Team Storm File Split Generator

By: Mia and eXero

First release from the new group Team Storm. Was coded by Mia and me, eXero

[img]http://i51.[censored].com/2dkb77b.png[/img]

Download:Code <http://uploading.com/files/31865c13/File%2BSplit%2BGenerator.exe/>

Virus Scan:Spoiler [\(Click to View\)](#)

File Info

Report date: 2010-10-30 08:48:36 (GMT 1)

File name: file-split-generator-exe

File size: 41984 bytes

MD5 Hash: c6fbb1506c49071815c2d83a698c24a6

SHA1 Hash: c4647d4fb9a83d3e31c0097eeab6b253710c29eb

Detection rate: 0 on 16 (0%)

Status: CLEAN

Alison Wonderland - October 30, 2010, 12:00 am

so it just generates random filesplits?

That could be usefull actually

eXero - October 30, 2010, 6:41 am

Yes, and yes it could. Would keep your files FUD.

DaRkReD - October 30, 2010, 7:00 am

it just generates random strings..

why not just smash my keyboard at a wall and use that filesplit

Jaket25 - October 30, 2010, 7:00 am

Can you explain a little what this actually does?

eXero - October 30, 2010, 7:05 am

@DaRkReD - Keeps files FUD with random rc4 file splits

@Jaket25 - Generates random file splits which can be used in the coding of programs to keep them FUD.

@SystemCrisis - Sorry bout that bro. We beat you to it :P

King James - October 30, 2010, 7:06 am

Wow, cool. But could this possibly corrupt servers? I'm guessing it would be very likely.

So do you put the crypted file in, or un crypted?

eXero - October 30, 2010, 7:09 am

@Richie what do you mean? This wont corrupt servers as long as you code them right.

DaRkReD - October 30, 2010, 7:10 am

an encrypted filesplit does nothing... but add characters and some additional special characters to your filesplit, a filesplit is still clear as day....

good idea for a tool tho

eXero - October 30, 2010, 7:26 am

@DaRkReD - an encrypted file split does everything. It keeps your files FUD because an anti-virus, malware tool whatever will look through your files coding and try to find things that hint to that it is a virus, and if you have a dynamic filesplit, it will keep your file FUD.

DaRkReD - October 30, 2010, 7:30 am

yes a unique one is nice and keeps your file fud but i dont see why we need a generator to slap out some text

eXero - October 30, 2010, 7:32 am

It slaps out a generated rc4 encryption string to help the coders.

DaRkReD - October 30, 2010, 7:32 am

well i assume this is useful for some people.

nice release

eXero - October 30, 2010, 7:33 am

Thanks DaRkReD...

Remember to post a reply if you downloaded!

iQosmo - October 30, 2010, 7:34 am

Nice share man thank's alot.

eXero - October 30, 2010, 1:47 pm

Your welcome HF Coder. Glad you liked it.

-mothered- - October 30, 2010, 4:11 pm

Oh damn, I've downloaded the file and my Norton IS has detected It, hence ceased It's existence. I'm sure this Is a false positive, so I'll disable my AV and try again.

Now this seems very Interesting Indeed mate.
Thanks.

eXero - November 6, 2010, 11:05 am

Welcome, and I don't know why your AV detected it. The scan showed it clean :P

?int0x™? - November 6, 2010, 12:05 pm

Mothered uses Norton (like me). NVT does not have Norton in its database. So the scan result is clean.

eXero - November 6, 2010, 1:49 pm

Oh okay. I see. Well then don't download it if you don't want.

1-800-you-fail - November 18, 2010, 10:19 pm

If you think a 41ko program can be dangerous.. Don't download it, but it's safe lol.
