Thread: [\[TUT\] How to use Havij for SQL injection](#)

Shannon R. - November 16, 2010, 9:29 pm

Introduction

Hello, I am going to show you how you can use Havij, to do a SQL injection attack.

Firstly you will require 2 things:

- Havij - [Download Here](#)
- A vulnerable site - [Vuln site here](#)

Steps

1. Firstly what you need to do is get your vulnerable site ready with the ID on the end, in this case "nwid=1658". You then need to enter the whole link into the Havij "target" bar.

Spoiler ([Click to View](#))

2. Once you've entered the link into the "target" box you need to press the analyze button. Let it go through until it has completed finding everything it needs to about the database.

3. Once it's done the Get DB button should appear clickable, click that. Inside there you will see the databases you need to find the one which contains user information in this case it's "rajsoft_mprealtynews", check the box next to it and press "get tables". After that another drop down will appear with a list of things. You need to find something that is associated with usernames and passwords, in this case "users". After you check users you need to press "get columns", that will then return the columns inside that table.

4. will create another drop down, and from there you need to find username and password, these are easily located. Tick both "username" and "password" then press "Get Data". Once you've pressed it, it will display every username and password on that DB selected, usually find the one with the username, "admin".

Extra steps

Once you have finished collecting all the data you can export it into a .html file, which will organise it and format it nicely into a table, for easy reading.

.Shannon

i love bald girls - November 16, 2010, 10:05 pm

Nice fucking tut man, I feel so cool even though I didn't do shit haha. I'm logged in as admin now, how would I upload my own like HTML code and shit to the index though and such?

Shannon R. - November 16, 2010, 10:09 pm

You could possibly do a re-direct, I'm pretty sure that site cannot be edited. Well it has been, but I'm not sure. Thanks for the rep also.

i love bald girls - November 16, 2010, 10:13 pm

(Nov 16, 2010 11:09 PM).Shannon Wrote: [\[CITE\]](#) You could possibly do a re-direct, I'm pretty sure that site cannot be edited. Well it has been, but I'm not sure. Thanks for the rep also.np you deserved it for the tut. Mind PM'ing me your MSN? I'm interested on how to do a redirect

Shannon R. - November 16, 2010, 10:15 pm

Yeah I'll PM you now, shame nobody else obviously needs this.

ranch54@hotmail.com - November 16, 2010, 10:22 pm

I tried to download Havij 1.3 But When I tried to Export it to Desktop It got me 2 Errors and I could Not : /

Btw Nice Tut .

Shannon R. - November 16, 2010, 10:26 pm

What problem are you having? You should download from the link I provided and extract it with WinRar, that way, you should get no errors.

bimalpun4 - November 16, 2010, 10:37 pm

Nice tut hahaha thats indian website i like it

Shannon R. - November 16, 2010, 10:39 pm

I didn't deface it. I am just saying, it's vulnerable.

scampers - November 16, 2010, 10:45 pm

Great TUT man ive been using Havij for a while but ididnt kknow the .html export thing

Shannon R. - November 16, 2010, 10:46 pm

Thanks. Yeah, it is useful for being able to copy MD5 encrypted passwords. It can't be done within Havij.

scampers - November 17, 2010, 1:00 am

ok i have the admin panel ill keep you posted on mai hackzking

ado11 - November 17, 2010, 8:28 am

very nice tutorial man but i still prefer good old manual way and i think(i dont think on you) most of havij users are n00bs

Again thanks for tutorial could be useful for newcomers on HF

kai132 - November 17, 2010, 12:31 pm

Powerful tool man ,thank you !

Shannon R. - November 17, 2010, 1:48 pm

This tutorial is designed for newcomers, that just want to "hack" sites.

mbN - November 17, 2010, 1:56 pm

Hey.

It's a nice tutorial an all, but it's just that it's kinda self-explainable.

But nice tut for those who couldn't figure it out.

