[100% FUD] iRtehCrypter - The New Revolution in : Crypting, Binding & Downloading [100% FUD]

[Click here to view all of iRtehCrypter's Vouches](#)

[img]http://img7.hostingpics.net/pics/620063features.png[/img]

Please be advised that this software was coded in the intent that the end user does not use this to preform any illegal act or act that is not LEGAL under any laws in any country.

This program is not intended for malicious use, but for testing and maintaining security. In purchasing this software you agree neither the authors nor affiliates shall be held accountable for damages that may occur as a result of this program. There will be no refunds for this item, except in the event the customer has viable proof of it's incompatibility on their system and the request is made within 2 weeks of the initial purchase. Proof of purchase will be required. We reserve the right to discontinue your service at our discretion without prior notice.

Please be aware that the Software will be locked to the computer you activate it on. Sharing of this software will result in license termination. Users suspected of breaking this rule, or attempting to hack the client or server in any fashion will be met with immediate account termination. Terminated accounts are illegible for refunds. I have the right to hold your funds for as long as I feel is necessary before you receive your product. Only scan on scan4you.net (if you don't have an account I will scan for you). No crypting services - if caught, license termination for you.

Are you also interested in iRtehStealer? [Click here](#) to view its thread, or see below for combo-deals!

[?] Unlike other crypters, your output file will not be much bigger then the actual file itself

[?] Built in Scan4You.net Scanner (Non-distributing 33 Anti Virus scanner - all updated Databases)

!NEW

[?] Dynamic Method Signatures

[?] Built in USG - Random Junk Code engine in place to randomize all data (USG System)

[?] Building Engine:Dynamic Method Signatures

Optimized Naming (Classes, Variables, Methods, Etc..) using an extended character set for short names and highly unique output.

Length Randomization, I wouldn't necessarily call this a feature but absolutely everything is randomized whether it be names, parameter count, generated values, or junk code.

14 Data Types (Boolean, Byte, SByte, Etc..) which are fully utilized in every aspect of the engine. Whether that be in dynamic signatures or junk code the output will know exactly how to call and

handle each type.

[?] Code Generation (Junk Code):Classes

Methods (Function and Sub Routines, including API & Delegates)

API Declarations use over 78 true Windows libraries.

Declarations

Loops

Conditional Statements

[?] Add to Startup Option in the crypter, with Install and Uninstall option, 3 custom boot methods, and a custom copy location

[?] Private 32bit & 64bit RunPE Method's

[?] x86/x64 Native and Managed (Working on 32 & 64 bit 100%, on managed and native executables.)

[?] Perfect error logger (if you get an error, its easy to be fixed) ([<click>](#))

[?] 5 Encryption AlgorithmsAES

DES

RC2

TDEA

XOR

[?] Delayed Execution (5 Seconds - 24 Hours - After running your file, it can wait 5 seconds - 24 hours until it injects whatever you crypted)

[?] Auto Updater to get ALL the latest updates INSTANTLY when launching the program

[?] Full EOF Conservation and Support

[?] Executable Melting (Inject your crypted file and run, once its successfully injected, the original executable is deleted)

[?] Single Instance (Prevent the output crypted file to be ran more then once - only one instance)

[?] Prevent Decompilation (Used to prevent managed executables from being reflected)

[?] Multi-Threaded Dialog (Fake message box, "OK" doesn't need to be pressed for the injection to take place)

[?] 19 File Drop Locations

[?] Binder: Create, Shell, Native, Managed Execution Flags

[?] Downloader: Create, Shell, Native, Managed, Connect Execution Flags

(Create: Creates your file in specified directory)

(Shell: Run's your file without any injection or RunPE)

(Native: Runs your native file in memory) - 100% Runtime FUD

(Managed: Runs your managed file in memory) - 100% Runtime FUD

(Connect: Connects your link - for use with things like ad.lfy - Link Viewer)

[?] Unlimited File Binder and Downloader (Bind every file type together, download any and all filetypes!)

