It seems you are a n00b. Why did you scan the crypted file on virscan? The submit the samples to the AV companies

vienquay - November 13, 2010, 11:50 pm

Novirusthanks.org is also down for me. Anyways nice GUI there, but please move your buttons a little high because they're so close to the bottom. I may try this in the future. [Hope it's still FUD]

Cryptography - November 14, 2010, 2:08 am

Isn't this a RIP from carb0n's stuff??? No credits to him? Fuck you.

fuck_VAC - November 14, 2010, 2:23 am

isn't every crypter a rip from another crypter?

looks nice, though I cba to download it, just my 2cents.

move the buttons and labels to the top, and try to get some more contrast into the background, it's not easily readable.

also, 1005Kib? what the hell did you put into it? mine is 20KiB + 17KiB stub.

Cryptography - November 14, 2010, 2:27 am

:/.. Actually some people here make theirs from scratch + he didn't fucking put the credits.
