fireflyyy - November 28, 2010, 3:27 am

Own'z Crypter 2.2.6 & Cybergate Tutorial + Scan

Attention!! This is ONLY for Own'z Crypter Users!!?

P.S.--> I Use always same Pictures for Cybergate becuse the Settings are always the same, only change on Own'z Crypter'Z but sometimes Settings on Cybergate Change!?

This is my New Tutorial for Own'z Crypter and Cybergate, and it will make it FUD and Fully Slave Restart

You Will Need own'z Crypter and Cybergate 1.07.5

Own'z Crypter 2.2.6 can be Found Here <https://hackforums.net/showthread.php?tid=774486>

Installation--->

[\[IMG\]http://img534.imageshack.us/img534/7458/installationx.png\[/IMG\]](http://img534.imageshack.us/img534/7458/installationx.png)

IMPORTANT!!

If you want add fake error Click on "Message" and add it, you can only add Fake error here, Answer's is on FAQ.

Anti-Debug--->

[\[IMG\]http://img27.imageshack.us/img27/9049/77844115.png\[/IMG\]](http://img27.imageshack.us/img27/9049/77844115.png)

Create Server--->

[\[IMG\]http://img528.imageshack.us/img528/8705/createserver.png\[/IMG\]](http://img528.imageshack.us/img528/8705/createserver.png)

Own'z Crypter 2.2.6--->

[\[IMG\]http://img832.imageshack.us/img832/9427/zcrypter226.png\[/IMG\]](http://img832.imageshack.us/img832/9427/zcrypter226.png)

Note: Changing Icon and Cloning File helps make it FUD

Startup's Description:

All Startup's Have Persistant!

Startup 1-->standard startup normal this use name msdua.exe and dont use the name you write in Cybergate.

Startup 2-->startup strong 1 key, normal method and this use your server name you write in cybergate

Startup 3-->heavy startup, this make 2 key, one normal, another with reflection assembly this use too your server name you write in cybergate

The Drops:

- Spoiler ([Click to View](#))
- 1 • HKCU Droop To Path: \Microsoft\MSN Messenger\msdua.exe •
 - 2 • HKLM Droop To Path: \Application\Data\Microsoft\IdentityCRL\production •
 - 3 • HKCU Droop To Path: \Application Data\Microsoft\SystemCertificates\My\Certificates •

Test's in Diferent OS Complete... Thanks to nelec??

Update for 2.2.6

I tested the version 2.2.6 of Own'z in different os, that's my result.
tested with Cybergate 1.07.5 ; in all case (except in x64), the server works ; I've tested the possibility of restarting the server

WINDOWS XP SP3

Spoiler ([Click to View](#))Startup1 + 3DES + Compressor => restart OK, REG OK
Startup2 + 3DES + Compressor => restart OK, REG OK
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows 7 32bits With UAC

Spoiler ([Click to View](#))Startup1 + 3DES + Compressor => KO no record in REG, so restart KO
Startup2 + 3DES + Compressor => KO no record in REG, so restart KO
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows 7 32bits Without UAC

Spoiler ([Click to View](#))Startup1 + 3DES + Compressor => KO no record in REG, so restart KO
Startup2 + 3DES + Compressor => restart OK, REG OK
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows Vista 32bits With UAC

Spoiler ([Click to View](#))Startup1 + 3DES + Compressor => KO no record in REG, so restart KO
Startup2 + 3DES + Compressor => KO no record in REG, so restart KO
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows Vista 32bits Without UAC

Spoiler ([Click to View](#))Startup1 + 3DES + Compressor => KO no record in REG, so restart KO
Startup2 + 3DES + Compressor => KO no record in REG, so restart KO
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows 7 64bits With UAC

no test because no change in changelog

Conlusion :

To work in all case, use startup 3

NOW IF YOU WANT BIND FILES TO YOUR SERVER

Now To Bind Your Server With Another File Just Add it with Own'z Tool'z

Go to Own'z Tool'z and on BINDER add the server and the files you want to bind... then go to "Options" Set Your Settings... Then "COMPILE"

if you have any question see in FAQ BEFORE POST...