[?] Binder accepts every filetype (.MP3, .PNG, .JPG, .AVI, .PDF, .DOC + More!)

[?] Filename Preservation

[?] Icon Changer

[?] Assembly Editor

[?] Built-In Obfuscator

[?] Compile .exe, .scr, .com, .cmd, or .bat (Output file can be compiled to any of the extensions)

[?] Simple, Clean & SEXY Interface

[?] Dynamic API's

[?] String Encryption

[?] Private Storage Methods (Managed Resource, Native Resource, String Variable, Numeric Variable - All storage methods vary in size and are very private, not being used in many other crypters today unlike other crypters using the same old easy to detect methods)

[?] Output compiled on the fly, making output extremely unique (no stubs needed - longer lasting FUD results)

[?] Compatible with all Windows Systems (Windows 2000, Windows Server 2003, Windows XP, Windows Vista, Windows 7)

[?] Advanced Licensing System

Tested and Working on:Null Bot

Dark Comet

BF Bot

CyberGate ([<Vouch>](#))

SpyNET

DDoSeR ([<Vouch>](#))

BlackShades ([<Vouch>](#) - [<Video>](#))

Cerberus RAT

PI RAT (Poison Ivy)

Metus

iStealer

iRtehStealer

+ Many other popular detected Tools! (Feel free to ask me if I will test your tool before purchase, I have no problem doing so!)

There are a few ways you can contact me:

1. PM me here on HackForums ([Click Here](#))

2. Add my MSN: admin@irtlsoftware.net (Beware of imposter's, verify via PM before purchase)

3. Visit my forums, register, and PM me there (<http://www.irtlsoftware.net/forums> - My username there is also iRtehLeet™)

[Clickhttp://zowin.com/images/blackreign/toplinks/subscribe.gif[/img]Me] Don't forget to Visit my Site!

So you may be wondering, why iRtehCrypter is your best choice for a crypter on HF?

- iRtehLeet's very successful background in selling iRtehStealer
- iRtLSoftware's success
- The lifespan of iRtehStealer, (12 months so far) only proves how long iRtehCrypter will last
- Great support from the team
- Simple GUI (Interface)
- No stub usage - FUD lasts way longer
- Unique and Private Methods
- Dynamic Signatures on each Compile

(Oct 28, 2010 10:57 PM)panzer Wrote: [\[CITE\]](#) iRtehleet is the best. i think the best coder on HD. ive never seen such a good crypter at all. but the best thing is the support.

i can give you some examples:

- 1: he answered all my question very polite and detailed.
- 2: he checked my blackshades and crypter settings via teamviewer
- 3: he provided me a scan4you check of my crypted file !
- 4: and the best at the end: he gave me some test installs for checking my crypted file ;)

i repeat ive never seen this here before :) Thumbs up Bro !! (Nov 2, 2010 11:45 AM)Karpaltunnel Wrote: [\[CITE\]](#) Ok Irteh as promised here is my vouch.

And i am not vouching because u are a nice guy; no; i am vouching because this Product is awesome (of course u are also nice :-p).

First of all i have bought the Stealer package.
for 75 \$. The best Deal i ever made.

Lets Come to the Stealer.

The Stealer was set up in 1! Minute. Very easy to use; very easy gui.

I tested the Gmail notification and installed it on my Vics.

And baam after 2 Minutes i got 600 Mails... lol; now the only Problem is; i must read them all :-p :-p

The Stealer will get a 10/10

Now the Crypter.

The best Thing is the Support Forum; many howto and Tutorials. (some help is also included in the Crypter)

My advice: read them; because the Navigation in the crypter is well a bit alternative ^^.

The Payment and Registration was done in a blink of an eye.

He is a very kind and respectfull Member.

He takes his Time to help u and clean all open questions.

Helped my Crypting my File over Teamviewer; and looked at me while crypting if i do everything right.

Another great thing is u can crypt ur bot to: exe scr bat and so and bind jpeg execute them as shell and many more.

All necessary functions are included in this Crypter.

