Thread: [CyberGate Setup Tutorial With Pictures \[Noob Friendly\]](#)

???c? - November 28, 2010, 6:35 pm

Download:

[CyberGate RAT Official Download.](#)

Go to Port Forward.com, find your router, select any game/program, port forward port 82.

[img]http://img408.imageshack.us/img408/8674/portforward82.png[/img]

Open up CyberGate.

Hit "Start". Select "Builder" then "Create Server". Make a new user, delete the default host and add your no-ip.biz account (example: hackforum.no-ip.biz:82)

Follow these instructions.

step 1

[img]http://img18.imageshack.us/img18/2576/connectiong.png[/img]

For password enter anything you want but remember the password because you will need it later.

step 2

[img]http://img26.imageshack.us/img26/4646/instalation.png[/img]

Error message leave off.

step 3

[img]http://img153.imageshack.us/img153/2126/keyloggerq.png[/img]

Anti-Debug everything ON!

step 4

[img]http://img684.imageshack.us/img684/8705/createserver.png[/img]

You can use "Compress with UPX" if you want. (lower server size)

Create server.

Go to "Options" click "Select listening ports" Follow this.

step 5

[img]http://img839.imageshack.us/img839/9065/listeningports.png[/img]

For the password enter the same password as on step 1

Test your server. It should work now.

Now you have to FUD crypt it before you can start spreading it. You can request crypting under "Cryptography Section" or buy a FUD crypter.

When you get your FUD server, test it to make sure it works.

You can scan your file here: <http://vscan.novirusthanks.org/>

With these settings:

[img]http://img827.imageshack.us/img827/3369/nvtscan.png[/img]

Why No Virus Thanks?

Read this: <https://hackforums.net/showthread.php?tid=761605>

You are ready to spread! Happy hacking

I know there are tons of tutorials how to setup CyberGate, a member asked me for help with setup so I made this tutorial for him and thought why not share with others too.

supersurfer - November 28, 2010, 7:32 pm

well.thx for that.. but don't u think so that it should be in the Hacking Tutorial Forum or the cybergate forum..

and also is this common for all latest versions..?

STUN ZEED - November 28, 2010, 7:37 pm

Nice tutorial, very detailed, easy to follow definitely noob friendly

aidandabest09 - November 29, 2010, 7:15 am

if only i had cybergate =p

???c? - November 29, 2010, 3:58 pm

You can download it from the official link mate. Check the first post again, I have updated.

troy_2007h - December 17, 2010, 11:29 am

thnx bro i hope all learn that

???c? - December 17, 2010, 11:47 am

If you will need any help feel free to post again mate
