So it isn't even MDI? wow, so its just a windows form :/

Well good job anyway, I am forgetting the fact that everyone starts somewhere.

iQosmo - October 31, 2010, 2:27 pm

yay im the 7th lolz ill test it. PM me

Logan - October 31, 2010, 2:28 pm

I'll test this. PM it to me.

x-hacker - October 31, 2010, 2:29 pm

its just windows forms at the moment but i will develop a gui

Pulser - October 31, 2010, 2:37 pm

How is it an operating system if it is a windows form?

x-hacker - October 31, 2010, 2:40 pm

i said vos virtual operating system

TheBlackMarket - October 31, 2010, 2:47 pm

I would like to test it :) i have PM you.

x-hacker - October 31, 2010, 2:47 pm

cool black market you get it even if i allready have the 10 testers

TheBlackMarket - October 31, 2010, 2:48 pm

Thanks mate! Keep up your great work with your vos.

Are you kidding... This thread is 2 years old and the program itself doesn't look good at all. Stop gravedigging ?

Not trying to put you down or anything, but that isn't a 'Real' Operating system. This has little to no use to 99.99% of the people here. My advice to you would be to change projects. Try to do something that is going to be difficult at your current skill level. The first thing I tried to do when learning programming ©, was printing out all of the prime numbers from 0 to 100. Try something that will build your math level as well as programming skill. Keep in mind that if it's hard, you're learning correctly.

x-hacker - August 2, 2012, 7:51 pm

Dude this is two years old o.O i know it isnt a operating system or even close to one

You are not looking good at all, just because you have few themes you think everyone else work is crap and ugly?

Since you are obviously mentally handicapped, lets break this down for you.

Mavamaarten is a great coder, and his themes are amazing.

Kid posted on a thread that is two years old.

Mavamaarten posted stating that, and that the program sucks, because it does. It looks ugly as fuck, and it's not an operating system. It's a bunch of fucking forms made to look like one.

He is looking like a helpful member that he is, notifying the user that the thread is 2 years old.

Further enforcing the point that this thread needs to be closed.