Shannon R. - November 17, 2010, 8:44 pm

Thanks, like I said. Mainly for newcomers.

Show No Mercy - November 18, 2010, 6:21 am

Nice tutorial.. This is great for ppl who are lazy and don't wanna do it manually. It's also a nice method to upload shells..

worldhacker25 - November 18, 2010, 7:07 am

It is giving a problem in my comptuer the problem is

It is saying

Keyword Found: manufacturing

I guess injection type is Integer?! If injection failed, retry with a manual keyword.

Can't find db server type! But maybe there be some chances! [-o<

Finding columns count(MySQL,MsSQL 2005): 7

What is the solution of that..

Whygoup - November 18, 2010, 8:17 am

Wow this is a very useful and effective method.

Thanks for sharing your tutorial!

Time to test this software out!

iPwnage - November 18, 2010, 9:29 am

LOL

A facking tutorial on HOW TO USE havij

and i thought not doing it manually was cheap

Mudkip - November 18, 2010, 11:15 am

Next one is totally how to make people hack your sites.

Shannon R. - November 18, 2010, 4:08 pm

Don't blame me. I am just helping people that are new to SQLi.

iPwnage - November 18, 2010, 4:19 pm

Maybe help them with actual tutorials. They shouldn't know how to automate it before they fucking know how to do it themselves.

Shannon R. - November 18, 2010, 4:22 pm

Yes, but that is not what this tutorial is about. I am giving people an opportunity to just get the username and password for a vulnerable site. Perhaps you can make a tutorial on how to do it manually, because I'm pretty sure there is already 10 or so.

ff7827458fkwjf - November 18, 2010, 6:42 pm

Thank you! Very helpful tut!!

Shannon R. - November 18, 2010, 8:12 pm

No worries. Glad I can help you out.

Status - November 18, 2010, 8:51 pm

(Nov 18, 2010 05:19 PM)iPwnage Wrote: [\[CITE\]](#) Maybe help them with actual tutorials. They shouldn't know how to automate it before they fucking know how to do it themselves.

Wow way to be positive bro.

Seriously, if people want to do it this way they can.

I've already learned the correct way, and everyone has the opportunity too.

Shannon R. - November 18, 2010, 9:03 pm

Thanks Status, that's how I look at it as well.

Lassy - November 19, 2010, 1:21 am

(Nov 18, 2010 10:29 AM)iPwnage Wrote: [\[CITE\]](#) LOL

A fucking tutorial on HOW TO USE havij

and i thought not doing it manually was cheap

Its for the newcomers.

No need to flame.

Shannon R. - November 19, 2010, 2:06 am

Thanks Mystic, I guess some people are just born to flame.

Lassy - November 19, 2010, 2:07 am

Haters gonna hate I guess.

Shannon R. - November 19, 2010, 2:59 am

Really Petros, really? I already know, so don't flame my threads.

mastermindhacker - November 19, 2010, 5:42 am

How to put picture in website if it is volunable and Injected by Havij and gaved the password and logged in How to put if there is no option for uploadation of image

Tabaq - November 20, 2010, 2:11 am

woow thank you love you omgg <33

Noobsauce103 - November 20, 2010, 8:33 pm

damn dude great intro tutorial to using havij

thanks :) works perfectly

Shannon R. - November 20, 2010, 8:40 pm

No worries, glad it helped you out.

Frezzwar - November 21, 2010, 7:49 am

Wow, I just tried this, and it works fantastic!

Shannon R. - November 21, 2010, 1:10 pm

Thanks, I am glad I can help newcomers with SQLi

Petros - November 21, 2010, 4:52 pm

lol i tought it wasnt necessary to make a tut for havij.. ah well ..

TacticiaN - November 21, 2010, 5:51 pm

is it me

or it seems that program is very slow

???

