Thread: [smooth firewall?](#)

Obergauleiter G - May 16, 2009, 1:32 pm

im using zonealarm imo. is there a better firewall out there?

reqs:

low memory use

nice user interface

thanks.

iBruteforce - May 16, 2009, 1:33 pm

Online Armor is great, seriously, you won't regret downloading it. Been my favorite for ages now.

http://download.cnet.com/Online-Armor-Personal-Firewall/3000-10435_4-10426782.html?tag=mncol

Detective RooTz - May 16, 2009, 1:38 pm

Comodo use that its pretty low and easy usage

And do change your name that is just incompetent to use such a name xD im shuer you wil lget a admin saying change it soon or a mod

Valiant - May 16, 2009, 1:41 pm

I recommend Comodo if you want more options on settings, etc. Otherwise, Online Armor is fine.

Obergauleiter G - May 16, 2009, 1:41 pm

Downloading Online armor imo. sounds like a proxy >.>

iBruteforce - May 16, 2009, 1:42 pm

Comodo will annoy the crap out of you, unless you're a firewall pro & like having constant pop ups asking to allow/deny requests, Online armor is for you.

Obergauleiter G - May 16, 2009, 1:47 pm

ok.. intsalled online armor. looks like a rogue programm ... a bit. But i'll see seting up everything imo. "safety wizard"

iBruteforce - May 16, 2009, 1:49 pm

Rogue, wtf?! O_o

You will see, it's awesome.

Obergauleiter G - May 16, 2009, 1:51 pm

i hope so.

http://en.wikipedia.org/wiki/Online_Armor_Personal_Firewall its on wiki it must be awesome. lol. impressed so far ;).

WTF

THIS FUCKIN THING FUCKED UP MY COMPUTER!???

NOT.

im impressed thanks for the tip! im using it now and im really impressed! :D

iBruteforce - May 16, 2009, 2:18 pm

I knew you would be.

Tip: When the firewall asks you to allow or block something, make sure you tick 'Remember my answer' & 'Trust this(iforget)'

You won't get annoyed then.

Obergauleiter G - May 16, 2009, 2:20 pm

ok thanks. +repped also :)
