I used to show the sites I hacked on there but people were threatening me and trying to report me to my host so to keep from breaking any TOS rules from my host I removed them before my host saw them.

This thread is almost 15 years old buddy, you can still try to reach out OP by sending him a PM but he doesn't look very active (you need at least 10 posts for this, avoid LQ posting), you can use the search bar (I'm quite sure there are lot of more recent threads of this topic) or feel free to open your own thread in the right section if you need help

Don't forget to read the [Help Docs](#), enjoy your stay
