason - December 17, 2010, 1:35 am

(Nov 10, 2010 06:31 PM)xSilent Wrote: [\[CITE\]](#) You have to modify a few things to keep it from crashing. That's where knowing how to debug comes in handy.

Allright, do you know any good tutorial in learning how to debug an application? In my current app I'm developing, threads that I create randomly stops. It also happens more often if it's more than one thread created.

MicroPhsyco™ - December 17, 2010, 3:38 am

i think your tutorial is a not good idea, beceause on developement of a rat people need to make research and understand winsock

you dont rly explain all they shit you code and record, its pretty dangerous beceause a noob can just copy what you do, but they will not understood.

and in coding the most important part is to know what you do....

anyway its good for skilled developer who already know they shit to see wich process you used to make it :)

but for noob im sure soon 15 rats will be sell on market section..

but im also sure you do it to share you knowledge with us so for that, thank you for all that work and i think it took more time than the video :)

im sure if people like you, share just part of code that will force people to understood and its will be better :)

tell me if im wrong :)

vullux - January 2, 2011, 9:23 am

Value of type 'Connection.Form1' cannot be converted to 'System.Data.ConnectionState'

When i do the following code : RaiseEvent gotinfo(Me, message)
and : RaiseEvent Disconnected(Me)

why can't i use 'me'?

Old² - January 2, 2011, 9:24 am

Great tutorial.

I'm going to start coding a RAT using this series as soon as I get done with my booter!

vullux - January 2, 2011, 9:32 am

nvm i think i fixed my error :D

and great tut btw, love it ^^

LittleSpy - January 5, 2011, 7:32 am

I coded everything, and i debugged the server, all works, no errors, but where to find the bot (the file i need to send to the victims) - i coded the module and connection too ?

nathanc3 - January 5, 2011, 7:33 am

awesome release i appreciate

C O D Y™` - January 5, 2011, 8:22 pm

Nice completed the tutorial, but it's not working for me i must of done something wrong.

Solowestside - January 5, 2011, 9:33 pm

Hey man thanks for this....i will look at this later

hio2hio - January 10, 2011, 5:54 am

Nice tutorial! I will definitely take a look at this!

crocki134 - January 13, 2011, 3:54 am

thanks for sharing! i m now trying to download the source because you really deserves the money!!

HAL9000 - January 13, 2011, 9:14 am

Great TUT!

I have a question...

suppose I have 2 clients connected that send the screenshots to the server every 1 sec. How I can show the picture to 2 different forms?

I know I have to use the delegate and invoke but can you please make some example to me please?

Thanks!!!

Heretic Anthem - February 10, 2011, 11:39 pm

really good tut but i cant do shitcash :\ so could you PM me a direct link someone?

woodo - February 28, 2011, 11:18 am

Thanks for your tutorial.

I found a bug: If you stop listening and then start listening your clients won't re-connect.

djeko - March 8, 2011, 3:27 pm

I cant see the first part :(reup pls

netw0rk tr0jan - March 8, 2011, 3:59 pm

THANKS! Very nice tutorial!

tiagothenerd - March 11, 2011, 11:52 am

Could you give me the link?

woodo - March 11, 2011, 12:57 pm

You should make more tutorials how to add more functions such as a file transferring function.

reGi - March 12, 2011, 11:41 am

Very good tutorial! Good base for a RAT :D

gangstalawlz - March 14, 2011, 9:51 pm

Amazing tut im using these videos right now to help me learn more about coding thank you SOO much!

Internap. - March 16, 2011, 10:32 am

thx alot for that nice tutorial will try that hehe ;)

Goldex - April 3, 2011, 5:45 pm

Thank you for the tutorial. This is going to help me a lot in the near future.

Alex1239 - April 3, 2011, 10:30 pm

Nice work.. Bookmarking for later use. great work.

sumit8510 - April 3, 2011, 10:35 pm

It's great tut series bro.

Thanks for it.

You're really awesome coder.

