Thread: [\[VB.NET - RELEASE/SOURCE\] URL Viewer | Multiple Proxy Support | View Counter + More!](#)

Endax - November 3, 2010, 9:01 am

Before anyone bothers posting about how theres already been loads of programs such as this released I started making this the other week when someone requested one and I was off from college today so I thought I'd finish it and upload it. I'm just trying to contribute.

I programmed this from scratch, on my own.

Features:

- [+]Visit a url without using proxies.
- [+]Specify amount of views.
- [+]Specify the delay between views.
- [+]Visit a url using one selected proxy.
- [+]Visit a url using a seperate proxy for each view.
- [+]When using a different proxy per view, works it way through the proxy list, once it comes to the end it goes to the top of the list again.
- [+]Add, remove and clear proxies.
- [+]Import and export proxy lists.
- [+]Status showing how many views have been completed.

I know that the code in some places is horrible and I could of done things a lot better, but most of this code was rushed and I'm still learning vb.net.

Screenshot:

[IMG][http://i51.\[censored\].com/j7q5uq.jpg](http://i51.[censored].com/j7q5uq.jpg)[/IMG]

Download Links:

Program:

http://uppit.com/8a3itkpxngcv/URL_Viewer_Application.rar

<http://www.#!/?d=SUV2LPPP>

Source:

http://uppit.com/gv0q0hz4eh82/URL_Viewer_Source.rar

<http://www.#!/?d=990Y2Y05>

In the source I know that the project is called "WindowsApplication2" but when I was trying to save it as a new project and rename etc my laptop was f*cking up and lagging so I just left it as it was and uploaded it.

In the archive with the program I have included a proxy list however I don't know how many of them are actually working.

List of new proxies:

<http://www.hidemyass.com/proxy-list/>

Note: If you are using for youtube or something similiar your views may not get counted unless you put the delay quite high, this is due to the new security which youtube has.

Please don't complain about bugs or how bad the code is, i'm trying to help.

Incase for some reason you don't want to download it or haven't got vb 2010, heres the code for the main form.

Thanks for sharing this with us! :)

S!rk0 - November 3, 2010, 9:29 am

Thank's for sharing ^^ Need Visual Studio 2010 to start it :p

mapleanton - November 3, 2010, 9:32 am

Thx ! was been looking for proxy support !

Endax - November 3, 2010, 9:35 am

(Nov 3, 2010 09:29 AM)S!rk0 Wrote: [\[CITE\]](#) Thank's for sharing ^^ Need Visual Studio 2010 to start it :p

Yes you will need 2010, if anyone hasn't got it and wants to look at a specific bit of code or something I've put the code for the main form in the first post.

darkkiler95 - November 3, 2010, 9:54 am

dont work for youtube views :(Q.Q

My Life - November 3, 2010, 10:05 am

Thanks for the share . I was also looking for a proxy support .

Greed™ - November 3, 2010, 10:13 am

On Youtube the delay must be 20 sec for it to be counted

Endax - November 3, 2010, 10:17 am

(Nov 3, 2010 09:54 AM)darkkiler95 Wrote: [\[CITE\]](#) dont work for youtube views :(Q.Q

As rasenshurikenn said, on youtube views only get counted after watching the video for several seconds, if you think that when using proxies it loads slower you have to put the delay quite high to allow time for the page to load, video to play for several seconds and then refresh. Also views may not show up until several hours after.

Hackzable - November 3, 2010, 10:27 am

Thanks for it, works great

But could i give you an advice?

please don't use web browsers, use web requests instead

Mr. Anderson - November 3, 2010, 10:29 am

you could also use the converter I made.

and thanks for sharing the source code.

APTO - November 3, 2010, 10:32 am

Awesome! Deffenitly going to be using that! will it work on adf.ly or do you have to press skid add?

Downloaded! Thanks alot for this man! Really appreciate it.

Volve - November 3, 2010, 11:15 am

Thanks for sharing , Good Work.

ident - November 3, 2010, 12:20 pm

One of the better GUI i have seen so well done.

Few things i have quickly noticed (Not viewed code) but i will say in case you are continuing the project. What the point is i am not quite sure? (Youtube views?)

- 1: Any URL or TEXT entered into gets a statistics view of n (number)
- 2: Amount of views any char can be entered

- 3: Delay and char can be entered
- 4: (Functionality) Since we can not proceed with 0 views. 1 would be more suitable.
- 5: ArgumentOutOfRangeException is not handled on delete
- 6: OpenFileDialog1 should not be left as default
- 7: Use English : Txt Files on Openfiledialog.
- 8: Statistics update regardless of anything viewed
- 9: Not one comment :(

Oh one thing i did notice at the code. FILE_NAME looks like a C++ constant. It should be filePath, You got the i because it's the traditional name for a loop index variable; a better name you might considered. aryText uses Hungarian notation to indicate it's an array of text;

compunerd3 - November 3, 2010, 12:30 pm

Thanks for sharing, any chance can you upload to another hosting site also?

I always have had problems using uppit
thanks :)

Zenk - November 3, 2010, 1:06 pm

This wasn't meant to be a complete application with error handling etc.. and there wasn't a specific reason I made it. I just saw lots of people requesting something like this, specifically using proxies, so thats why I made it. It's a simple program with many bugs that I know about, it's more of an example than a finished program for people to use. However it works perfectly if people don't specifically attempt to find bugs by putting in chars in the views box etc..

ident - November 3, 2010, 1:39 pm

It's called testing. What is the project's purpose can I ask?

Endax - November 3, 2010, 1:56 pm

(Nov 3, 2010 01:39 PM)ident Wrote: [\[CITE\]](#) It's called testing. What is the project's purpose can I ask? I saw various people asking for link viewer's with proxy support or in general about using proxies with browsers. This program's purpose is to visit a link, whether using proxies or not, it wasn't made specifically for a website, e.g. youtube.
