Thread: [Want to buy a money making E-Book. \[Blackhat\]\[FAST MONEY\]](#)

-Jeff - November 2, 2010, 5:27 pm

Hey, I am looking for an instant (Not instant, but fast.. You know what I mean xD) money making E-book. It can be black hat, after all, this is hackforums.net.. so its not shy to the darker side of things. Please link me to a thread if you have one to offer, it must have vouches because I don't want some piece of shit unoriginal ebook you scrapped together in thirty seconds..

Anyways, my budget is \$14. Thanks!

There is some free guides in the monetizing section.
Check them out:)
Good luck!

Thanks, but everything I see there is just a little too unoriginal... I wanna do something not too many know, and something that will turn a quick profit.

Have you checked out the Advanced Methods in the VIP Section?

How much are you planning to invest. I'm sure if you search "BlackHat" in the search or maybe "BlackHat Ebook" you'll get some results.

If you need help picking just look at reviews/vouches. If there aren't any official reviews for the eBook than I recommend not buying it.
