Who reads it? Or watched it.

My god... I never felt so emotional to anything in my life. I'm more sad at times when I read it but I get super fucking happy when a good thing happens. The characters may be there for only a short period of time but I became attached.

Read it. The manga is better and continues the anime.

Read the manga. It continues it and the last like 4 or 5 episodes aren't in the manga.
