Thread: [Spy-Net Tutorial + Pictures!](#)

TheIceLord - June 4, 2009, 12:19 am

Hi everybody!

This is a tutorial teaching you how to use Spy-Net.

Spy-Net is a [R]emote [A]dministration [T]ool.

The creator already quit, so this should be the first & last one.

There are 2 parts to this tutorial.

Feel free to lock this if there is already a tutorial on how to use Spy-Net.

Required Downloads

[Spy-Net](#) (Password: Spy-Net)

A brain (Important!)

I hate long tutorials with too many words, so i'll make this nice and simple.

Part 1 - Setting up Spy-Net

Step 0

Portforward your router at [this](#) website.

Contains screenies at every step so you don't mess up.

Step 1

Go to <http://no-ip.org> and setup an account.

(Don't know how to do this? There's +10 guides on HF)

Step 2

Open Spy-Net and change the language to english so you acutally understand.
(Ignore this step if you understand)

Show Image ([Click to View](#))[IMG]http://i41.[censored].com/33nkmjp.jpg[/IMG]

Step 3

Open Spy-Net and create the plugin required to control victim.

Show Image [\(Click to View\)](#)http://i43.[censored].com/2d5lwj.jpg

Step 4

Upload the plugin somewhere and copy the direct download link. (www.website.com/file.exe)
(Ignore this step if you plan on keeping your computer on 24/7)

Show Image [\(Click to View\)](#)http://i43.[censored].com/28is4tx.jpg

Step 5

Choose the option "Send plugin by URL" and type your url.

Show Image [\(Click to View\)](#)http://i44.[censored].com/6r4tck.jpg

Step 6

Click on "New" to start creating server.

Show Image [\(Click to View\)](#)http://i39.[censored].com/29ypk3m.jpg

Step 7

Change the IP "127.0.0.1" to the IP you used to create the no-ip account.

Show Image [\(Click to View\)](#)http://i42.[censored].com/xp6a1t.jpg

Step 8

Choose whatever settings you want and click "Create Server"

Show Image [\(Click to View\)](#)http://i41.[censored].com/10pd9c7.jpg

Step 9

Spread your server by...

Seeding as torrent

Uploading as files

Infecting with virus

Part 2 - How to Upload

Step 1

Go to a site that gives direct download links

(Not the download page crap)

Show Image [\(Click to View\)](#)http://i43.[censored].com/2uzv790.jpg

Step 2

Upload the file and go to download link.

Show Image [\(Click to View\)](#)

Step 3

Click on your Address Bar and hover your mouse over the download button.

Show Image [\(Click to View\)](#)

Step 4

Type in the direct download link and click ok.

Show Image [\(Click to View\)](#)

(Note: Most upload sites change the URL of the direct download link occasionally.

To overcome this, upload it to a website or a forum, since those URL's never change.)

OR

You can simply tick the check mark to include plugin.

Makes server bigger, but saves the hassle.

Show Image [\(Click to View\)](#)

This concludes the tutorial.

All images have been hidden to save space.

evilalex - June 4, 2009, 2:02 pm

Cool man. I already use spynet, but please tell me how we get that plugin to upload!

ThelceLord - June 4, 2009, 3:38 pm

Thanks for the rep.

I'll edit the topic post to include the uploading.

JustinHit - June 4, 2009, 4:55 pm

It'll be nice if you defined what spy-net is as the intro. Thanks :)

ThelceLord - June 4, 2009, 5:22 pm

Sorry i'll fix it up now.

Spy-Net is a [R]emote [A]dministration [T]ool.

naminator - June 4, 2009, 5:48 pm

what is the password for the archive :(

Symbol - June 4, 2009, 5:53 pm

(Jun 4, 2009 05:48 PM)naminator Wrote: [\[CITE\]](#) what is the password for the archive :(

Should be
"Spy-Net" Without the quotes.

Red - June 4, 2009, 5:54 pm

Hey great guide, very easy to undstand,
cuts to the point,
wonderful. deserves rep

ThelceLord - June 4, 2009, 6:22 pm

Thanks for the support!

Btw, instead of wasting time uploading the plugin, why not just put it into server?

Makes it bigger, but removes the hassle.

evilalex - June 4, 2009, 6:27 pm

ThelceLord, i still don't get where you get the plugin.dat file...
edit: nvm im guessing you just check "include plugin"...

also:

I've been using spynet for a while now
i can't figure out the official way to make it go on startup
i put it on my sister's pc (hehe) and whenever she turns on her pc and log's in it comes up with like
something and then she has to click run...
any way to get past that?

ThelceLord - June 4, 2009, 6:30 pm

(Jun 4, 2009 12:19 AM)ThelceLord Wrote: [\[CITE\]](#) Step 3
Open Spy-Net and create the plugin required to control victim.
Show Image [\(Click to View\)](#)[IMG]http://i43.[censored].com/2d5lwj.jpg[/IMG]

Add it to registry, system folder and inject into explorer.exe.

Works for me!

evilalex - June 4, 2009, 6:44 pm

thanks!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

ThelceLord - June 4, 2009, 6:46 pm

I'm here to help.

Omerta - June 4, 2009, 6:57 pm

Sorry to doubt, but is the file uploaded by you or somebody else??

ThelceLord - June 4, 2009, 7:03 pm

It was uploaded by the creator of Spy-Net.

I'm assuming that I don't need to give credits for someone who uploads the download link?
Expecially when they made the program.

+*Alofoke* - June 4, 2009, 7:40 pm

(Jun 4, 2009 02:02 PM)evilalex Wrote: [\[CITE\]](#) Cool man. I already use spynet, but please tell me how
we get that plugin to upload!click on the victim and then summit plugin.

