I am writing this at 9:46AM 11/5/10.

On my time zone +9, it makes the time 1 hour ahead than it should be.

Current time: 11-05-2010, 10:45 AM

This is a glitch in MyBB. I have this issue on all other MyBB forums. I'm actually GMT -5, but I have to set it to -4 for the correct time.

You can just turn off daylight savings in your profile options. Maybe it's because your time zone countries involve countries that has daylight savings.
