Good work on those defaces! But why not leave country a religion out of this? From what I understand you do this in the name of Islam, but does the Qur'an really endorse actions like these? I'm not trying to bash Islam or anything, I'm just curious.

Does anyone else get tired of this script kiddie half ass in-the-name-islam shitty ass deface crap?

**RRRoooRRR** - November 19, 2010, 10:13 pm

Man if you go to the original site they all have a similar host provider, and the first one he didnt even hack, he just made a dir of his deface. Truth is, i doubt ADIL cant touch any of these sites, he dont use SQL to hack them and he wants us to believe he uses his "brain" to hack these sites. Man im sorry but i can see right through you, im not fucking gullible

**lord\_edz** - November 19, 2010, 10:47 pm

i confused... WHO really hacked it?

**RRRoooRRR** - November 19, 2010, 10:55 pm

Go to the admin directories of this site and youll see the truth, he's essentially taking the credit of other people that been there before him and placing it on his own, not cool

very awesome deface page ADIL i always loved them, keep up the good work bro

**MrBlah** - November 20, 2010, 1:28 am

i don't know who broke the deal but it wasn't the site owner who broke it. I like your work but i don't like you putting stuff like " U broke the deal" .. Restoring it right now. ?

Restored 30 out of the 33 sites here ? ... Adil bro.. don't take it personally . it's just that i don't want people to see you work and again start up with the religious defacement. :cheers:

hehe.. i knowww... as i mentioned before .. i was against the use of some words by ADIL on the defaced page.. which i think ADIL must have understood because that would just effect the already high level of tension between the groups ?

**Pregnant** - November 20, 2010, 11:14 pm