FAQ

Q: Can i Check Option "Melt File" on Cybergate's?

A: No, Becuse it have error's with compatibility, and that answer can be applied too for "Google Chrome Passwords", "UPX Compress" and "Delayed Execution"

Q: Why I cant put Error Message in crypter unlike the cybergate?

A: Becuse when Victims Restart they will see always that error, unlike Cybergate,, becuse on cybergate at slave restart dont show again the fake error

Q: Cybergate's Anti-Debug can be all checked?

A: Yes...is not all anti-debug working with crypter, like anubis... but no problem, they run normal... no errors...

Q: Why i cant Bind a file with cybergate, and ownz crypter? Why Only with Own'Z Tool'Z??

A: Becuse if You add with ownz crypter section or Cybergate, when slave's restart it will open always the Binded File... so "Not Recomendado".

Q: Wath Settings i should not use in tab "Options Startup" on Own'z Crypter?

A: You Should not Use the "Kill Firewall" and "Disable Restore Point" becuse it makes it DETECTABLE in RUNTIME

Q: The Crypter is Compatible with 32&64 Bits?

A: Yes!!

Q: Can i Put change icon on Ownz Crypter?

A: YES!!

Q: The Crypter Had Persistent Function to Prevent slave's Delete Server?

A: Yes, All Startup's have Persistent(Startup 1, 2 and 3)

Q: Taskmanager shows it as Form1 in the Window list, and on process show's our named Server in Cybergate, is That Normal?

A: c6p0 Fixed This Problem

Q: Does "USB Spread" and "Block Anti Sites" work with this?

A: Yes it Works Now with 2.2.6!

Q: Does the uninstall feature of cybergate still work when im using injection with ownz crypter?

A: No, unfortunately no... BUT HAVE ALWAYS A SOLUTION you can update server with A Diferent MUTEX and Still the 2 Servers, but only one will be active, the last updated.

If your question isn't in FAQ... Post here your FeedBack and i will assist you... Thanks

Startup 1-->standard startup normal this use name msnu.exe SO dont use the name you write in

Cybergate.

Startup 2-->startup strong 1 key, normal method and this use your server name you write in cybergate

Startup 3-->heavy startup, this make 2 key, one normal, another with reflection assembly this use too your server name you write in cybergate

and about the error, RE-EXTRACT the crypter and run again

Read Before Post!

SmokeWeedEatYogurt - November 28, 2010, 11:14 am

Still messes up my server after following your tutorial.

-=King=- - November 28, 2010, 12:06 pm

upto my knowledge the startup3 only works after the restart .

SmokeWeedEatYogurt - November 28, 2010, 12:16 pm

My bot does not connect after crypting using what you have provided. IT DOES before.

InvisbleMaster - November 28, 2010, 12:18 pm

I get Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 21:14:22

what about it ? :/

fireflyyy - November 28, 2010, 12:26 pm

That's A Bug of crypter, c6p0 need fix it

-=King=- - November 28, 2010, 12:40 pm

anyway ur work is awesome and useful to know abt the crypter quickly, continue ur work fireflyyy

efkariux - November 28, 2010, 12:40 pm

You should make one with DarkComet 3 settings mate <33 THANX

DuctTape - November 28, 2010, 12:49 pm

Dude, best tut ever

If i could rep I would. But, instead, Im gonna say this.

