IP Example

[IMG]http://i56.[censored].com/2agky1e.gif[/IMG]

Hey all of my fellow C# coders. I threw together this fairly basic "IP Address Example" for all of you to work with. Anyone coding some sort of shell booter or DDoS client may be able to use some of the examples shown in this program.

At the end of the thread I will post a link to the source code as well as an executable.

There are two options on the main form of the program.

- The first option simply displays your own IP address.
- The second option will display information about the website.

You can search a website in any form E.G.

www.Google.com

Google.com

The program will resolve the IP address and display it in the box. To get a websites IP address, simply type the URL into the box and press Enter on your keyboard.

If you want information on an IP address, click on the resolved IP inside of the box, and from the drop down menu, click "Get IP Information".

Pictures:

Main Form

Download

<http://www.multiupload.com/5J4THBPDE1>

I really hope someone finds a use for this source!

Pulser - November 2, 2010, 4:41 pm

Quick B*ump guys, simply because I added a gif.

Deceptive - November 2, 2010, 4:50 pm

So all this really does is the get the IP from the website that is input but the user?

Positive - November 2, 2010, 4:54 pm

Good work. I have PMed you a ? though.

Pulser - November 2, 2010, 4:55 pm

(Nov 2, 2010 04:50 PM)TheMist Wrote: [\[CITE\]](#) So all this really does is the get the IP from the website that is input but the user?

Actually in the thread I said:

It gets the specified website IP address.

Gets the users IP address.

Gets whois information on the IP addresses listed in the box.

:O

(Nov 2, 2010 04:54 PM)Positive Wrote: [\[CITE\]](#) Good work. I have PMed you a ? though.

Thank you for the positive comment, I have PMed you back.

Ace of Spades - November 2, 2010, 5:45 pm

Beautiful work mate :) I love seeing more C# coders, not enough here on HF :]

Yeah, I do my best to post a lot of C# examples and tutorials.

Trying to build up the C# community a bit.

namename - December 6, 2010, 8:09 am

I downloaded the ip example, I wrote the site I want to hack, I have the ip, how do I hack the site? maybe do the thing were the site just says hacked ,

or go to the admins computer, and make the admins computer not work, and so the admin buys a new computer, then I make that computer not work too

Pulser - December 6, 2010, 9:01 am

I think you are just a troll. Go back to your bridge.

Pulser - December 6, 2010, 9:32 am

Hey, thanks for the positive comment! ?

Mr. Anderson - December 6, 2010, 11:13 am

Thanks for posting! Hopefully the "how do I get site ip" threads will stop now!

namename - December 6, 2010, 11:43 am

predictable im not a troll,

other person wtf, , these things are possible, the other person talked about doing it in the other threads but I didnt get it

what happened to the persons post the flammed me

Your post was ridiculous and made no sense.

ISwearSheWas18 - December 6, 2010, 12:26 pm

Easy to do, is like 3lines or something.

Anyways good job :)

Thanks for the good comment.I was reffering to the getip from website thing :D
Anyways goodluck and good to see some improvements :)
