Thread: [Vb2008 help needed](#)

hackerboy2112 - May 15, 2009, 3:48 pm

ok i found this tut on how to make a youtube downloader but i follow the dudes code and it doesnt work keeps coming up with errors

<http://www.youtube.com/watch?v=YINimSBe8cl>

if some one gets it working could u pm me or post it a working file or just the code Thanks to whom ever may help

Jimmyg22 - May 15, 2009, 3:48 pm

could you post the errors you are getting?

hackerboy2112 - May 15, 2009, 3:53 pm

well i keep getting errors out of this section of the code

Code get_link()

```
Dim save As New SaveFileDialog
save.Title = "Choose where to save the video"
save.Filter = "Flv|*.flv;*.flv"
save.FileName = Me.lbl_title.Text & ".flv"
save.ShowDialog()
Me.btn_cancel.Enabled = True
Me.btn_val.Enabled = False
Me.btn_download.Enabled = False
```

```
download = New WebClient
```

```
Dim url = txturl.Text
```

```
Dim whereToSave = save.FileName
```

```
Me.ProgressBar1.Value = 0
```

```
Me.ProgressBar1.Maximum = 100
```

```
Try
```

```
download.DownloadFileAsync(New Uri(url), (whereToSave))
```

```
Catch ex As Exception
```

```
MsgBox("Cannot download video, Please check your video link", MsgBoxStyle.Critical,
>Error")
```

```
End Try
```

and every time i run it save.ShowDialog() gets highligthed

Jimmyg22 - May 15, 2009, 3:56 pm

well what does the message say? also try getting rid of the () and see what happens (i know vb6 so idk if its different for 2008)

hackerboy2112 - May 15, 2009, 3:59 pm

w8 i will run it again
