Going to watch it soon. Downloading it right now. Is it good? Is it scary? What is it like?!

It is like an acid trip made of awesome.

The movies are.

I like the series. If you get into it like I did you will love it.

It gets REALLY hard to follow after a certain part.

It is my #1 favorite anime of all time.

Haven't watched it myself but I heard people saying its a great Mecha anime.

Gantz will always be my favorite anime/manga. Nothing will replace it.

Evangelion is just awesome.

NGE is just amazing, girls in tight clothing, giant robots, big guns, what more do you want?

one of my favorites, do not be confused by the sudden jump of the story line, watching this again is like watching an art show . . . a masterpiece =)

DaSkipper - June 23, 2009, 8:37 am

same happened to me but i pushed through. it seemed to start off a bit slow but at episode 5 things got more interesting. have watched the series twice now. love instrumentality

DaSkipper - June 23, 2009, 5:06 pm

Nope. I'm not the kind of guy who waits for anime to be good. It needs to be good from the first episode.

If you didn't like the series, maybe you could attempt the Rebuild version. Some of the character development is cut down, but it moves a lot faster because of this. The graphics are also much better than the original. THORA recently released their 1080p/720p version of the first movie.

It looks much better but I didn't like it. Not my bag baby.

Its not really an anime that you can relax and watch at the same time.... towards the end, you really have to pay attention, and think about it...
