Thread: [\[COMING SOON\]iRAT V1.0 Beta\[COMING SOON\]](#)

eXero - November 27, 2010, 10:31 pm

Coming soon is iRAT V1.0 coded by Mia and eXero

iRAT is a current being coded by eXero (me) and Mia. We are working on this as our side projects, so it will be a while before it is released. This RAT will be really advanced, and it will be sold. We will be beta testing ourself. Our price is going to be cheap, and it will be an advanced, amazing RAT. We don't know of all the features yet, but there will be a lot. Our RAT is going to be the one of the most stable out there. Rarely dropping victims, and it will auto update itself when newer versions come out. Our price will not be ridiculously high, our price is to be ridiculously low. This is how ours is going to be different, and better than the ones out there. It will re-date the trend of paid RATS. This thread will be updated frequently. Please suggest features for us to add!

iRAT current progress: 12%

Greek - November 27, 2010, 10:34 pm

Will it be free? if so i would love to try it out :)

eXero - November 27, 2010, 10:35 pm

(Nov 27, 2010 11:34 PM)Greek Wrote: [\[CITE\]](#) Will it be free? if so i would love to try it out :)
Read the thread. It states it there.

Zero_Viscosity - November 27, 2010, 10:50 pm

Wait what?

I thought this was a RAT

Why is there a file pumper and crypter?

eXero - November 27, 2010, 10:56 pm

(Nov 27, 2010 11:50 PM)Zero_Viscosity Wrote: [\[CITE\]](#) Wait what?

I thought this was a RAT

Why is there a file pumper and crypter?

Because we want to include these options. Crypter to make the server FUD, file pumper to make the server bigger.

warhacker - November 27, 2010, 10:59 pm

iRAT has been released before if anyone remembers forbidden.

It was a java rat it was good then hes gone and hasnt been on for a very long time.

eXero - November 27, 2010, 11:03 pm

(Nov 27, 2010 11:59 PM)warhacker Wrote: [\[CITE\]](#) iRAT has been released before if anyone remembers forbidden.

It was a java rat it was good then hes gone and hasnt been on for a very long time.

We are too far into the coding and everything to change the name. Too bad for the Java RAT.

Zpirit - November 27, 2010, 11:58 pm

When you finish it, good luck with sales my friend.

French Montana - November 28, 2010, 1:09 am

If it seems good when you're done with it, I might buy it to try it out.

brainzucka - November 28, 2010, 1:19 am

Good luck with the coding, i will definitely look out for this

Selvest - November 28, 2010, 2:33 am

(Nov 27, 2010 11:56 PM)eXero Wrote: [\[CITE\]](#) Because we want to include these options. Crypter to make the server FUD, file pumper to make the server bigger.

That would be pretty cool if I must say.

Modesty - November 28, 2010, 3:10 am

Why use a datagridview if you can just use a Isitview which is a 100 times better for this...

Fallenbot - November 28, 2010, 3:15 am

Quote:Our price is going to be cheap, and it will be an advanced, amazing RAT.

Good luck with your sales & your RAT. Hopefully it will be stable (:

eXero - November 28, 2010, 3:16 am

I will try that out P Y R O.

EDIT: I can't seem to get that to work. We will figure something out.

Zeon - November 28, 2010, 3:34 am

Will it require port forwarding? (Please say no).

eXero - November 28, 2010, 6:13 am

It may or may not, we are not there yet. As of now, it does, but we may try and work it so it doesn't.

Zeon - November 28, 2010, 6:59 am

It would be beast if it didn't. It would make it completely different from other RATs.

Zpirit - November 28, 2010, 7:21 am

(Nov 28, 2010 07:59 AM)Zeon Wrote: [\[CITE\]](#) It would be beast if it didn't. It would make it completely different from other RATs.

All RAT's require port forwarding, and people think that UpNp RAT's dont have to be port forwarded, true you dont have to manually, but you router does it for you.

It's not hard to port forward.

fuck_VAC - November 28, 2010, 7:47 am

(Nov 28, 2010 12:03 AM)eXero Wrote: [\[CITE\]](#) We are too far into the coding and everything to change the name. Too bad for the Java RAT.

err, just change the Form's titles to anything other than "iRat" ? I can't see why this would be complicated.

