The limit has been reached today. I will also be private messaging random posters with the direct download link. You may apply for the unlimited 1 giga-bit cPanel shared website hosting though, the limit has not been reached for that.

Col2eight, I am going to private message random posters with the direct download link. You might be a lucky poster. I am going to write every posters name onto a piece of paper and I am going to place it in a pumpkin cup and withdraw. I will withdraw whenever I get 50+ posters. Every 50+ posters = 1 luck winner.

Apparently DrizzyDrake™ and Kingpop91770 found a download exploit. If you can find the download exploit, go ahead and download it. Just private message me the download exploit.

I am very sorry to hear that you missed the download. The download system will be reset at 12:01am (PDT) (GMT -7).

You can still register for free unlimited on-shore cPanel shared website hosting. The limit has not been reached for that yet.

Alright, thanks! If I download it before it resets, do I still get to apply for the cPanel?

Dooqii™ - November 1, 2010, 12:23 am

Its 12:23 PDT time atm. According the thread it should have reseted 22 minutes ago

AlleniumxD - November 1, 2010, 12:33 am

I set it so that it reset after every 24 hours as stated on the download system. Hold up. I am going to edit my thread. I am very sorry about misunderstanding that this may have caused.

Dooqii™ - November 1, 2010, 12:35 am

Dooqii™ - November 1, 2010, 12:40 am

You should give it a reset anyway. Seems unfair that the download was capped because of bug exploiting.

Once the download system page bug gets patched, I will revert it back to downloads reset at 12:01am (PDT) (GMT -7) method. I am sorry for any inconvenience this may have caused.

I am going to compensate those who were affected by this by adding two forum user name tickets in the drawing. I will draw a lucky winner every 50 posts. The winner will be given a direct link to download my e-book.

Allenium, I think that what he meant is to take off the people on this thread that already have the book from the raffle.

Btw, I have some PHP knowledge. If you tell me whats the problem I can give it a shot. Can't promise I can do it tho. Used to play around writing filehosting scripts.

I received quite a few private messages stating my download system can be bugged / glitched. I am not sure though. If you are a website specialist, you can probably figure it out. Please report the bug / glitch to me after you download my e-book. If you release my e-book elsewhere, you will be penalize.

No challenge download: 1/25 people will leak it.
Challenge download: 1/50 people will leak it.

If you provide people a challenge, the chances of people leaking it will decrease. For instance, who would give up a trophy?

At the moment, the current download system does not reset at a specific timezone / time. It resets every 24 hours once the cap has been reached. That was our old download system which people started bugging / glitching. People were changing their computer system's time to access our download server. We will be converting back to the old download system once we secure it.

When is the reset time? Are you sure? You do know that our new download system rests every 24 hours after the cap has been reached right? Our last download system that rests at 12:01am (PDT) (GMT -7) was being bugged / glitched. People were changing their computer system times to access the download server. Try harder and be on time. I am still banned for whatever the reason. I only used the auto refresh batch I made after I was banned. Before that I refreshed every half second at 11:58 - 12:05, that's what I fear may have caused it. I would like to be able to use the hosting in order to get accepted into CPALead.
