1. Open NotPad
2. Copy all the following code into the NotePad:
Quote:Windows Registry Editor Version 5.00

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion]
"CurrentBuild"="1.511.1 () (Obsolete data - do not use)"
"ProductId"="55274-640-7450093-23464"
"DigitalProductId"=hex:a4,00,00,00,03,00,00,00,35,35,32,37,34,2d,36,34,30,2d,\

[HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\WPAEvents]
"OOBETimer"=hex:ff,d5,71,d6,8b,6a,8d,6f,d5,33,93,fd
```

3. on left side of Save Dialogue box, click on "DESKTOP"
4. On bottom of Save Dialogue box, find something written "text Documents (txt)", click on it and click All Files.
5. Type the file Name as WIN.REG
6. Close notepad and open desktop
7. Double click on file, Win, thats now on your desktop. [it will have a green broken cuboid icon]
8. Click Yes and then Click OK.

IT WILL WORK

NO CHANCE OF VIRUS OR ANYTHING

AND

MICROSOFT IS LAME!

Also works on SP3 and that PE editions, who didnt fail validation a year back, but now do...

Will this work for all windows.

danidani123 - November 20, 2010, 8:40 am

If it's windows XP then yes.

Pulse? - November 20, 2010, 10:04 am

Is this confirmed to work? Anyone?? I want to validate mine.

danidani123 - November 20, 2010, 11:14 am

It works.

All you do is create a reg file. backup you'r system if you'r so afraid.

bizzboss - November 20, 2010, 1:30 pm

great tutorial buddy keep it up

desmassath - November 20, 2010, 4:30 pm

Thank you man, very useful!

h-boy - November 20, 2010, 5:22 pm

Ive used this method in the past and it worked for me

danidani123 - November 22, 2010, 11:21 am

great :)

thank's for you'r comments!

You should've posted this tutorial when people where still downloading windows xp, and having the not genuine error. This prob won't help anyone now.

Fallenbot - November 22, 2010, 1:05 pm

Your images are deleted, please re-upload them mate. Thank you,appreciated.

This is what I meant. Okay, I'll try this sometime.

DaRkOoO - February 26, 2011, 1:01 pm

Thanks, worked on Win XP SP3.

ENJOY!!!

sorry buddy , i copied it all , followed your instruction word for word and once i out the file on my pc , ran it , asked me to make changes to registry , i allowed it , restarted and boom , only 30 days left

th3tru3n00b - May 20, 2011, 4:04 pm

This really worked, thanks.

I know I'm a noob who still uses window xp.