The most important part isnt: being kind, being fud, being smart,

no the most important thing is: continuing a project and work on it.
I am sure; as u can see on the stealer, that this Crypter will not die in just a few days or weeks.

No i am sure that this will be a long time Project!

So all together i really recommend this Crypter and this Guy :-)

Dont be stupid and buy the Stealer Package! :-)

Ahh well and btw of course i am FUD:
http://scan4you.net/result.php?id=7659b_4dsai

So BUY IT GUYS :-)

Hope that helps u a bit.

Kindly Regards (Oct 28, 2010 11:47 AM)Industrialized™ Wrote: [\[CITE\]](#) I will be one of the first people to vouch for this. Good luck with sales and awesome program. i Vouch for this guy. both is great programs :) thanks

Yin Yang - October 28, 2010, 2:49 pm

If we have the stealer and no longer want it could we trade our licenses from the stealer to the crypter?

iRtehLeet™ - October 28, 2010, 3:43 pm

(Oct 28, 2010 02:49 PM)WooT In Da BooT Wrote: [\[CITE\]](#) If we have the stealer and no longer want it could we trade our licenses from the stealer to the crypter?

Unfortunately I won't allow this, but you are entitled to a discount on the crypter. ?

- Just released an update to fix the weird text on the buttons.

Always Sad - October 28, 2010, 4:00 pm

Lol nice update, can you update it over at the forum?

iRtehLeet™ - October 28, 2010, 4:05 pm

(Oct 28, 2010 04:00 PM)Wrong Wrote: [\[CITE\]](#) Lol nice update, can you update it over at the forum?
It hasn't been released on the forum, there is an auto update feature and your not even a customer of my crypter.

I think you have the wrong thread. ?

Always Sad - October 28, 2010, 4:06 pm

Lol i am a customer, theres no auto update feature. Im "Wrong" on your forum :(

iRtehLeet™ - October 28, 2010, 4:10 pm

(Oct 28, 2010 04:06 PM)Wrong Wrote: [\[CITE\]](#) Lol i am a customer, theres no auto update feature. Im "Wrong" on your forum :(

Your quite confused. You never purchased my crypter.. you purchased my stealer. Refrain from posting here and just MSN me.

HTC™ - October 28, 2010, 4:14 pm

This is the best crypter on HF good job iRtehLeet™

HTC™ - October 28, 2010, 10:12 pm

Haha. Thanks for the support HTC and I'm really glad you enjoy my program. ?

If you wish to get any support or have any questions, don't hesitate to contact me ASAP! ?

NEW KID ON THE BLOCK - October 28, 2010, 10:27 pm

Vouch for iRehleet great guy and skilled programmer! And the GUI is sweet mate!

panzer - October 28, 2010, 10:57 pm

iRtehleet is the best. i think the best coder on HD. ive never seen such a good crypter at all. but the best thing is the support.

i can give you some examples:

- 1: he answered all my question very polite and detailed.
- 2: he checked my blackshades and crypter settings via teamviewer
- 3: he provided me a scan4you check of my crypted file !
- 4: and the best at the end: he gave me some test installs for checking my crypted file ;)

i repeat ive never seen this here before :) Thumbs up Bro !!

iRtehLeet™ - October 28, 2010, 11:01 pm

pr0t0typ3 - November 2, 2010, 9:36 am

This is a epic piece of software I can recommend it

KING OF CHI - November 2, 2010, 11:45 am

Ok Irteh as promised here is my vouch.

And i am not vouching because u are a nice guy; no; i am vouching because this Product is awsome (of course u are also nice :-p).

First of all i have bought the Stealer package.
for 75 \$. The best Deal i ever made.

Lets Come to the Stealer.

The Stealer was set up in 1! Minute. Very easy to use; very easy gui.

I tested the Gmail notification and installed it on my Vics.

And baam after 2 Minutes i got 600 Mails... lol; now the only Problem is; i must read them all :-p :-p

The Stealer will get a 10/10

Now the Crypter.