Shannon R. - November 21, 2010, 8:53 pm

It takes a while to get all the information, just let it finish.

wick3dj0k3r - November 21, 2010, 11:40 pm

hey my exploit scanner is not working properly, when ever i use dorks n press scan sites it says 0 sites found to scan, so pls can anyone help me? its quite urgent

Shannon R. - November 22, 2010, 12:26 am

I'm not sure what you mean, are you entering the entire address? Not just the dork.

kool+kake - November 22, 2010, 12:28 am

Looks familiar.. hehe ?

Shannon R. - November 22, 2010, 12:37 am

What do you mean? I wrote this tutorial, I didn't rip it from anywhere.

kool+kake - November 22, 2010, 12:52 am

(Nov 22, 2010 01:37 AM).Shannon Wrote: [\[CITE\]](#) What do you mean? I wrote this tutorial, I didn't rip it from anywhere.

never said you ripped anything bru. ?

Shannon R. - November 22, 2010, 12:56 am

Just thought you implied that by saying "Looks familiar.. hehe". Sorry about the misunderstanding.

mills815 - November 22, 2010, 12:36 pm

man this tut helped me our so much! how do i find out how to get into there cpanel or direct admin to i can upload my own html page

Air0x - November 22, 2010, 12:45 pm

Nice tutorial, but I almost never use tools I do it 100% myself :D

wick3dj0k3r - November 22, 2010, 5:28 pm

(Nov 22, 2010 01:26 AM).Shannon Wrote: [\[CITE\]](#) I'm not sure what you mean, are you entering the entire address? Not just the dork.

hey dude i'm using these dorks in my reiluke exploit scanner

```
inurl:index.php?id=
inurl:trainers.php?id=
inurl:buy.php?category=
inurl:article.php?ID=
inurl:play_old.php?id=
inurl:declaration_more.php?decl_id=
inurl:pageid=
inurl:games.php?id=
inurl:page.php?file=
inurl:newsDetail.php?id=
inurl:gallery.php?id=
inurl:article.php?id=
inurl:show.php?id=
inurl:staff_id=
inurl:newsitem.php?num=
inurl:readnews.php?id=
inurl:top10.php?cat=

```

inurl:reagir.php?num=
inurl:Stray-Questions-View.php?num=
inurl:forum_bds.php?num=
inurl:game.php?id=
inurl:view_product.php?id=

i hope these are correct.

Shannon R. - November 22, 2010, 9:28 pm

They should be fine, but whenever you find a site, make sure you copy the whole link, not just the dork.

wick3dj0k3r - November 23, 2010, 8:36 pm

(Nov 22, 2010 10:28 PM).Shannon Wrote: [\[CITE\]](#) They should be fine, but whenever you find a site, make sure you copy the whole link, not just the dork.

my havij software is working fine, but my reiluke tool is not working proper what should i do?

when ever i try to scan it says 0 sites found pls help

Shannon R. - November 23, 2010, 8:58 pm

I'm not sure what you mean, can you explain a little better, please.

Genraven - November 24, 2010, 1:42 am

nice tut bro keep them coming

E V O - November 24, 2010, 2:08 am

really good tut, keep this work up. thanks again ?

Telhast - November 24, 2010, 3:54 am

I usually prefer other methods but this is very good . Now I ask - how do I get to know the id of the website ?

[edit] I would like to learn from you , in return I'll teach you backtrack or C++ or anything else .

Haterbreed - November 24, 2010, 4:39 am

Amazing tool !

But i dont know why it wont show passwords when i press "Get data"

Shannon R. - November 24, 2010, 4:41 am

Make sure you select the columns in which you want data from.

Haterbreed - November 24, 2010, 4:55 am

(Nov 24, 2010 05:41 AM).Shannon Wrote: [\[CITE\]](#) Make sure you select the columns in which you want data from.

Allready got it !

Keep it goin bro ! Its really fantastic tool

Telhast - November 24, 2010, 5:47 am

(Nov 24, 2010 05:41 AM).Shannon Wrote: [\[CITE\]](#) Make sure you select the columns in which you want data from.

