Thread: [\[Video Tut\] C# - If, else, elseif and Boolean statements. In depth.](#)

Local Celeb - November 6, 2010, 2:06 pm

I would greatly appreciate it if you Like, subscribe, share and comment :)

Black-Blood™ - November 6, 2010, 2:07 pm

Hm seems like you're gonna make a few more tutorials. Would be nice if you put them all in 1 thread !

Im going to be making alot.

I will make a compilation thread with all of them up to date.

I'm really dedicated to teach people!

You should try skipping past what others have already done. I'm happy that you are contributing, however, is it necessary to have 3 different if statement tuts?

If you want to try something fresher check out whats already been posted.

Modesty - November 6, 2010, 2:27 pm

how deep can you go with such simple statements :/

subliminalnarcotic - November 6, 2010, 2:36 pm

im learning c# in class and starting next week were learning loops in console.

we havnt even started in windows apps yet so it would be helpful to me if you did it in console.

i already know a few commands but if you re-explained them would be awesome :]

bool

int32

||

&&

\n

etc

Im actually going to be making a logical statements tutorial next, then a looping tutorial.

I may make some console tutorials, depends :)

Nice tutorial. Nicely explained. From doing XNA C# to going to VB.net I much prefer the C# syntax.

The vb.net is just horrible imo =|