The best Thing is the Support Forum; many howto and Tutorials. (some help is also included in the Crypter)

My advice: read them; because the Navigation in the crypter is well a bit alternative ^^.

The Payment and Registration was done in a blink of an eye.

He is a very kind and respectfull Member.

He takes his Time to help u and clean all open questions.

Helped my Crypting my File over Teamviewer; and looked at me while crypting if i do everything right.

Another great thing is u can crypt ur bot to: exe scr bat and so and bind jpeg execute them as shell and many more.

All necessary functions are included in this Crypter.

The most important part isnt: being kind, being fud, being smart,

no the most important thing is: continuing a project and work on it.

I am sure; as u can see on the stealer, that this Crypter will not die in just a few days or weeks.

No i am sure that this will be a long time Project!

So all together i really recommend this Crypter and this Guy :-)

Dont be stupid and buy the Stealer Package! :-)

Ahh well and btw of course i am FUD:

http://scan4you.net/result.php?id=7659b_4dsai

So BUY IT GUYS :-)

Hope that helps u a bit.

Kindly Regards

mlgxboostx - November 2, 2010, 9:51 pm

Big Vouch for iRtehLeet I bought a crypter of him a long time ago and that crypter was Fud for a loong time he's good at what he does.

/AI/ (Ace) - November 3, 2010, 1:09 am

Found no grammar mistakes on the sales thread. So great sale thread.

I know people who got the crypter and was very happy with it, I really doubt anyone will not be pleased with the crypter.

Carb0n F1ber - November 3, 2010, 1:52 am

Seems like a great product. Awesome GUI.

Just a quick question. Since this is stubless, codedom I am guessing? So what if detections start? Do we get auto updates for detections as well?? If yes, how long will we be getting updates for?

Also, please don't mind me asking, but how exactly is the licencing?? Does it log on to server ? Or is it offline/online HWID based?

I am asking because lately I have been having lots of issues with products with online verification. Product goes down whenever server is down. Also online HWID verification is a pain in the ass when moving around PC's or if you add/remove components from a VPC, the HWID changes.

TheHerbalist - November 3, 2010, 3:05 am

great product so far, got the stealer/crypter combo pack and let me tell you what i installed it on some of my bots and it started amazing me right away! GREAT support via teamviewer from irtehleet himself this morning, great guy to talk to also!

I RECOMEND THIS PACKAGE ITS FLIPPING SWEET!

sugar

HeBeTrollin - November 3, 2010, 6:04 am

Just a quick question. Since this is stubless, codedom I am guessing? So what if detections start? Do we get auto updates for detections as well?? If yes, how long will we be getting updates for?

Correct, using unique and unknown to the public methods, compiling on the fly. Of course auto updates include detections as well. As long as the product is out, and I have been re-fudding my stealer and providing support since day one which was 11-12 months ago. I have also responded to your PM.

Also, at everyone who has posted, I just want to thank you guys for the support. ?

you have even told me that it doesn't work on 3.7.1 in PM... please take this out, as my customers are complaining blackshades isn't working when they are using your crypter
Updated the OP ;)

BlackShades 3.7.1 doesn't work with every crypter, not just mine. ?

Credentials - November 8, 2010, 3:02 pm

Congrats on getting it stickied!

@Omn.

Hai sexy. :3

[New Update 11/21/2010 - Changelog:]

[+] BlackShades Compatibility Update

[+] Add to Startup Option added in the Crypter (now you disable it in your RAT's, and only in the crypter for smooth add to startup)

[+] Advanced Debug Error Logs added, meaning if you get an error you send me the log, and I can easily figure out what was wrong (see below for screenshot)

[+] Reduced the builder size by 60% by optimizing it ?

[img]<http://www.irtlsoftware.net/Screen.png>[/img]

Thanks for reading. ?

xvisceral - November 21, 2010, 8:59 pm

Cool that this works with blackshades now.

Why encrypt error codes though?

rolandpg - November 25, 2010, 12:30 pm

Awesome trade, i try the crypter in few minutes :).