Could you please tell me how to get to know the id of a website ?

Haterbreed - November 24, 2010, 7:02 am

What if im getting something like that?

Code Turning on 'bypass illegal union' and retrying!

Data Found: passwd=

Turning off 'bypass illegal union' and retrying!

Data Found: passwd=

Turning on 'bypass illegal union' and retrying!

Shannon R. - November 24, 2010, 8:43 pm

I don't know what the errors in Havij mean. You could try to determine what they are by doing a Google search.

Lassy - November 25, 2010, 4:06 am

Errors usually mean that it won't work with Havij, if your experienced try manual injection.

ogniK - November 25, 2010, 4:10 am

Great tutorial but i prefer to do it manually :P

ExtremelyDisturbed - November 25, 2010, 6:23 am

Dude... You rock.. Thanks a million

robincomp - November 25, 2010, 10:11 am

Nice TUT. But how can I put my own HTML code in?

Google inurl:nwid= to find websites.

ihacki - November 25, 2010, 6:39 pm

Best tut I have seem yet on this forum and looks easy do u think u could add my msn or just PM me on forums +1 rep

Best tut I have seem yet on this forum and looks easy do u think u could add my msn or just PM me on forums +1 rep

Shannon R. - November 25, 2010, 8:13 pm

Thanks alot guys, I just enjoy helping people out.

wick3dj0k3r - November 27, 2010, 2:15 am

(Nov 23, 2010 09:58 PM).Shannon Wrote: [\[CITE\]](#) I'm not sure what you mean, can you explain a little better, please.

ok sorry for the late reply, i opened my reiluke exploit scanner, i copy pasted one of the dorks in the scanner, and pressed the button scan, it tries for few moments and says 0 sites are available to scan..

first when i had this scanner it was working fine, recently i formatted my xp, now again i downloaded my exploit scanner now its not working proper. its been a headache for me.

can u please help me out. i hope u understood my problem.

Shannon R. - November 27, 2010, 2:17 am

I understand what you mean, but this thread is for Havij, not Reiluke Exploit Scanner. Sorry.

wick3dj0k3r - November 27, 2010, 2:18 am

i thought u might be knowing that, any how thanks for u r time

Langleyyy - November 27, 2010, 2:21 am

Amazing Tut Bro! Great contribution to HF.

Shannon R. - November 27, 2010, 2:34 am

Thanks alot, glad I can help you all out.

iamlegend2 - December 7, 2010, 4:18 am

do u know how to do basic auth vuln site with havij ?

thanks

#SYSTEM F?IL?RE™ - December 7, 2010, 7:51 am

Thanks you very mutch very Appreciated :)

WinnieThePooh - December 11, 2010, 1:19 am

Doh.

The programs says, than i need to pay for the pro version, to get the passwords and usernames..
:-(

Real King - December 11, 2010, 2:55 am

Very Nice Tut thnX bro. :)

el_ninio - December 16, 2010, 6:34 pm

Hey
Can anyone maybe tell me were can i get advanced version of the program without buying it ^^
Ty in advance

SOA - December 16, 2010, 6:59 pm

You should write a tutorial about "CMD Shell" and how to upload scripts and stuff.

Shannon R. - December 16, 2010, 9:42 pm

I'm only taking it this far. I don't really "hack" anymore, anyway.

Starwop - December 18, 2010, 3:38 am

Very nice tut indeed! Worked perfectly!

1. But how/where do i find the site ID? Is there a way, that i can "hack" a specific site?
Quote:1. Firstly what you need to do is get your vulnerable site ready with the ID on the end, in this case "nwid=1658". You then need to enter the whole link into the Havij "target" bar.
Thanks and again great tut! :)

Cyber`SoLdier - December 19, 2010, 6:20 am

Everything works i just cant find out the admin login panel -.-

Shannon R. - December 19, 2010, 2:26 pm

Sometimes they are difficult to find. You just need to keep looking.

