Thread: [\\$harecash Downloader \[FREE\]](#)

XboxSkid - November 28, 2010, 10:02 am

Some idiot moderator closed my other thread for not knowing the difference between false positives and real trojans

@ if any of you guys think this is infected, you're not a professional analyzer so SHUT THE FUCK UP

Download link:

For people who pm me, i'm no longer giving the dl public since idiots like to say it's infected.

Enjoy, if you've got a fileups acc reflect it using the reflector

Credits to
zer0fact0r

After navigation, wait till the download button appear's once it does count to 20.

-Hyperion - November 28, 2010, 10:04 am

dude stop trying to infect people!

XboxSkid - November 28, 2010, 10:05 am

I'm not trying to infect people.

People like you on HF Are considered skids I2 comprehend a false positive,
its a dropper since it's packed, it's a downloader since it's linking it self request's. dumb shit.

thehackerkid2010 - November 28, 2010, 10:06 am

bad thread ! i dont trust this :// no virusscan and no picture dont try to infect other people's on this forum bad style !

XboxSkid - November 28, 2010, 10:07 am

look at the first post on this thread stupid troll

If it was infected wouldnt i take the time to crypt it? fucking dumb ass.

ZedNull - November 28, 2010, 10:08 am

Skid, are you so sure of yourself that you would state this file is clean even if run in an extremely close-monitored system? If anyone is interested, I can set up a quick test network and release a pcap file of all network traffic generated while this program is run, as well as dumps of the registry before and after execution. It'll take me a little while to re-image the computers I use for this though, so only if there is enough demand.

XboxSkid - November 28, 2010, 10:09 am

Yes im sure, unless your computer is shit and this program take's all the cpu usage from it and crashes your computer

Root - November 28, 2010, 10:10 am

would be good to know if this works or not man

XboxSkid - November 28, 2010, 10:12 am

It works, it's just that you know the people above you?

They think if a virus total scan says its a virus its a virus.

Also, exposing that it is infected make's the program useless since skids are scared that there computer will get infected and simply, if it can scan it on virus total why not take malwarebytes and remove it?

Root - November 28, 2010, 10:16 am

Ill run it in a sandbox and monitor the traffic if its infected ill rage this tread

Coleak - November 28, 2010, 8:08 pm

Upload the source bro, no one will bitch then.

?ami - November 28, 2010, 8:22 pm

Fail crypting dude, get a better one like Doom Crypter...

Want a link?

mmcdowell - November 28, 2010, 10:14 pm

hey i require 5 posts to PM so can you just PM me?

?ami - November 28, 2010, 10:24 pm

Its infected you retard, enjoy being infected if you download

-mothered- - November 29, 2010, 1:49 am

Whether It's Infected or not, I'd still like to have the download link mate.

If provided, I'll test It on my VM and take It from there. I haven't had much luck with other tools of this nature, hence would like to try this.

Markinsua - November 26, 2012, 12:51 pm

Well look at your REP do you think anyone will trust you ?

Kyle XY - November 26, 2012, 12:54 pm

EPIC GRAVEDIGGING MARKINSUA YOU PHAGGOT.

Really bro? really? this thread is two years old, stop trying to increase your post count

choun0002 - *September 11, 2017, 2:26 am*

Why are you saying idiot administrators?

Administrators are banning for some important cases.

I think your are sprading some viruses.

Why not stop this?