You need a crypter? Just buy this !

mymicky - November 25, 2010, 2:04 pm

Anyone can pay iRtehLeet™ PP and i send the person LR? i need to buy this but don't have paypal :S Trusted members only

iRtehLeet™ - November 25, 2010, 9:21 pm

Built in scan4you scanner in the next update as well as some fixes.

(Nov 25, 2010 01:30 PM)rolandpg Wrote: [\[CITE\]](#) Awesome trade, i try the crypter in few minutes :).

You need a crypter? Just buy this !
Thanks mate.

Update: I just realized why you guys were getting a File Publisher Verification notice on restart (or losing your bots when they restarted)

It's because you were specifying the wrong directory under the install tab, you were using LocalApplicationData instead of ApplicationData (Local shows the box, ApplicationData doesn't)

These are the correct settings below

[img]http://irtlsoftware.net/BlackShades%20TUT/crypt3.png[/img]

Thanks

virusinsystem32 - November 26, 2010, 7:29 am

does it crypt NULL BOT ?? If it crypts NULL BOT . i am ready to buy right now

ambientset - November 26, 2010, 7:53 am

Crypter very good! Fast and Convenient service Thank you!

Arês™ - November 26, 2010, 8:19 am

Hey, I want to buy GOLD Pack. I added you on MSN contact me.

Thank you.

illera88 - November 28, 2010, 8:42 am

It is FUD scantime but not runtime so the AVs know it is a trojan in the moment that you execute it!!!
Norton runtime catch it!
Please solve it.

Carb0n F1ber - November 28, 2010, 8:46 am

(Nov 28, 2010 09:42 AM)illera88 Wrote: [\[CITE\]](#) It is FUD scantime but not runtime so the AVs know it is a trojan in the moment that you execute it!!!

Norton runtime catch it!

Please solve it.

You are talking about Norton SONAR. No current crypter can bypass it. It analyzies files by their properties rather than their signature.

illera88 - November 28, 2010, 9:47 am

It is just heuristic detection like a lot of others AVs has.

pr3fix - November 28, 2010, 9:55 am

(Nov 28, 2010 09:46 AM)Carb0n F1ber Wrote: [\[CITE\]](#) You are talking about Norton SONAR. No current crypter can bypass it. It analyzies files by their properties rather than their signature.

It is possible but hard, and wtf "by their properties".

No, they analyzes by their behavior, the same thing does KIS (Kaspersky Internet Security).

iRtehLeet™ - November 28, 2010, 12:11 pm

(Nov 28, 2010 10:47 AM)illera88 Wrote: [\[CITE\]](#) It is just heuristic detection like a lot of others AVs has.

No they don't, its behavior based, detects the behavior of the file that's executed.

Reanyker - November 28, 2010, 12:22 pm

I've buy the Package Crypter+Stealer for 75\$.

Those tools are amazing, and i'll use them for a loooong time !

thanks

need .net on slave pc ?

can fud the hostbooter.com server ?

The last hostbooter version it was tested on was about 2 months back, if the creator has made a cryptable verison of the program like he stated on his main page of his site, then it will work fine.

PC's require .net 2.0

iRtehLeet™ - November 30, 2010, 9:11 pm

(Nov 30, 2010 08:00 PM)Untraceable. Wrote: [\[CITE\]](#) is the iRtehleet Stealer 100% FUD? too short

Yeah iRtehStealer servers are FUD on build but the sales are closed for a few more days (iRtehStealer only) until I release the new version.

zoomcap - December 1, 2010, 2:08 am

has anyone tested XR 3.5 and confirmed its working?

Carb0n F1ber - December 1, 2010, 3:19 am

Just want to vouch the crypter to be working great with BFBot... (both server + bot) ?

WTCLeGeND - December 1, 2010, 2:18 pm

can i buy this with liberty reserve ?

iRtehLeet™ - December 1, 2010, 3:20 pm

(Dec 1, 2010 03:18 PM)WTCLeGeND Wrote: [\[CITE\]](#) can i buy this with liberty reserve ? Unfortunately I only accept AP/PP/MB at this current time.