THC420 - December 19, 2010, 9:17 pm

Thanks for the tutorial!!

Soldier of Courage - December 20, 2010, 1:18 am

It's a good tut for people just starting out learning SQLi to use the program and get a visual on what the different commands actually produce but I prefer to do it manually. Good job tho.

tayraN - December 20, 2010, 6:16 pm

Very nice tut indeed, works very nice :)

Bunk - December 20, 2010, 8:29 pm

I feel ashamed of myself, after manually doing it for so long. :P

Great tutorial.

hosting - December 21, 2010, 3:42 pm

great tool shared

hacked my first website through it

thx a lot

Shannon R. - December 22, 2010, 5:43 am

No problem. Glad I can help.

Coupee36 - December 23, 2010, 1:29 pm

How do you know if the site is vulnerable ?? is there a certain server suppose to be running ?? A site im looking at has IIS6.0 running and another has apache 2.0.52 running..

thanks.

rayven18 - December 23, 2010, 1:37 pm

Download link is down fix it please.

CyberDemon1337 - December 23, 2010, 1:53 pm

(Dec 23, 2010 02:29 PM)Coupee36 Wrote: [\[CITE\]](#) How do you know if the site is vulnerable ?? is there a certain server suppose to be running ?? A site im looking at has IIS6.0 running and another has apache 2.0.52 running..

thanks.

Put a Quote:' after the URL, if it's vuln then you will get an SQL error.

Defeat - December 25, 2010, 6:33 am

Very good program, it helped me alot, thanx for share!

ThE-iNFILTrATOr - December 25, 2010, 6:44 am

I won't use havij but thanks it will help others who use it

Pcottage7 - December 25, 2010, 8:30 am

thanks for this

i will appreciate it

Kitty - December 29, 2010, 5:15 am

thanks a lot. for a noob like me havij is a gift!! :D

Shannon R. - December 31, 2010, 2:17 pm

Yes, it is good for people who aren't capable of manual SQL injection.

Kaizee-x - January 1, 2011, 12:52 pm

Hey im a first time poster, i just saw your Mysql injection tut, very good, can u hack like, websites WITHOUT a id on the end? Because certain websites you can check whether they are vulnerable or not, but for my case i play online games such as habbo retros, how could you Mysql inject the

website as they dont have a ID code on the end? Please PM please, thank you.

hacc - January 1, 2011, 1:27 pm

What a useless tutorial. Havij is designed for people who know nothing about hacking, so if you need a tut for Havij, you're 110% retarded. (Dec 31, 2010 03:17 PM)Chimi Wrote: [\[CITE\]](#) Yes, it is good for people who aren't capable of manual SQL injection.

AKA retards. I think everyone should be able to learn SQLi its easy to learn hard to master.

Shannon R. - January 1, 2011, 3:13 pm

How about you go trash someone elses thread.

T@M3R - January 1, 2011, 5:36 pm

nice tut man..

and a very usefull one

Shannon R. - January 1, 2011, 6:04 pm

Thanks, glad I could help.

negnegnev - January 1, 2011, 10:30 pm

How would you go about finding other sites that have this Vuln? Would it be via a dork, If so what would It look like? <3

Awesome Tut by the way.

Numinous - January 3, 2011, 9:56 am

syperb Tut

But i wanna ask one thing

How we Find Vulnerable Sites??

hdhhh - January 8, 2011, 3:03 am

Very nice tut, easy to follow.

I have come to a problem though, call me noob but...

All the passwords have come up like: 77770DAE48A3847CA9AC12680954AD6D957D9680

Shannon R. - January 8, 2011, 3:05 am

They are most likely encrypted in some way. I can't help with decryption as it's near impossible for me.

Shannon R. - January 8, 2011, 3:13 am

Thanks, glad I could help.

