Da Loser - November 10, 2010, 10:15 am

Vouch for this guy, he is selling it for me, its a great deal, great bot, PM me if you wan't as well.

Da Loser - November 10, 2010, 10:48 am

(Nov 10, 2010 11:23 AM)temptnoc Wrote: [\[CITE\]](#) No offense. But why would someone buy this when they can grab asper bot instead. The features listed in your bot are nothing special at all.

Strip asper and add on a few functions and you pretty much have THIS bot.

ask that question to most bot's on hf, that are actually asper rips.

asper is old, and unstable, and full of memory leaks. so all these HF Bots will retain its problems.

While my base is lighweight , and stable, and I do have unique features.

Ynnah - November 10, 2010, 10:59 am

You can find all of these features in free sources here on HF, so why would anyone want to pay \$100 for this?

ca4life - November 10, 2010, 11:01 am

wow, 100\$ is alot in my opinion, but whatever :), good luck selling matee

Da Loser - November 10, 2010, 11:01 am

It's the source not exe's

I would sell exe's at \$25~ or so

(Nov 10, 2010 11:59 AM)Ynnah Wrote: [\[CITE\]](#) You can find all of these features in free sources here on HF, so why would anyone want to pay \$100 for this?

And find me hooked persistance, or http flood

?

Tate - November 10, 2010, 1:21 pm

I wouldn't suggest buying a bot with the name FuckBot. It's most likely by someone who needs a little cash, and didn't have time to think of a good name.

If that's not the case, he realizes he's marketing towards 12 year olds, and he's playing on your natural rebellionness by putting a curse word in the title.

OP, think of a better name. Using Fuck in the name isn't professional, which makes us think the bot

isn't professional.

The only reason OP put that in the name is because i called the project fuckbot due to being high, and raging. A more formal name would be better ?

xvisceral - November 10, 2010, 1:37 pm

You ask if people are tired of c/p asper rips but do not really supply anything special here that is not open source..

not saying yours is, but why not include something new

Da Loser - November 10, 2010, 1:39 pm

I did, http flood, real tcp flood, as well as registry persistence, that's not some lame loop checking for keys.

and in regards to your question. I could say that at the majority of BlackShades NET. ?

Nohandlebar - November 10, 2010, 1:49 pm

If you'd like people to consider your bot somehow "Good" I'd suggest adding the following things :

Make it run fully from inside explorer.exe or winlogon.exe

No process (Invisible)

File protection

and something that would make the bot's startup,registry invisible,hidden.

Da Loser - November 10, 2010, 1:52 pm

for your first statement , that would require direct code injection, which is just not practical, as you cannot inject a 32 bit executable into 64 bit processes, meaning the bot would only work on 32 bit machines.

and your seconds point := yeah a rootkit would have that effect.

I will consider making a usermode rootkit in the future.

+ name me a bot that has any of those features you stated o_0

??

There are also other 32bit processes that are on 64bit that you can inject into.

Da Loser - November 10, 2010, 1:56 pm

<https://hackforums.net/showthread.php?tid=399042&highlight=gbot>

gBot v2 is a rip of dci bot(Big boy asper) by iserdo, and it does not inject 64 bit processes. rather it creates the iexplore.exe process, and injects into that, as it is one of the few 32 bit process's on a 64

bit machine

Da Loser - November 10, 2010, 1:57 pm

That doesn't hide the fact that it is a great bot and its features are amazing. I know the coder
(fubar,pardon) and he is a good coder.

Da Loser - November 10, 2010, 1:58 pm

Yeah, I had replied after seing your post. and as you said, yep.

firefox.exe, opera.exe (the 32 bit version)

and its features are amazing. I know the coder (fubar,pardon) and he is a good coder.yeah it is a
good bot, but if you knew the whole story, it was not coded by fubar alone, jam3s did the majority of
the work on it. but now he's fucked off, noticed how gBot hasn't changed lately?
