Thread: [Learn How To Hack Facebook To View Private profile Pictures](#)

The Unknown - November 25, 2010, 8:15 am

A long time back i made a post on How to view private Facebook profile picture but after some time Facebook patched the vulnerability and the hack was no longer working. I have just found another hack to view private Facebook profile which i would be sharing in this article.

This hack will add a link above such photos with a link saying "See this Photo in its Album". Clicking this link will reload the photo, but you'll be viewing it inside the album that you couldn't view without this hack.

When you are viewing photos in an album the Greasmonkey script will add an option "Back to the album" This will remove the photo from the page and load a thumbnail gallery of all photos in the album

Requirements:

1. Greasmonkey addon for firefox ([DOWNLOAD LINK](#))
2. Facebook profile viewing script ([LINK](#))

Procedure:

1. First of all download Greasmonkey addon and restart firefox
2. Install the Facebook profile viewing script

3. Click install and restart firefox and you are done.

I tried someone who is not my friend list. He has got some hidden photo albums, and some of them are visible. But i can not see his invisible albums... Should he be in my friend list?

Thank you for tut.

Nice share i'm trying this later

Zeky - December 30, 2010, 8:26 am

I'm so going to try this later :)

1. It's old.
2. It doesn't work anymore. There is no "See photo in its album" link.
3. If the profile is private, you can't even open ONE photo to have access to that link. So it's useless.

Its not working any more why you post thread like this

dorumon234 - December 9, 2015, 7:09 am

Doesn't seem to work..?

Or is it just me doing it wrong?