ThelceLord - June 4, 2009, 9:12 pm

I already helped him...

marjss - June 4, 2009, 10:05 pm

Gud post dude

It really helps to understand RAT

ThelceLord - June 4, 2009, 11:21 pm

Thanks!

With all the views, it's become a hot thread!!

Explo1t - June 4, 2009, 11:48 pm

dude, where can I download "A BRAIN"? ROFLMAO! ???

ThelceLord - June 5, 2009, 2:27 pm

Sorry, you must come equiped with a brain.

If you don't have one, you can't download any since their all viruses.

Zefaurios - June 13, 2009, 7:52 pm

Umm,My AV detects it as "Infosteal"? D:

And I tried to DL from another thread, and it detects it as "Backdoor" D:

Anyone help?

ThelceLord - June 14, 2009, 11:56 am

Well, it's supposed to be an infostealer since your going to be stealing information from your victim.

It's a backdoor so you can control the victim.

pantomine - June 15, 2009, 5:18 am

Kaspersky detected it as virus and automatically deleted the file. :(

The Icelord, I'm a newbie here and my question might sound silly to you.

I was alright till Step 6 but I got stuck in step 7. What do we have to replace the existing IP with?

Step 7

Change the IP "127.0.0.1" to the IP you used to create the no-ip account.

By the IP did you mean the email ID? Thanks in advance

ThelceLord - June 15, 2009, 10:26 am

Obviously a RAT is considered a virus

Create a no-ip account and download the autoupdater.

It will automatically update your no-ip IP to your current dynamic IP.

It pervents people from hijacking your infected victims.

pantomine - June 15, 2009, 11:49 am

Thelcelord, is the dynamic dns update client which must be autoupdater operates in vista? I just went through the operating system and vista wasn't listed. Thanks for the info.

ThelceLord - June 15, 2009, 11:50 am

Sorry.

Unfortunately, the update client does not support Vista at this very moment.

pantomine - June 15, 2009, 1:01 pm

Then it's not of my use. Anyways thanks for the tutorial.

ThelceLord - June 15, 2009, 1:48 pm

Your welcome.

69flyman - June 15, 2009, 2:35 pm

nice man thanks so much man

ThelceLord - June 15, 2009, 5:08 pm

Your welcome!

Tell me if you have any problems.

xtraesp - June 15, 2009, 6:07 pm

Thanks if i ever decide to try a rat ill use this.

ThelceLord - June 15, 2009, 6:42 pm

An excellent choice!

Vanitas - November 21, 2009, 12:31 am

I cannot find the plugin part on the new spy-net 2.6...

DefaceYoSite - November 21, 2009, 11:41 am

I can't find create a plugin..

rohamis - December 5, 2009, 12:39 pm

a question from a dummy:

so what this spy-net is doing? take remote control on other pc's or you can then control your own but from outside?

easytorrentz - December 6, 2009, 11:43 am

hi i have a problem , yesterday my port got blocked (15963)

så i need to forward port 81 ... can someone help me ?

ToLeGiT - December 10, 2009, 11:38 pm

thnx i now have my spy-net rat setup ?

Rikly - December 11, 2009, 1:57 am

very nice short tut. thx man!

LilWaynezz - December 11, 2009, 2:53 pm

Wish you would go into detail about portforwarding and etc I have read like 50 tuts+threads and just cant seem to get past finding my routers IP.... =_ =

Tyrone Biggums - December 11, 2009, 4:19 pm

Problem the download link for Spy-Net is Invalid Any way you can update this?

ThirdEyed - December 11, 2009, 5:02 pm

I heard SPyNet was backdoored yet again.

Tyrone Biggums - December 11, 2009, 5:43 pm

Ay shake anyway you can help me with this?

TANWEER HACKERZ - December 12, 2009, 1:46 pm

i use win spy.

i got free of cost.

Sangrija - March 12, 2010, 8:38 am

so i follow all the instructions (i can guess them by LOGIC!) and i create server, i save the server.exe to desktop and run it to see does it work, nothing happens... Only my mouse cursor shows that something is working in background and that is all. i can't see myself on the list and i used No-Ip DUC and i typed all my informations right. i Have ADSL if it means something. any help? i uploaded photos too see...

tmxhk - August 29, 2010, 6:58 am

Thanks for the tutorial much appreciated.

thejayanth - October 17, 2010, 7:51 am

I need some help in ports could you help??

i tried infecting myself to try it out before i spread it....so PLZ help

micikici - October 18, 2010, 2:29 am

Thanks for uploading :)

Helpful info

boy1 - October 20, 2010, 5:43 pm

Nice tutorial!!!

Tnx man

CursedPX - October 22, 2010, 7:34 am

Thanks for the Spy-Net TuT bro :)

Nice w0rk !

navilmoney - October 22, 2010, 4:46 pm

still having trouble setting this up

Kentred - October 22, 2010, 5:03 pm

Awesome tutorial. Great for beginners. Thanks!

kodex89640 - February 8, 2011, 12:19 pm

Which ports should be open?

B4M - February 8, 2011, 6:06 pm

Awesome tutorial mate. really helpful

mickafreeman - February 10, 2011, 7:11 am

merci bien je vais regarder ton tutorial

Nova Crypter - December 11, 2012, 4:03 pm

v.3.1 !! + Cracked :!

<https://hackforums.net/showthread.php?tid=3089071>

nazmi - December 14, 2012, 9:18 pm

thank you thank you thank you thank you!