Also, a paid RAT is more than outdated, I wouldn't expect many customers although you're very innovative, but so far I can't see anything what the free ones don't offer.

k

€dit:

just saw the pic you attached, and it looks like a RIP of public sources according to the functions you have so far.

Fake Message is very new, yep...

??c? - November 28, 2010, 8:32 am

Looking forward to this, I hope you'll have some beta testers would love to give that a go.

evade - November 28, 2010, 8:37 am

so what language are you programming this in?

eXero - November 28, 2010, 11:40 am

Our RAT is going to be the one of the most stable out there. Rarely dropping victims, and it will auto update itself when newer versions come out. Our price will not be ridiculously high, our price is to be ridiculously low. This is how ours is going to be different, and better than the ones out there. It will re-date the trend of paid RATS.

ind3siszive Wrote:so what language are you programming this in?Visual Basic 2008 is what we are

coding it in.

Zeon - November 28, 2010, 12:15 pm

It's not hard to port forward.

No, the new PHP RATs do not require it. Also, it's not hard for me, its impossible since I use a USB 3G modem.

Mr.BTC - November 28, 2010, 12:52 pm

this looks great but how much r u willing to charge people for this??

btw if your looking for beta tester i'll give that a try :D

eXero - November 28, 2010, 1:16 pm

Our RAT is only going to be around \$5 a license.

Zeon - November 28, 2010, 1:23 pm

It's coded in VB? Son, I am dissapoint.

Mr.BTC - November 28, 2010, 4:43 pm

(Nov 28, 2010 02:16 PM)eXero Wrote: [\[CITE\]](#) Our RAT is only going to be around \$5 a license. wow that's cheap :D

i'll give this a try once is out :D??

eXero - November 28, 2010, 5:06 pm

(Nov 28, 2010 02:23 PM)Zeon Wrote: [\[CITE\]](#) It's coded in VB? Son, I am dissapoint. Why are you dissapoint? I don't know C++ or C# and neither does Mia so we can't code it in anything else.

Tate - November 28, 2010, 5:07 pm

According to staff mia isn't welcome here anymore. Nice rat.

eXero - November 28, 2010, 6:17 pm

I never said Mia was coming back to HF. She is just my partner in coding this RAT.

??h™ - November 28, 2010, 8:34 pm

If it's in delphi I have some code you can use. PM me... :)

SIM-209986 - November 29, 2010, 5:07 am

I lost the whole interest, after I saw that the RAT is coded in .NET.

eXero - November 29, 2010, 6:13 pm

Why are you guys losing interest because its coded in VB?

tristan6100 - November 29, 2010, 7:41 pm

I would love to test it, but I got no money and you probably won't care about my feedback cause apparently I'm a "skid". For features I would say; Webcam viewer, Microphone in and out (as in you can hear him and you can talk to him), file manager, web redirect, some funny options (got too many to list) msn p2p and USB spread, a share option which would allow u to lend a victim but remove

him from the person who you lended the victim's list, chat box, and that's it for now. If you really want to make this THE best rat, make a client for the iPhone and droid but I'm not sure that's possible.

eXero - November 29, 2010, 7:47 pm

I may attempt the client compatible with the Droid and iPhone. Good idea!

tristan6100 - November 29, 2010, 8:05 pm

(Nov 29, 2010 08:47 PM)eXero Wrote: [\[CITE\]](#) I may attempt the client compatible with the Droid and iPhone. Good idea!

No problem. You should also add an msn controller so you can chat with the victims contacts with him (or her) knowing. If you still need beta testers count me in.

eXero - November 30, 2010, 2:56 pm

I might add that too. There is no specific release date, so I can add as much as I want.

Modesty - November 30, 2010, 3:16 pm

(Nov 28, 2010 07:13 AM)eXero Wrote: [\[CITE\]](#) It may or may not, we are not there yet. As of now, it does, but we may try and work it so it doesn't.

Add a listview, add columns and set it's view property to "detailed" and your done.

(Nov 29, 2010 06:07 AM)ThisIsMyNameIdiots Wrote: [\[CITE\]](#) I lost the whole interest, after I saw that the RAT is coded in .NET.

Lol naive little kid, I feel sorry for you.

HakkuR - November 30, 2010, 3:27 pm

Ill be honored to beta test that for you ~_~

eXero - November 30, 2010, 3:31 pm

lol sorry no beta testers guys. Me, Mia and SystemCrisis will be testing it ourselves.