I may look to expand to LR in the future.

Appreciate the testing, added it to the OP.

?nxy - December 1, 2010, 4:01 pm

Sticky's must cost a lot. xD You'll prob earn everything back though.

iRtehLeet™ - December 1, 2010, 5:14 pm

(Dec 1, 2010 05:01 PM)inxy Wrote: [\[CITE\]](#) Sticky's must cost a lot. xD You'll prob earn everything back though.

You can say that again.

A good quote - "You have to spend money to make money." ?

1 Pure Devil - December 1, 2010, 5:34 pm

Bought the crypter a couple of hours ago. Once I paid, I had the crypter and was crypting all my servers FUD within minutes! :D

Awesome crypter, totally worth the price!

You are tehLeet ;)

Impurity - December 1, 2010, 7:50 pm

iRtehLeet/iRtehCrypter Vouch by Impurity

My overall review on this product.

Performance - 4.9/5 - This is probably one of the best crypters I have used. I've tried around, had friends crypt using their crypter, and of course the free ones. This crypter was probably the easiest and performed the best file size wise and lasting the longest. All I can say is two thumbs up.

GUI - 5/5 - I literally was in shock at how smooth and simple his GUI is. Not only are the graphics just amazing, but the windowed style as well as the simplicity and navigation made crypting and navigating easy as hell.

Price - 4.5/5 - The price on this is reasonable, and worth it, if you have the money. For the longest time I didn't and that tortured me! I would like to see it moved down to maybe 50\$ but I understand that iRtehLeet has to make some money for his hard work. All I can say is, if you have the money, GET THIS!

Support - 5/5 - iRtehLeet has got to be the most friendly member I've met on hackforums.net. He isn't up tight, but he gets the job done, and he really goes the extra mile to actually converse, not just help you and move on. It's a very welcoming feeling to join his community. He really connects (in a non homo way :P) and goes out of his way to just make you feel...like a friend.

Overall - 5/5 - All of the drama and sales trashing aside, iRtehLeet has put together an amazing crypter. One that stays FUD for a long time. One that supports several different sources. One with different encryption styles, and a crypter that is fully customizable to how you want it to be. My only regret with this crypter is not getting it sooner. My hat is off to iRtehLeet and his amazing product and I'm a very satisfied customer.

I'd like to say thank you to iRtehLeet for releasing and working on this project, some of my goals couldn't have been reached without him. To those sales trashing and flaming him, his product has always worked for me, no problem. It crypted my Blackshades, without a problem, and if it didn't, I know he could and would help me resolve it.

Thank you for taking the time to read this and I hope this clears some things up for some of the users that are unsure whether or not they want to buy.

KING OF CHI - December 2, 2010, 12:38 am

Nice review Mate :-)

Great that u like this Crypter :-)

Thanks, took me forever because I'm so anal about everything lololol.

kingmarv - December 2, 2010, 6:46 am

someone tested it with reversproxy 3 ?

WTCLeGeND - December 2, 2010, 8:29 am

He is never on msn :(i want to buy

n3wy0rk - December 2, 2010, 8:52 am

I add you msn pls open ttt

OGBenitez - December 2, 2010, 12:46 pm

preety interested in this :) Gonna get 60 bucks then RuNz XbL ;)

??m²z??™ - December 2, 2010, 5:09 pm

Vouch For Great Product very beautiful program worth every Cent!!!

Murkrow - December 2, 2010, 10:05 pm

Hey iRtehLeet, thought I would ask what this was coded in, since it isn't on the main page? By the way, your GUI is absolutely amazing! I would LOVE to have a GUI like that ? Who made the GUI?

Well from everything that I've read over the last couple months on this crypter, I'd like to say excellent job & I definately Vouch for this! Congrats on an excellent product! ?

sniper13 - December 3, 2010, 3:12 am

is the stealer still available ? coz the stealer already closed. i would like to buy Combo package :D

iRtehLeet™ - December 3, 2010, 2:50 pm

(Dec 3, 2010 04:12 AM)sniper13 Wrote: [\[CITE\]](#) is the stealer still available ? coz the stealer already closed. i would like to buy Combo package :D

Stealer will be available once I apply many needed updates this weekend.

