Thread: [Aim Config 1.3](#)

?K47 - November 20, 2010, 3:08 am

This is a simple password changer for aim/aol accounts. What makes this useful is that when you are attempting to change your password, you must know the ASQ (account security question) in order to gain access to the account info and update the password. This program allows you to bypass answering the ASQ and just change the password straight up, nice little tool.

Aim Config 1.3

juaddy - November 22, 2010, 4:00 pm

thanks works great 4 using

imposter johnson - November 23, 2010, 10:59 pm

thanks bro this comes in handy!!!

krytos - November 29, 2010, 1:12 pm

thanks :) this is really helpful

?nxy - November 30, 2010, 1:10 am

Woah, this is sick! Will DL. =]

Nice work.

fknillest - December 1, 2010, 4:34 am

woah this is very handy. great job

ethan10th - December 1, 2010, 9:13 am

Thanks dude I am changing my password now :D

OfficialNutty - December 1, 2010, 6:47 pm

Surprised it actually worked lol..

Lord Pain - March 19, 2011, 7:03 pm

wow this works like a charm i would kiss u.

?K47 - March 20, 2011, 12:20 am

I'm one of few who only posts 100% working apps, but glad yall findin it usefuk ?

Robot - March 23, 2011, 1:35 pm

Sucks you have to remember your old password if this was a great tool it would say new password then at the bottom confirm new password then it would change it for you, but you still have too

remember your old password which is kinda lame. Props tho

Props tho You ALWAYS need to know the old password.... Since when have you ever been able to change a pass without knowing the old one unless your resetting it? No one can make a program that can just 'change' anyones password without knowing it... If they could AIM would be too vulnerable and no one would use it... Because any ol' skript kiddie can steal your screen name or what ever name they want if they got their hands on it.

Robot - March 25, 2011, 10:26 am

I never said I knew, I just said that it sucks that you have to remember the old password & it's like that's the whole reason to get into your mail, you minus well use the asq. Cause what if you don't know the old password? then it's useless.