DragQueen - April 3, 2011, 11:15 pm

Nice tet but I prefer to use something that work like dc

Jeimuзу - April 26, 2011, 2:23 am

I really needed this! Thank you so much <3

404™ - April 26, 2011, 7:37 am

great tutorial man...thanks a lot :D

kd5 - June 1, 2011, 12:16 pm

10/10 tut, solved how to use net.socket compared to winsock

1nterFear - June 10, 2011, 7:31 am

Whew! This is very nice!! First I'm going to learn the basics in VB then I'll go straight to this. I'll follow your tut to understand the principle behind RATs. I want to build my own in the future. Thanks dude! Great thread!

wannabenyhm - June 24, 2011, 3:23 pm

Daamn bro, keep that shit up! :D also did 3 surveys from 3 ip's ;-) You're getting the reward, right?

Awesome tut!

chris0147 - June 24, 2011, 5:30 pm

This is interesting. Can you please tell me what is a connection rat does stand for?

Bad_P1zza - June 24, 2011, 9:11 pm

Very nice guide! I love this :D

Too bad the client is visible.

wannabenyhm - June 26, 2011, 4:26 am

As i said before, AWESOME tut! I just wanted to show how i continued the programming.

Spoiler ([Click to View](#))

[IMG]http://i55.[censored].com/vs17hv.png[/IMG]

The name is basically their computer name.

All features is working :D

Now i just need to make it FUD and infect explorer.exe or so, right now, the client is just a application hiding itself as Adobe Updater.

Keep it up! ?

anas88 - June 26, 2011, 5:41 am

Thank you this really interesting TuT

INFA?OUS - June 26, 2011, 6:52 am

Thanks for the great tut. Ima try it out :)

chris0147 - June 26, 2011, 7:08 am

This is interesting. Can you please tell me what is a connection rat does stand for?

Speedy007 - July 4, 2011, 7:13 am

Followed the complete Tutorial by Video.

But when executing my Client, the Control Form just crashes?...

Did i missed something?

netw0rk tr0jan - July 4, 2011, 8:23 am

really nice. will check this out later :)

Support. - September 26, 2011, 6:13 am

Just wanted to say a massive thank you dude. I tried to do your survey even though I don't want the source but I can't do any surveys like that. = (Again, thanks, appreciate it.

adiiforu - September 26, 2011, 6:26 am

(Oct 27, 2010 07:31 PM)xSilent Wrote: [\[CITE\]](#) If the download:comment ratio goes off the chart, then I'm removing it.

I guess its not low.

this is the 11th page of posts

Jolyan - September 26, 2011, 1:46 pm

Thanks for sharing!

Won't use this, but always good for people to learn!

Fishy - September 26, 2011, 2:56 pm

really good tut i used that tutorial a while ago but its still beast;)

SuckerPunch - October 20, 2011, 1:22 pm

Very nice tut!

I am going to look at it for some ideas :D

Turmoil - October 20, 2011, 3:01 pm

Best networking guy on this website xSilent

Melolz - October 21, 2011, 11:16 am

Nice =P me like verry much

keep it up please!

gigajew - November 9, 2011, 10:16 am

<http://www.mediafire.com/?t8l12xqbsrbc94>

I'm simply informing you/others that it's leaked/leeches (whatever it's called)

MOD3M - November 14, 2011, 11:25 am

Amazing work! I have not watched everything yet, but I assure you I will. I will also download your file. Thank you for taking the time to write this. One green apple for you. :D

Uhm, there are not any videos? Is there anyway you could up-load them to another account?

Bewiz - November 16, 2011, 1:28 pm

i tested it and test the rat thanks

Plutiom - November 27, 2011, 6:00 am

The account has been terminated. Is it possible that the videos will be re-uploaded?

Call Me Maybe - November 27, 2011, 7:33 am

update the vids please
qwertyuiopasdfghjkl

namefag - November 27, 2011, 7:47 am

dude, you are fucking awesome

to-osh-ort is a rapper

since i love u so much, ill even give you 5 extra conversions on your sharecash
you'll see :)

Cyrius42 - November 27, 2011, 11:21 am

Thanks man, it's a great idea and it's actually quite simple to make :3

dutchwii - December 6, 2011, 10:02 am

site did gone movies removed? where else can i get this?

Pierx - November 10, 2013, 9:46 am

I need these tutorials :(
can you re upload?

iMalware - November 10, 2013, 10:26 am

He took the downloads down because of leechers don't even bother asking this post is posted in
2010
