Thread: [\[VB6\] Adding Codejock Skin](#)

Moof - November 22, 2010, 9:35 am

For those who would like to add CodeJock skins.

Step 1:

-Download this Black Shades Style file and ocx files. (No virus, it's not an executable.)

Style Link: <http://adf.ly/Bekw>

OCX Files: <http://adf.ly/BeIE>

Step 2:

-Open your desired project.

-Go to Project -> Components

-Browse and find the Xtreme SkinFramework ocx control.

-Press OK

Step 3:

-Drag the skinframework tool from the toolbar to your form.

-Name the SkinFramework to: SkinzAreCool

Step 4:

-Insert this code into your Form_Load

Code Form1.SkinzAreCool.LoadSkin App.Path & "\bss-black.Style", ""

SkinzAreCool.ApplyWindow Me.hWnd

Step 5:

-Compile your exe.

-Make sure the style file is with exe at all times.

-Users will need the ocx files registered.

Finished Product:

Mr. Anderson - November 22, 2010, 12:50 pm

thanks for posting this! love the theme!

Cody™ - November 22, 2010, 2:55 pm

is this possible with .NET?

toshorttt

nice 10+! have you more styles? thx!

Damdomy - June 15, 2011, 12:14 am

Epic tutorial...

But were would you get the other skins? xD

Thanks

::TheH33X:: - July 8, 2011, 6:32 am

love it <3 thank you very much !!

MistaCode - April 18, 2012, 8:26 am

it gives me an error? please help? upload an project file or something.

namoney - April 18, 2012, 8:44 am

Good theme mate. I'm going to try it right now

Danalyzer - March 1, 2013, 8:20 am

thanks but i see if i remove bss-black

its show the program without skin how i make error if the file bss-black missing

?eumonic - March 1, 2013, 9:05 am

Check if it exists on load. If not, error out and exit. Not hard.

Danalyzer - March 3, 2013, 4:37 am

you can give me the code of the error message if i dont dont have bss-black

index.php - July 20, 2013, 6:03 am

Nothing is explained i compiled and shit nothing works still the same shit