I LOVE YOU FOREVAR!!

crazy_shane - November 28, 2010, 1:06 pm

Dose the crypter it self need net 4 ?

fireflyyy - November 28, 2010, 1:28 pm

(Nov 28, 2010 01:49 PM)MintHacks Wrote: [\[CITE\]](#) Dude, best tut ever

JIT Debugging

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

BeGLethal - November 28, 2010, 2:35 pm

Well this is my first post ever but
really nice tut just tried it out and works perfectly

JIT Debugging

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Use A proxy to login with Own'Z Crypter!

efkariux - November 28, 2010, 5:04 pm

You should really make a tutorial about what settings to use on darkcomet 3 to be able to FUD crypt your server with ownz crypter <3

thanx,

efka

r3m1x - November 28, 2010, 7:25 pm

thank you! this is awesome! btw, does anyone know if there is a binder that does something similar but with .jpegs? or .gifs? is this possible?

kingfisher - November 28, 2010, 8:43 pm

thx for this you really helped me..

Vort2 - November 29, 2010, 5:48 am

firefly how will I use a proxy to login to Own'z crypter? any directions?

I know to use a proxy only to enter to websites

Mohammish - November 29, 2010, 8:08 am

Lovely... Thanks alot for this guide!

fireflyyy - November 29, 2010, 10:35 am

(Nov 29, 2010 06:48 AM)Vort2 Wrote: [\[CITE\]](#) firefly how will I use a proxy to login to Own'z crypter? any directions?

I know to use a proxy only to enter to websites
use the same method...
change in settings in your browser...

Risheng - November 29, 2010, 11:15 am

I LOVVEE YOU ! :D Thanks a lot !

keezzy619 - November 29, 2010, 4:55 pm

Auto EOF unchecked usually lets me crypt my file

mordred111 - November 29, 2010, 6:48 pm

Thanks for the tutorial. What file do I put in the clone file option?

byron675 - November 29, 2010, 6:49 pm

I need help with ownz crypter i followed his tut and had all the settings he had but i did it once and it workd but then when the slave/slave shuts down there computer i loose them as a slave, i think its because a verification pops up asking if they want to run that file how do i remove this to wear it opens automacticly without verification? just private message me or post below to help me(:

Arsi - November 30, 2010, 1:10 am

Thanks so much for this bro

BeGLethal - November 30, 2010, 9:47 am

I may have a really stupid question but if you own a .com website is there any way to use this as a server instead of no-ip ? if your using cybergate...
thanks in advance

fireflyyy - November 30, 2010, 9:52 am

(Nov 30, 2010 10:47 AM)BeGLethal Wrote: [\[CITE\]](#) I may have a really stupid question but if you own a .com website is there any way to use this as a server instead of no-ip ? if your using cybergate...
thanks in advanceLol, a WEBSITE??
no, I think no...

BeGLethal - November 30, 2010, 10:09 am

(Nov 30, 2010 10:52 AM)fireflyyy Wrote: [\[CITE\]](#) Lol, a WEBSITE??
no, I think no...little bummer haha i'll stick to no-ip then but just wondering apart from your own IP an no-ip are there any other options

matz - November 30, 2010, 8:34 pm

nice crypter...
its work and FUD =)

Jasabi - December 1, 2010, 3:47 am

i dont understand... did everything stated in the tutorial and yet my server always gets corrupted and doesnt load on my victims pc!
i dont know what im doing wrong. using cybergate with all the correct settings.
can anybody help?
Edit: just tested it on a victims pc and it seems to just be crashing when i upload and run it

morgan150 - December 1, 2010, 3:49 am

Thanks mate! nice tutorial! :P came in handy ;)

Cybomber - December 1, 2010, 1:36 pm

Thanks for the tutorial. I'm using cybergate. I'm kind of new to crypters and have a couple of questions if anyone could help me out.

What does the file clone do exactly and how do I use it? I'm assuming it does something like copy

the info of a legit program or something? Does this have any use other then for looks? Like what if I'm just installing a new server on a slave I already have? Any reason to use this option?

Also what's the stuff in the Own'Z Tool'Z section? Can I just ignore that stuff for now?

c6p0 - December 1, 2010, 1:41 pm

dont forgets !

with free version cybergates .

examples:

password recovery detected by UAC and uac block cybergate ...

not fault my crypter you loose your server .

for cybergates bypass uac with all functions i recommend you buy it!

