Thread: [CodeDom Problem !! where is the CodeDom DLL](#)

njq8 - November 17, 2010, 5:39 pm

hello HF

i make a program use Codedom

but the problem if some one run my exe and he dont have Microsoft Visual Studio 2008 .. the program will show Error

where to find CodeDom.dll to make it with my exe ?! or is there any other way?!

and pls dont tell me to download Framework bcz this not the problem
thnx

jdcx95 - November 17, 2010, 7:38 pm

Pretty sure you need to download the .NET framework.

lol

all .net version instaled

my program start normal but when you dont have Microsoft Visual Studio 2008 and you click button in my app use codedom

error will come to u :}

Could you give us the error please? Then, maybe someone can help you with your problem.

Razorfart - November 18, 2010, 5:41 am

Give us the full error box and we'll help you. Also posting the codedom button, if I understood it right would also help.