SpecterCraze - December 3, 2010, 7:43 pm

one question if buy the crypter then suddenly the stealer after next week how much do still pay for the stealer?

barthwrc - December 4, 2010, 8:30 am

this crypter is amazing

VOUCH him

H3llboy - December 4, 2010, 8:31 am

hmm seem like good to use

iRtehLeet™ - December 4, 2010, 10:04 am

(Dec 3, 2010 08:43 PM)Erem Wrote: [\[CITE\]](#) one question if buy the crypter then suddenly the stealer after next week how much do still pay for the stealer?

Usually 10% off, mention your a previous customer when purchasing.

K!NG OF CHI - December 4, 2010, 10:06 am

Erem as i remember there will also be a fucking great update of the stealer :)

Vouching for that!!

Kindly Regards:)

At everyone else I'm getting back to my pm's now.

Red Alert - December 12, 2010, 10:10 am

\$60 is the cheapest pack? Dayum - also is there any discount for existing Stealer customers?

?nxy - December 12, 2010, 11:39 pm

How often do you update iRtehcrypter/iRtehstealer?

BacoNbitZ - December 13, 2010, 2:50 am

Don't know what to say. The tutorial video on your website explains EVERYTHING about the crypter. Was super easy to figure out how to crypt/bind my ddoser 4.2 server. Recommending this ish to everyone meow :D

corpsecorpsecorpse - December 13, 2010, 12:04 pm

Yes, there is no better, it takes time to help us

World2Krazy - December 13, 2010, 12:10 pm

this is my feedback from this iRtehCrypter. (no lies)

the first day i talked with iRtehLeet , he wasnt that friendly he thought i was going to pay him with hacked paypal account O_O....

and sooo on so he gaved me 24hr hold and so i waited , the next day i waited for him more then 24hr lol i thought i was going to get screwed over , but as soon i was going to log off the acccount he logged in =D , from there he was friendly , that day i got my crypter set up but it wasnt FUD , in a few hrs later he got it FUD and solved all the problem the crypter had..

and from that day on this cypter been working very good with FUD crypting giving me 5K logs in 2 days and the serve is still FUD ^_^

if any 1 is looking for a very good crypting service with very good support then you are in the right place.

Hey! I've PMed you about getting the crypter. You said you'll hold the funds for couple of hours but now it has been over 24 hours since I've send you the funds. Will I get the crypter?

iRtehLeet™ - December 14, 2010, 3:38 pm

(Dec 14, 2010 03:38 PM)Cardio Wrote: [\[CITE\]](#) Don't like almost all people have framework 2? Cause' i know the newest one is like what, 4?

Yeah. 90+% of systems have it installed, and 4/5% that don't have it probably don't even have access to the internet to actually update, or they are old computers at a school. Remember that .NET framework 2.0 is pre-installed on all systems from XP SP3 Onwards to Windows 7, and on XP SP1/SP2 its an "Urgent" update.

(Dec 14, 2010 03:44 PM)k31k0 Wrote: [\[CITE\]](#) Hey! I've PMed you about getting the crypter. You said you'll hold the funds for couple of hours but now it has been over 24 hours since I've send you the funds. Will I get the crypter?

Why do people constantly ask that on my thread? I have 10+ pm's a day to look through, once I hit your PM I will give you instructions dont worry, I dont scam, lol.

Vysse - December 14, 2010, 3:58 pm

iRtehl33t, when is version 5 coming out? :D

DCreavers2 - December 15, 2010, 2:21 am

love your sales thread bro.

doesn't include important questions like "Stub size" and "coded in".

I mean.. who cares about stub size, and what its coded in.

amirite?!

