Thread: [Generate Fake Traffic - Boost your Alexa Ranking](#)

Malphas - October 30, 2010, 12:13 pm

Tutorial Made by CEO on HF.

Its really very easy to generate fake hits for your website/forum/blog

All you need is unique hits [different ip's requesting your webpage from the server]

This can be done by using proxies [daily updated proxy list can be found [here](#)]

Its a never ending process if you are going to send hits to your website by switching proxies one by one in your browser or lets say if you are thinking to do it manually.

The process can be automated by using a software, which you can download from [here](#)

This tool is clean & tested by me {however you can scan it @ [scanner.novirusthanks.org](#)}

Now, let me tell you how the whole thing works;

extract the rar file in your hard drive & you will see the following files under the extracted folder :::

Code bulgarian.lng

dutch.lng

english.lng

Free Traffic for Life!.exe

french.lng

italian.lng

proxies.txt

referrers.txt

serbian.lng

settings.ini

spanish.lng

tree.txt

urls.txt

user_agents.txt

variables.txt

open the file 'proxies.txt' & delete all the proxies because they are outdated and will not work as i told you in the beginning of the tutorial you can get proxies [daily updated proxy list can be found [here](#)]

Copy the proxies & paste them into the file 'proxies.txt' > save the file & close it

the next step is to give the program the url to send hits @ for that

open the file 'urls.txt' & enter the url of your website [for example : <http://forums.security-need.com/>]
again save the file and close it.

We have done with the settings part now let start the game, open the program file 'Free Traffic for Life!.exe'

Go to the tab @ the top which says 'Statistics' now look down @ the bottom and press the 'Start' button

It will show you the live statistics, like total hits sent, number of proxies used etc....

[img]http://img691.imageshack.us/img691/4884/faketraffic.jpg[/img]

Now, if you have a forum you can check out 'whoisonline' page & you will be amazed to see the number of users {which are actually the proxy hits}

Doesn't hurt to say thanks, this was made by CEO on HF.

Hmm... Somebody tried it?

Astronome - October 30, 2010, 1:40 pm

Can someone scan the program because post was made by a guy with 2 posts