All These Codes Are In This Source (The Auto Update If For The Stub)

LINK DOWNLOADED AND REMOVED

P.M Me If You Want Me As A Coder.

I Also Know C++ and can wright some FUD codes and artis.

HakkuR - November 30, 2010, 3:35 pm

(Nov 30, 2010 04:31 PM)eXero Wrote: [\[CITE\]](#) lol sorry no beta testers guys. Me, Mia and SystemCrisis will be testing it ourselves.

Well when ever you need someone thats good with RATS im a PM away man good luck with your RAT hey here a recommended feature to add. A speaker capture like audio capture but this time don't it comes from they speakers man.

eXero - November 30, 2010, 3:39 pm

Thanks HakkuR and lthasabika, but I will pass for now.

lthasabika - November 30, 2010, 3:46 pm

(Nov 30, 2010 04:39 PM)eXero Wrote: [\[CITE\]](#) Thanks HakkuR and lthasabika, but I will pass for now.
? Dam..

You got a very good coder and you just said "Ill call you back some day" and leeched my source.
But its ok...

If you want help you know where to find me.

eXero - November 30, 2010, 3:48 pm

Lol you think were going to use your source? Your crazy. I am just looking at it.

imposter johnson - December 1, 2010, 12:23 pm

Dont code it in vb, = .Net, people want it compatible 100% not 85% with other pc's. Would you prefer a 85% on a test or a 100%?

eXero - December 1, 2010, 7:58 pm

I don't have time to code it in another language, nor time to learn another language right now, and we know VB well.

Eshta - December 2, 2010, 2:22 am

WOW that will be great wish for you best money can you make a public version ?

Zpirit - December 2, 2010, 2:33 am

When this done, and if it is as good as it looks, I will buy it.

eXero - December 2, 2010, 5:39 pm

No public versions because of the amount of work going to be put into it. Thanks for everyone who is going to buy it.

tristan6100 - December 3, 2010, 6:34 pm

make sure the password stealer steals steam and make a "pro" version that steals payapl and CC info. but i dont think pro would be allowed here on HF

eXero - December 3, 2010, 6:39 pm

Good idea. I will try that.

sk8tr100 - December 3, 2010, 7:22 pm

this rat looks very simple, and it has no features for what you say i wouldnt buy this id rather have some other free rat better

eXero - December 3, 2010, 7:35 pm

Your an idiot and didnt read the thread. It is only 12% finished.

tristan6100 - December 6, 2010, 7:12 pm

Make a plugin feature which would allow people to code there features for the rat.

sk8tr100 - December 6, 2010, 9:51 pm

XD you should post a screen shot so we can see XD

JUAN9087™ - December 6, 2010, 10:22 pm

When it auto update I keep victims right, not like cybergate.

QontrolAltDelete - December 6, 2010, 10:31 pm

Lol.

There are a lot of noobs here but i guess they are still learning.

It is a RAT it just has multiple features (DDoS, binder, crypter, file pumper)

Making this RAT better.

eXero looking good bro.

Can't wait for release.

Will the RAT have a theme to it ?

Dot Net Bar or something ?

versx - December 6, 2010, 11:21 pm

Curious to why you're using a DataGridView instead of a ListView? ?

Zpirit - December 7, 2010, 2:52 am

I hope this is going to be as good as it seems....keep it up!

eXero - December 7, 2010, 5:07 pm

It will be as good as it seems, no dropped victims when updated, still being developed, nothings final yet.

stinkoman - December 7, 2010, 7:35 pm

So pretty much a nice Rat with a crypter for a low price. I'm interested will keep a tab on you and your progress.

Keep up the good work man.

Boing - December 8, 2010, 1:33 am

What about making a phpRAT? So everyone can use it without portforwarding =D

BTW, seems a nice RAT ;)

GiGz - December 8, 2010, 4:33 am

I would be happy to try this rat :)

But don't post it without putting a passwords to decrypt if you don't want n00bs to touch the crypter and scan on virus-total...

Risheng - December 8, 2010, 4:37 am

It looks pretty good buddy, good job and good luck ! :)

eXero - December 8, 2010, 5:07 pm

Noo not a nice RAT with a crypter, it's going to be so much more. Just wait.
