hack attack woohoo - June 5, 2009, 5:01 am

That's amazing thanks alot. I hope one or two are FUD cuz I really need to crypt something FUD right now. Either way these will come in handy ALOT.

1337God - June 5, 2009, 5:02 am

Good thread but you should but links for all , cuz some people dont have time to wait for 65 MB ...
so don't put em together

Which one do you like to use that gives you better FUD? thanks!

lockhead - June 5, 2009, 1:11 pm

WOW..
nice job dude. I was just looking for some crypters and binders ^^
thanks =)

fretan - June 5, 2009, 1:12 pm

good post indeed but ll will get detected soon ;(im lucky to have my own :P

RedPanda - June 5, 2009, 10:25 pm

Thanks alot I've been looking for a FUD crypter for a while now

IceOnFire - June 5, 2009, 10:59 pm

Thanks, did you just take these, put them in a file, then uploaded? Or did you test out each one? Because one had a trojan, not a trojan that its supposed to come with to work, but a trojan that kills anti-virus. Anyways thanks.

actually, some of these i have them long time and others i took from the HF, which one contains that?? thanks bro ?

IceOnFire - June 5, 2009, 11:12 pm

Ummm, i think it was Billy's or something like that. Anti-Virus deleted it to quickly, :P Haha

mana5olia - June 5, 2009, 11:20 pm

u mean Billar Joiner v1.5 ??

IceOnFire - June 5, 2009, 11:21 pm

Yea, thats it.

bro i am running NOD32 with the last update for it and just scanned the file again and nothing found, also here is the AV scan 4 virus total and nothing found also.

[Virus Total](#)

most likley its false positive bro ?

nikey_007 - June 6, 2009, 1:38 am

thanks man. awesome pack.downloading now.

EDIT:

Nod 32 wouldn't let me save the file. it says multiple threats. is it a false positive by a paranoid AV ?
or are some files in there infected?

Jetli - June 7, 2009, 3:26 pm

scanned it with kaspersky, over 120 harmful things in the pack :S my version is better then the one on ur scanner, mine is 8.0.0.506 newest one and because of this, kaspersky blocked over half of the stuff in it, the pack was 69mb and now its 61mb. Also, Because of that, it leaves alot of things in the pack useless, i'd say 50% or more

NewKlearBoy - June 9, 2009, 10:23 am

Did you scan for infections anyone ?

JustinHit - June 10, 2009, 8:51 pm

Y with the many crypters? Its either a FUD or not.

Tentacruel - June 14, 2009, 12:36 pm

Thanx For These hopefully Atleast One Is FUD

do you honestly think that novirusthanks doesnt distribute the samples? of course they do. these are viruses, and not distributing would violate some sort of legal obligation.

thanks for the pack mana5olia! you always post good dls

Internet - June 14, 2009, 8:23 pm

Thank mana5olia for the share

Jamz - December 1, 2009, 3:53 pm

do you know which one will work good with cerberus rat?
one that DOESNT fuck it up lol

ladnene - December 26, 2009, 12:56 pm

90% of them don't work , one erer apeare when i open them teling me : component
"COMDLG32.OXC" or one of its dependencies not correctly registered : a file is missing or invalid .
so please next time before you upload any prorams be chure that they work !!!!!!!!!!!!!!!!!!!!!!!

thanks for the great pack also that.

rockinteen - December 26, 2009, 1:49 pm

Downloading now, thanks.

Took me like 10minutes to find out where the damn save button was :/

Inca Kola - February 1, 2010, 10:54 am

lol y en a plein, au moin 100 !!! mais des pd on surement tt niker sur virustotal --'

Noob-Trainer - February 5, 2010, 3:20 am

:s Crap why do people do this?

If your gunna post a thread and have it be something useful ...

Posting a bunch of "crypters" on a forum isnt very cool man. The "crypter" wont be fud no more. Now if this was a folder filled with crypter source codes then that will be a different story. Because there are noobs that scan with virustotal.com and other archives as well. Some with antiviruses also. Just keep the crypters to your self because your the one whos gunna cry when you go to code a virus and crypt it and you find out your fud turns to 99 % fully detected. LMFAO!!!!!!

Btw, nice post. Must have taken you awhile to gather them up from the net.

dayan - February 5, 2010, 4:18 am

yeah ody dll it..nice combo , thx ?

Montana - February 6, 2010, 5:34 am

dude, look at the post date stamp (06-04-2009, 04:50 PM) its too old now, all of these now are for sure not FUD or even UD and treated as viruses and they are detected.

Aw Ma Gawd - March 13, 2010, 5:03 pm

thanks anyways..i guess i can use them for just binding the file..and use another one for crypting it
