Thread: [Experiencing trouble with posting.](#)

RobotzInDisguise - November 8, 2010, 10:34 pm

I just made a post in some one thread in the SRPP section.

After I hit post comment, i was reverted back to the first page and when I go to the last page I am unable to see my comment. But when I go to my profile, it says I posted the comment in his thread, but when I go to the thread again, I still don't see it.

Is there something I'm missing, because it's really confusing me.

The Elite - November 8, 2010, 10:35 pm

This is caused from database anomalies, won't be fixed until a new dedicated server is purchased.

Detective RooTz - November 8, 2010, 10:47 pm

Yep. What The Elite said.

I have a dedi. Offered it to Omni. Didn't want it. Wouldn't of been to good with my internet connection anyway lol.

kutmustakurt - November 8, 2010, 10:58 pm

Exactly what others said. ?

@ HF Members

I was going to make a new thread but now will post in here:

Please DO NOT report a user's post as "Spamming" if you see same posts by him/her in a thread. This has become more frequent due to DB anomalies, instead report only one post as "Double posting". Staff always read the threads and will remove all the other posts. ?

If by any chance the posts is not removed then you may report it again but please avoid mass reporting all the triple or quadruple posts as Spam posting.

Thanks.

Grumpy - November 9, 2010, 10:17 am

Go to the Your Posts link, and click through to your post from there, should work.
