Valik ? - November 16, 2010, 1:54 pm

alfonzo1955 - November 16, 2010, 1:59 pm

I vouch for Nofear. Great member, glad he is back.

nofear1999 - November 16, 2010, 2:02 pm

Thank you alfonzo added your post to the list.

Invisible™ - November 16, 2010, 2:05 pm

I just came a little whenever I saw you took down Steam and Netflix. Good luck with sales bro.

nofear1999 - November 16, 2010, 2:07 pm

Thanks.

This can be used on ANY platform. Even on the PSP. Anything that has web browsers has ability to use this!

xvisceral - November 16, 2010, 2:07 pm

i don't see any unique sites here that every shell booter doesn't say that they take down..

and 98 shells is not much if many people are using

nofear1999 - November 16, 2010, 2:09 pm

xvisceral I was completely broke when I made this. When I make some money off it imagine how strong it will be.

Mine's also web based and contains a port scanner.

It is very low bandwidth and my friend says it looks beautiful on his iPhone.

I hope you're going first.

Yes and there are around 100 shells atm. I ONLY add shells that are over 100 mb/s upload. If they're a bit lower like 80 I'll still add it though. So think of around 100 shells that hit around 100 mb/s each.

Pretty rape booter IMO.

Oceanic - November 17, 2010, 8:28 am

Gotta love your high risk activities in the disclaimer. Now I cant sue you if I die will ddosing. Anyway. How long do you think it will stay up. im interested. pm me.

What about old Dosbox customers? Do they get this update for free or what? Dosbox 2,0(which I purchased before you were repfucked) doesn't seem to work any longer...?

nofear1999 - November 18, 2010, 2:42 pm

nofear1999 - November 22, 2010, 6:03 pm

Most shells last a few days before dying. By then I have moar xD.

The shells don't automatically remove the non working shells it just counts the amount of shells in the database.

Anyways I'm thinking of removing the port scanner (too much CPU and bandwidth and it's not even used that much) and replacing it with a donate a shell button :)