Cybomber - December 1, 2010, 2:02 pm

I have a paid version of cybergate. When I try to crypt a file using this tutorial I get "Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 4:34:05 AM"

Any idea what this is from?

UPDATE- seems like this problem cleared up after a reboot of my computer. Now my problem is that the server didn't work on the one client I tried it on.

KaLaMiiTy - December 1, 2010, 4:10 pm

i use this to fud my server but my victims cant connect.

Jasabi - December 1, 2010, 10:27 pm

(Dec 1, 2010 03:02 PM)Cybomber Wrote: [\[CITE\]](#) UPDATE- seems like this problem cleared up after a reboot of my computer. Now my problem is that the server didn't work on the one client I tried it on.Quote:i use this to fud my server but my victims cant connect.

same problem, followed the tutorial perfectly

server seems to work on xp but it just crashes on vista/win7

BeGLethal - December 2, 2010, 4:57 am

Fireflyyy have a lil Q everything works but if I want to look into the files of the slave the only folder that doesn't want to load is Documents & Settings any help ? Can't find any problems.

KaLaMiiTy - December 2, 2010, 6:01 am

this is what exactly happens to me too. anyone know how to fix it.

(Dec 1, 2010 04:47 AM)Jasabi Wrote: [\[CITE\]](#) i dont understand... did everything stated in the tutorial and yet my server always gets corrupted and doesnt load on my victims pc!

byron675 - December 2, 2010, 6:38 pm

Firefly? can u bypass the UAC?

ryuji296 - December 2, 2010, 9:09 pm

another problem is the start up problem... its not working...

DBag4Life69 - December 2, 2010, 10:05 pm

Ohh my god.

I found this tutorial, and I would like to use this crypter to follow this, but for some reason the password is too hard to get.

I don't know what the deal is, but the guy who put the password on there didn't explain clearly.

I need help finding the password, or I just need someone to please PM me the password, you choose.

I would prefer some help in FINDING the password, but it'd be faster to just tell me.

ryuji296 - December 3, 2010, 5:21 am

There's a reason why they put that kind of password.

And that is, separating the ones who worth it and doesn't

sorry for the double post... i can't delete the other 1 bcuz of insufficient rights...

ryuji296 - December 3, 2010, 5:23 am

There's a reason why they put that kind of password.

And that is, separating the ones who worth it and doesn't

gammatester - December 3, 2010, 5:25 am

thank you man.

really helped me a lot :)

tristan6100 - December 3, 2010, 5:31 am

This isn't working on win7 x64, very nice tut btw

fireflyyy - December 3, 2010, 8:05 am

(Dec 2, 2010 07:38 PM)byron675 Wrote: [\[CITE\]](#) Firefly? can u bypass the UAC?

My answer is "Yes".

But isn't on crypting!

is by creating a simple UAC auto-de-activate or buy Cybergate

tcrwt1 - December 3, 2010, 11:00 am

Still can't seem to get this to crypt from Win7 64 bit... is this likely to be changed any time soon?

EDIT: Also, it won'y connect after crypting... it connects fine prior to being crypted, but afterwards nothing happens...

yoyoatw - December 3, 2010, 2:38 pm

Are you going to make the DarkComet 3.0 Tut yet?

fireflyyy - December 3, 2010, 3:49 pm

Yes, When i get time man! I'm Very busy with make a new computer for me, now i am buying part's of CPU... XD

but i will do it for Cybergate.

For Dark Comet i will do it if i have time!

ok?

byron675 - December 3, 2010, 5:28 pm

(Dec 3, 2010 09:05 AM)fireflyyy Wrote: [\[CITE\]](#) My answer is "Yes".

