Thread: [Hackforums Banner Template / Remake + PSD](#)

Tate - November 29, 2010, 6:16 pm

I made a PSD for the HackForums banner. This will allow you to create your own HackForums style banners, make modifications to the HackForums banner, etc.

Here's what the editable PSD will look like:

[img]<http://ploader.net/files/847dfbf13caac71e569cefa40d59415b.jpg>[/img]

With some slight modification of my PSD, you can have a close replica of the original banner (I did some edits on the Arial font to look more like the HackForums font, which isn't public):

[img]<http://ploader.net/files/72b58043c09822325c6a48bbb8405ff1.jpg>[/img]

Have fun, and if you're a GFX wiz, CnC on my little creation.

It's just a template, of course he didn't make them.

Unfair Advantage - November 29, 2010, 7:15 pm

On the bottom banner the bottom left of the S is drawn on manually?

Inventor - November 29, 2010, 7:17 pm

I thought the font of the logo is actually Verdana...?

Tate - November 29, 2010, 7:36 pm

The F in Verdana doesn't have two equal extension lines.

Yes, the S is drawn manually. The headers font (to my knowledge) is a paid font called Akurgj.[/font]

I made a replica of the banner as a template. Replace the icon and background with whatever you like.

Venomous™ - November 29, 2010, 10:56 pm

Really good, i might use it someday :D

crazy4cs - November 29, 2010, 11:51 pm

thanks man,when some contests are organized for HF banner,I will give it a damn :P

perfectiv - November 30, 2010, 1:14 am

Thank's tate, this could come in handy.

Tate - November 30, 2010, 12:27 pm

Thanks for the mediocre feedback guys.