Definition - December 15, 2010, 2:50 am

Hi irtehleet your programs look and sound awesome. I am extremely interested in both the crypter and stealer. As soon as I have some spare cash (bit short at moment due to xmas) I shall be making a purchase. You have a lot of positive feedback and a lot of fans here from what I can see. Keep up the great work!

Luffyz - December 15, 2010, 6:06 am

iRtehleet when is version v5 stealer coming out?

neger20 - December 15, 2010, 11:13 am

Nice Crypter,Stealer. I sent you PM

spy-danger - December 15, 2010, 11:24 am

can this crypter work without framework i mean is this crypter coded in vb.net ok vb6 ?

i want to buy your crypter can you give me more information i want to buy it now

Nyanonymous™ - December 15, 2010, 1:19 pm

Looks nice, i really would like to buy it, but it look a little bit hard to use :p

iRtehLeet™ - December 15, 2010, 1:32 pm

(Dec 15, 2010 03:21 AM)DCreavers2 Wrote: [\[CITE\]](#) love your sales thread bro.

doesn't include important questions like "Stub size" and "coded in".

I mean.. who cares about stub size, and what its coded in.

amirite?!

It doesn't use a stub or I would of included the size.

At max this will only add about 50kb to your file max. (of course depends on your filesize already.)

So in term, the stub size would be no bigger then 50kb if it were to use a stub.

(Dec 15, 2010 12:24 PM)spy-danger Wrote: [\[CITE\]](#) can this crypter work without framework i mean is this crypter coded in vb.net ok vb6 ?

i want to buy your crypter can you give me more information i want to buy it now

2.0 is not a big requirement.

(Dec 15, 2010 02:19 PM)Meteonyker Wrote: [\[CITE\]](#) Looks nice, i really would like to buy it, but it look a little bit hard to use :p

Full video tutorial, remote support session, and customer support forum included. ?

pepelebu - December 15, 2010, 6:13 pm

Hi, I'm interested in your crypter but I can not send messages if you are interested send me a msg I would greatly appreciate it ... and I'm very interested

G - December 15, 2010, 9:16 pm

get on msn already i needa buy this lol

Zebra3 - December 16, 2010, 4:23 am

I'm waiting since 12 December 2010 Please check your private message.

Bad settings I believe. I have 3-4 customers using Null Bot fine at the moment. Request some help with crypting that software over at my forums, I'm sure the ones you have done it successfully will help.

spy-danger - December 17, 2010, 5:55 am

is that crypter work with blackshade ? if it work please give me your moneybookers account to send you your money

.Dream. - December 17, 2010, 6:33 am

This looks pretty cool. I will have to give it a try!

justanidiot - December 17, 2010, 8:37 am

any buyer can confirm that this crypter works with albertinos 4.2?

Nyanonymous™ - December 17, 2010, 9:07 am

And what about the Stealer, you'll recoding one more or only make an update ?

iRtehLeet™ - December 17, 2010, 10:07 am

(Dec 17, 2010 10:07 AM)Meteonyker Wrote: [\[CITE\]](#) And what about the Stealer, you'll recoding one more or only make an update ?

The stealer will be under going a big recode for V5.

(Dec 17, 2010 09:37 AM)dude2k Wrote: [\[CITE\]](#) any buyer can confirm that this crypter works with albertinos 4.2?

Let me bring my main Albertino tester here, second.

I thought you posted you finally had some good results @ my forums?

Either way you need to get Albertino to disable his auto-crypter in his RAT in order to crypt the output since its a managed exe.

Maximus-CZ - December 17, 2010, 1:06 pm

Just purchased, Still awainting serial from iRtehleet

Will post my experience as soon as I get some:-)

SkyWalker™ - December 18, 2010, 7:46 am

hey its a good crypter but I have some questions.

1 Did crypted file need . net in Victim`s PC?

2 Can you please post a screen shot of a comparing 2 crypted files with exact same settings.

Thx

mcbrando - December 18, 2010, 7:53 am

I've pm'd Irteh. Super excited to get this! Think I'm gonna grab the combo pack... :)

nicklan - December 18, 2010, 3:33 pm