I would prefer some help in FINDING the password, but it'd be faster to just tell me.

well first off all own'z crypter isn't for noobs (no offence) so if you cant crack the pass you probably shouldn't use is ;)

(Dec 3, 2010 07:09 PM)matz Wrote: [\[CITE\]](#) this is my problem....

im use version 2.2.6still have that same problem it was told it was fixed by c6p0 but it still doesn't work but its not a big deal if you infect someone who doesn't know anything bout computers they still dont know what to do they dont even know they are infected xD

btw when slave restarts its also shown as Form1 in task manager...
hope this gets solved that would be great ;)

shifa786anjum - December 4, 2010, 5:11 am

lolzz Own'z Crypter updated 2.2.7

byron675 - December 4, 2010, 8:50 am

Has anybody figured out how to bypass UAC?

SHARB - December 4, 2010, 9:28 am

I was trying my Server file in my Friend Pc but i get this error can help?

when you open server file you get this warining !

[img]<http://img208.imageshack.us/img208/949/erroorn.png>[/img]

sk8tr100 - December 4, 2010, 7:15 pm

very good tutorial i like xD

eleaticzen - December 5, 2010, 5:59 pm

after crypting cg server with ownz, the file becomes 7kb only.

i am correct?

shifa786anjum - December 6, 2010, 2:36 am

is this work with 2.2.8 update?

ColdsundMOMO - December 6, 2010, 10:50 am

could somebody help me?

I cant start the crypter anymore!!!...if I try to start Owmn'z Crypter i get this error:
"Object reference not set to an instance object"

someone an idea?

el_ninio - December 7, 2010, 4:33 am

Hello

Will you maybe make any update how to crypt the server with 2.2.9 version
Ty in advance

fr332play - December 7, 2010, 7:22 am

(Dec 7, 2010 05:33 AM)el_ninio Wrote: [\[CITE\]](#) Hello

Will you maybe make any update how to crypt the server with 2.2.9 version
Ty in advance

make an update sir needed it badly LOL ^_^

Walking Hell - December 7, 2010, 9:55 am

tobad i cant get this to work on 64x systems :/

klex - December 7, 2010, 11:18 am

not working with 2.2.9 on win xp x32

tcrwt1 - December 7, 2010, 12:04 pm

Not sure what to do about this:

String reference not set to an instance of a String.

Help would be much appreciated.

EDIT: Somehow retried and couldn't get this error again. Never mind.

OKAY, new problem.

when I want to bind my crypted server, this somehow makes it detectable by 5/16, when the original server, when crypted, was 0/16. anyone know why this is? Should I crypt again after binding? I am only binding to a harmless help.exe...

Dark Randy - December 7, 2010, 8:45 pm

does this also apply to ownz crypter 2.2.9 also?

saru4141 - December 7, 2010, 11:31 pm

It's not working for me, can some body help me out, i am using 2.9 Own'z crypter!!

eXpLoD - December 8, 2010, 2:42 am

So i made the settings just like in the image,i got 30 downloads and i saw only 1 connection which vanished after 1 minute..

Fallenbot - December 8, 2010, 8:11 am

Very useful tutorial mate. It'll help many people who having problems with it.

jamesbebbby - December 9, 2010, 5:33 am

Hey, Not working anymore

Spoiler ([Click to View](#))

What he said.

Spoiler ([Click to View](#)) Sorry, no porn in this spoiler..

Im Sticky - December 10, 2010, 10:58 am

Own'z Crypter isn't Fud anymore.

diojna - December 10, 2010, 5:30 pm

hey all, i have a problem that i could use some help with. i was testing the crypter and accidentally left the error message on and now even though i uninstalled my rat the error message pops up every time i restart my computer. any suggestions?

Sin|orD - December 11, 2010, 3:16 am

anyother FUD Crypter which is compatible with CyberGate?

SHARB - December 12, 2010, 6:12 am

We Need one Good Tutorial Works Well For new Hosting and version !! 100%

Thanks And we are waiting...!

fogle6 - December 13, 2010, 12:54 am

i always get this.. Erreur : Attempted to read or write protected memory. This is often an indication

that other memory is corrupt. - 2:54:36 AM help?

