Thread: [SHA1 Hashes](#)

426F62 - December 2, 2010, 10:50 pm

Hey there, I got a couple SHA1 hashes (235). I really don't feel like cracking them one at a time so if anyone has a tool to crack all of them at the same time please do me a favor, I'd appreciate it a lot!

I see people have already provided you with the decrypted hashes. But in the future, there's bulk decrypters online so fast, you could've probably decrypted the words faster than it would've taken you to post this.

Example website: hashes.com

But, nevertheless, if you ever want to post anything feel free, just giving advice :)

Qwertyuiop112233 - November 1, 2023, 1:48 pm

I too am taking part in the competition and came across this thread from Google when I was searching the web :)

I have a problem with 2:

61d54fe02ce6edcde2f5762f2677b3c83d876417
283d5cb401e9de6a2e56f97166a639479fb86aee

I'm stuck and don't know if I'm going the right way. I think they have more than 8 characters.
I'm not asking for an answer, but how long did it take you to guess the password?

If your willing to pay post the hashes in the [Hash Bounties](#) section off the forum.

Designing9653 - November 3, 2023, 1:56 am

This hash should be simple but I sucked, it should be sha1:

db13ca089eb4860896567399a30558f2c1fc69e7

Any advice to the hash ?