Reported - January 8, 2011, 3:50 am

Sweet tutorial, even if havij is kind of cheating from using your brain :P

Shannon R. - January 8, 2011, 3:50 am

It's SQL Injection for beginners in my eyes.

Stpatrick05 - January 8, 2011, 2:11 pm

what type of id can we use with havij can you please make a list for them?

'HK. - January 10, 2011, 7:17 am

Thank you, seems to be working :-)

Sheephead24 - January 10, 2011, 11:49 am

Can you give us a list that we can try it out?

Because I downloaded the free version and it said it was vulnerable and then when I try to get columns of the usernames and passwords, it didn't work.

xadonyxus - January 12, 2011, 6:05 pm

Hello, anyone has a full version of havij?! Not the free one. thank you.

patrick0294 - January 12, 2011, 8:18 pm

I got the details but I cant log into the panel. Whats wrong?

admin

@AUM9893

iphonejuul - January 12, 2011, 8:58 pm

Thank you so much.

check your rep and i 5 stared:D

a.j - January 12, 2011, 9:04 pm

How do you find out if a site is "vulnerable" i been trying to hack alot of pure clan sites
thanks soooo much for this by the way

iphonejuul - January 12, 2011, 9:09 pm

(Jan 12, 2011 10:04 PM)a.j Wrote: [CITE](#) How do you find out if a site is "vulnerable" i been trying

Okay go introduce your self since its your first post:D

look in the main section at srbclche list next time:D

Here ill link you:D

Link: <https://hackforums.net/showthread.php?tid=954491>

Enjoy

a.j - January 12, 2011, 9:11 pm

sorry injection im new to the site :p i will be working on getting lots of post count soon

D4rKn3s5 - January 12, 2011, 9:39 pm

All this stuff can be done just as easily manually in fact it's actually funner. Plus eventually you will be able to hack sites that Havij says aren't vuln to SQLi.

Shannon R. - January 13, 2011, 1:26 am

Thanks guys, no worries too.

JSvensson - January 13, 2011, 8:36 am

Thanks mate for the great TUT relly appreciated! :)

Shannon R. - January 13, 2011, 3:03 pm

No worries orraao, glad I can help.

masoom55 - January 27, 2011, 9:56 pm

CAn u help me with havij I really wanna hack my first site?

Shannon R. - January 27, 2011, 10:04 pm

This tutorial should explain how.

Glorian1337 - March 31, 2011, 12:44 pm

Is gratisserver.nu, Bollnasteam.se, brutalcs.nu, vanilla.se vulnerable?

Shannon R. - March 31, 2011, 10:00 pm

No idea, try and find a dork.

zzGoWR - March 31, 2011, 11:03 pm

Thanks alot for the guide bro, I'm using it on that site right now Imfao.

I wish I could 5* this shit.

Shannon R. - March 31, 2011, 11:47 pm

Thanks mate, glad I could be of assistance.

BMO? - April 1, 2011, 12:23 am

didnt use havij but i used this for manual practicing so thanks for the site (:

Shannon R. - April 1, 2011, 4:27 am

No worries glad I could help.

amg64 - April 2, 2011, 4:41 pm

thanks bro,it help me much to using this tools..

BMO? - April 2, 2011, 4:51 pm

(Apr 2, 2011 04:41 PM)syabrembo Wrote: [\[CITE\]](#) thanks bro,it help me much to using this tools..and youre deemed a skid for using tools.

gratz.

Shannon R. - April 2, 2011, 5:16 pm

Hence why I made the tutorial, for the use of it.

immortal19 - April 2, 2011, 10:16 pm

Nice Tutorial...seems to be easay

Thank u

Swish - April 20, 2011, 11:50 pm

OMG. This is so awesome and so easy! I love it! Thanks

SuckMyDong - April 21, 2011, 5:55 am

Havij = Noob [Btw,if u need a tut for havij,u shouldnt be sql'n]

Do it manually,u will learn much more then from that skiddie program called havij and its much more fun,also the results u get with havij are poor,u will waste many hours sqlling with havij believe

me...Only thing thats good is that it outputs in HTML thats nice for if u got a big email/pass list,its all organized..