RoXaN - December 13, 2010, 7:06 am

Note: Changing Icon and Cloning File helps make it FUD?can you explane me wat is cloning file?

H4dr0 - December 13, 2010, 10:32 am

when i click crypt it give me this error : Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 7:30:37 PM

shifa786anjum - December 15, 2010, 7:25 am

hello frnz move on my Signature tutorial for new version 3 :)
n THX fireflyyy u also helped us a lot :)

pistevo - December 16, 2010, 5:14 am

thanks a lot. iam not understand from where i download the crypter.can anybody help me???and idont knoe how decrypt the pass.thenks alot.

orangemist - December 16, 2010, 11:15 am

Need a new crypter guys lol :(

Diamond Supply Company - December 25, 2010, 6:44 am

This no longer works, if you Tick EOF it doesnt crypt and if you remove EOF it corrupts it.

fireflyyy - December 25, 2010, 12:56 pm

i'm working on new tutorial but first is Private Tut just wait and see here
www.ownz-crypter.com/index.php

Risheng - December 25, 2010, 5:08 pm

Very nice tut. Simple & friendly, just perfect.

123 ich bin ein ei - December 26, 2010, 5:06 pm

thanks, this works perfectly. 100% fud and not corrupted

edit: one quick question, the ownz binder is not fud? which public one is fud? if there is one

Sin|orD - December 27, 2010, 2:54 am

(Dec 25, 2010 01:56 PM)fireflyyy Wrote: [\[CITE\]](#) i'm working on new tutorial but first is Private Tut just wait and see here www.ownz-crypter.com/index.php

I saw your great TuT on Own'Z forums for 3.1 + CG - I did all the steps you said but when executing the server it failed to inject into winlogon.exe and give some error there.

[img]<http://sinlord.fileave.com/winlogon.JPG>[/img]

So can I change injection method in Ownz Crypter ? winlogon to something else ?

If something else then tell me what should I use ?

EDIT: After changing it from winlogon to svchost or explorer - it gave the same error :S

What should I do ? NEED HELP !

fireflyyy - December 27, 2010, 12:33 pm

screenshot of configs on cybergate and on crypter, and post on www.ownz-crypter.com/index.php is better there

Sin|orD - December 28, 2010, 2:38 am

Yeah I did post there too yesterday ~

Y-Trick™ - December 29, 2010, 7:58 pm

Nice Tutorial for newbie like me LOL ... :-)

Thankz

yoyoatw - January 2, 2011, 11:29 am

Can you make a TuT for Spynet 2.7 beta 2?

Nikkey - January 9, 2011, 3:34 am

Thank you bro, helped me a lot.

islay - June 30, 2011, 10:45 am

Usefull for guys like me who just started with things like this. :)

Shane1521 - June 30, 2011, 12:12 pm

The download for Own'z crypter isnt working? -_-

lescure31 - October 5, 2011, 9:36 am

no replies since june...

is this TUT always working ?

Wink Emoticon - January 2, 2014, 10:19 pm

Thanks for the tutorial man, I really appreciate it.

Wanted_Guy - January 20, 2014, 4:36 am

i dont think this tut is working anymore, is their is any other fuding tut that works no a days ?

BlueFreakLP - January 25, 2014, 4:32 am

Nice Tutorial, i will try this out :)

Cait Sith - February 8, 2014, 7:13 am

thanks for the updating 2.2.6 tutorial !

riceboxbaby - February 10, 2014, 10:40 pm

nice tut plus crypter well explained :)

Fajerfoks - February 23, 2014, 3:15 am

Awesome tutorial! Thanks a lot for this tutorial man.

Sekret - February 23, 2014, 3:18 am

Great TUT, thanks for the update, clear and useful.

Exitus - February 23, 2014, 12:55 pm

very good explained tutorial i recommend it to my friend and i used it

NyxCoder - July 24, 2014, 12:03 am

Thanks so much for this bro nice tutorial <3333
