Thread: [\[TUT\] How to use Google DNS to connect to Hackforums without having problems \[TUT\]](#)

Jesús - November 30, 2010, 2:28 pm

::: Introduction :::

Okay well I been having problems with the server myself and after I've done this it stop and all worked well. I'll post my own pictures to make it easier for you to follow.

::: Information :::

This is the easiest tutorial on HF itself so just follow them and you will connected to HF with faster speed !

::: Tutorial :::

iolaka - November 30, 2010, 2:29 pm

This has been posted many times before, thanks though ?

Virtual Reality - November 30, 2010, 2:30 pm

Just to let you know, one of your spoiler tags is not currently working. You made an error when typing out the BB coding. It should be like this:

Code [spoiler]CONTENT HERE[/spoiler]

Grammar Rays - November 30, 2010, 2:40 pm

I believe this is already posted and I also believe that these issues have been resolved?

Thanks anyway.

Sky- - November 30, 2010, 2:41 pm

I'm pretty sure that the instructions are much better on the actual Google page that Omni posted...

Virtual Reality - November 30, 2010, 2:43 pm

Agreed. Anybody experiencing issues regarding this subject should just refer to this link:

<http://code.google.com/speed/public-dns/docs/using.html#setup>

Syed - November 30, 2010, 2:51 pm

I was the first person to post a thread regarding the Google DNS fix.

Opps didn't see your thread about that :O

Chill.Out - November 30, 2010, 3:09 pm

Or you could use opendns which has been working perfect for me ?

Vorfin - November 30, 2010, 3:56 pm

Why not just do it via command line and save yourself clicking through Windows' millions of stupidly user-friendly windows?

Code netsh interface ip set dns "Local Area Connection" static 8.8.8.8

Zach - November 30, 2010, 4:07 pm

You completely ripped this off Syed, all the pictures.

Good tut though.

Good tut though.

Ripped him off ? I made my own pictures.

Eagle 95 - December 1, 2010, 2:29 am

Tutorial is not needed. Just go on google and you'll get all instructions needed.

Inventor - December 1, 2010, 2:42 am

Good and simple tutorial. Really noob friendly. Thanks for this, it should help lots of people ?

Thank you a lot. Your opinion really counts ? And yes, hopefully if people need it they look here.

See you around the forums ?