Just did this one manually,
Spoiler ([Click to View](http://bg-advertising.com/))<http://bg-advertising.com/>

Peace

Shannon R. - April 21, 2011, 3:57 pm

Why did you bother replying? If you don't like it, fuck off. I'm not here to please you and I don't expect anything from you and if Havij is so useless would I get 13 pages of replies, no idiot.

Stop thinking you know me, because I can manually SQLi.

eXtinct - April 21, 2011, 4:45 pm

I'ma deface the page just to test it out.

Shannon R. - April 21, 2011, 5:53 pm

Go ahead, not my page doesn't affect me.

eXtinct - April 21, 2011, 6:49 pm

The sites admin Panel's fucked up, 403 on the admin page, on the login page it says every password I tried 4 is incorrect including admin which is... admin @AUM9893 fucked up site?

meetcool - July 14, 2011, 4:55 am

wow great tutorial..very simple to do thanx

E?!M - July 14, 2011, 7:08 am

hey great job, thank you m8!!!!

nch.sniper - July 14, 2011, 5:44 pm

Does any one know how to do post sql injection via havij ?

N1T3ST4LK3R - July 26, 2011, 12:36 pm

Nice tut mate, easy to understand and straight to the point.Great job.

hackeye - October 10, 2011, 12:46 am

it's awesome just like the program.
13 colums I have to type >35 chars

H@KER - October 10, 2011, 4:09 am

very nice tutorial man. vouch for you.. thumbs up:D

dythe - October 11, 2011, 2:20 am

hello guys

I'M SEARCHING WHO KNOWS ABOUT HAVIJ

I'M WILLING TO PAID \$130

MY CONTACT YAHOO MESSAGE : dotarak@yahoo.com

lulzcat - October 11, 2011, 2:22 am

How the hell do you even get past the captcha when registering?

MsHummeri - October 11, 2011, 5:27 am

Tested it out myself on you'r "vulnerable" site, and found it out very useful. No, I didnt do any illegal things, just tested if it works.

So, my feedback will be that its an nice tutorial which even newbies can understand! :)

Clones - October 13, 2011, 2:45 am

Very nice sharing mate, thanks for sharing :)

March - October 13, 2011, 1:39 pm

Very nice Tutorial.

Now i need to learn how to find the vulnerable websites (:

Shannon R. - October 14, 2011, 11:25 pm

Good luck make, Google is your friend.

zzZSlashZzz - October 15, 2011, 12:46 pm

Great TuT! It worked out first try. Out of curiosity how do I log in as admin now?

nekro31 - October 15, 2011, 3:12 pm

Love the tutorial thanks dude. I just what to input something On step 3 tell people to click tables then click on the Get Db button cause i got lost a bit. But i really appreciate the tutorial its perfect :) thanks again.

Shannon R. - October 15, 2011, 5:07 pm

Thanks all, I'm so happy with all this positive feedback.

Alexandria_Skythe - October 15, 2011, 9:25 pm

i press get db and it says select columns ?

Shannon R. - October 16, 2011, 1:39 am

I'm not sure, just look around. I haven't used Havij in months.

Alexandria_Skythe - October 16, 2011, 1:40 am

lol i have i just gave up and whent back to Cybergate..

Jesse Pinkman™ - October 16, 2011, 5:19 am

Amazing that OP actually got +rep for this ><

Shannon R. - October 17, 2011, 4:59 am

Just trying to help out by posting a tutorial, not seeking rep. Besides I stopped this a while ago. It's good to keep it here for people that want to learn later.

punisher1509 - *October 17, 2011, 9:56 am*

im receiving error "Create Process Failed: code2 everytime I run the program!

Shannon R. - *October 18, 2011, 6:07 am*

What OS? Try running as an administrator.
